Imagine All The Places You Can Tuck ICOM's Remotable IC-280. (Think small.)

The **IC-280** 2 meter mobile comes as one radio to be mounted in the normal manner: but, as an option, the diminutive front one third of the radio detaches and mounts by its optional bracket, while the main body tucks neatly away out of sight. Now you can mount your 2 meter radio in pint-sized places that seemed far too cramped before.

Measuring only 2 1/4" h x 7" w x 3 3/8" d, the bantam-sized microprocessor control head fits easily into the dash, console or glove box of even the most compact vehicle. Or if those places are already taken by the rest of your "mobile shack," the **IC-280** head squeezes into leftover niches under the dash, overhead, under the seat or even on the steering column.

But don't be misled by the petite size of this subdivided radio: the **IC-280** is jam packed with the latest state of the art engineering and convenience features. No scaled down technology here!

With the microprocessor in the detachable control head, your **IC-280** can store three frequencies of your choice plus the dial, which allows you to select from four frequencies with the front panel switch without taking your eyes off the road. These frequencies are retained in the **IC-280's** memory for as long as power is applied to the radio, even when power is turned off at the front panel switch. And if power is completely removed from the radio the ± 600 KHz splits are still maintained!

The **IC-280** works frequencies in excess of the 2 meter band with ICOM's outstanding single-knob tuning, so you can listen around the entire band without fooling with three tuning knobs. With steps of 15 KC or 5 KC, the **IC-280** puts rapid and easy frequency change at your single fingertip and instantly displays bright, easy to read LED's.

- Available Options:**
- Touch Tone pad/microphone combination, which fits the mic plug on the radio face with absolutely no modification (Fits all ICOM 4-pin mic radios.)
 - 15' unassembled cable kit for long distance remote mounting of the detachable control head

FOREWORD

During the past decade, the growth of the fm mode of communications has been phenomenal. And, this phenomenon has been recorded in the pages of *The ARRL Repeater Directory*. The first edition, published in the summer of 1971, contained 300 repeater listings. Each succeeding edition grew by approximately 25% and today, this, the tenth edition, contains over 5000 listings.

The goal of this directory is to help the mobile ham traveling in urbanized America to find local repeaters that he may be able to use. This edition of the directory has been completely revised with that in mind. All the mobile ham needs to know is the name of the metropolitan area he is near, and the directory will provide him with a list of accessible repeaters. Of course, the United States and Canada are not completely urbanized and there are provisions in the directory to find repeaters outside of metropolitan areas.

The directory also contains information about repeater operating practices, frequency coordination, band plans and the ARRL VHF Repeater Advisory Committee. So, whether you are using a crystallized handheld or a completely synthesized transceiver, *The ARRL Repeater Directory* will provide you with the information you need to communicate in the world of fm repeaters.

USER INFORMATION

This edition of the Repeater Directory has been completely revised. The repeaters are listed according to the metropolitan areas in which they are located. Repeaters that are not in a metropolitan area are listed according to the geographical area in which they are located. Repeaters on ten meters, ATV and 1215 MHz and above are not listed according to metropolitan area because they are so small in number that their locations need no further definition.

Some metropolitan areas cross state boundaries. Where this occurs, all repeaters that are within a metropolitan area are listed under the state in which the metropolitan area exists, not necessarily the state in which the repeater actually is located. This is designed to facilitate the mobile ham who is traveling in unfamiliar parts of the country. For example, a ham traveling in southwestern New Jersey may not know the names of the towns in that part of the state, but he does know that he is in the Philadelphia area, so, he looks under the Philadelphia listing in this Repeater Directory and finds repeaters in both Pennsylvania and New Jersey that may be accessible to him.

The following is an explanation of the information included in each repeater listing.

Location: The geographical location of the repeater.

Input: The input frequency in megahertz.

Output: The output frequency in megahertz.

Call: The callsign of the repeater.

Notes: How the repeater may be accessed and other specialized features are indicated by the following abbreviations:

Access*:

O — carrier-operated

B — burst

PL — Private Line™

T — Touch-Tone™

W — whistle

C — closed private repeater

Specialized features:

A — autopatch

E — emergency power

L — link and/or cross-band

P — portable

R — RACES affiliated

Y — RTTY

Z — direct access to law enforcement

Sponsor: The sponsor of the repeater.

Source: The source of the repeater data.

Date: The date the repeater data was received.

ACCEPT NO SUBSTITUTES!

Before you make the choice of a new hand-held, ask about these important features:

1. Is the case fiberglass reinforced Lexan®?
2. Are the batteries convenient for carrying extras?
3. Is the capacity sufficient for a day's operation?
4. Is there a method for conserving battery life when high power is not required?
5. Does it fit your hand comfortably?
6. Do you have a choice of charging methods?
7. Do you have an ample choice of accessories to back up your radio?

If you can answer 'yes' to all of the above, then you've made the obvious choice. You want a Wilson Mark IV hand-held . . . and accept no substitute for it!

Wilson hand-helds have been known world-wide for exceptional quality and durable performance. That's why they have been the best selling units for years.

The Mark IV miniature sized 2-meter hand-held continues the tradition of dependability and operation, but in an easier to use, more comfortable to carry size.

The small compact size battery pack makes it possible to carry one or more extra packs in your pocket for super extended operation time. No more worry about loose cells shorting out in your pocket, and the economical price makes the extra packs a must.

Conveniently located on top of the radio are the controls for volume, squelch, accessory speaker mike connector, 6 channel switch, BNC antenna connector and LED battery condition indicator.

Optional Touch Tone™ Pad available.

MARK IV: \approx 1 & 4.0 watts

REPEATER OPERATING PRACTICES

1) Monitor the repeater to become familiar with any peculiarities in its operation.

2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself heard, but, generally, "This is W1XZ monitoring" will suffice. One practice that is looked upon with disfavor universally is calling a long CQ on a repeater.

3) Identify legally; you must transmit your callsign at the beginning and end of each contact and every ten minutes in between. At the end you must also identify the station you were in QSO with. It is illegal to key a repeater without identification.

4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.

5) Keep transmissions short and thoughtful. Your monologue may prevent someone with an emergency from using the repeater. If your monologue is long enough, you may *time out* the repeater. Your transmissions are being heard by many listeners including non-hams with "public service band" monitors; don't give a bad impression of our hobby.

6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.

7) Use the minimum amount of power necessary to maintain communications. This FCC regulation minimizes the possibility of accessing distant repeaters on the same frequency.

8) Don't break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended to facilitate mobile hams. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC forbids using an autopatch for anything that could be construed as business communications. Nor should an autopatch be used to avoid a toll call. Do not use an autopatch where regular telephone service is available. Abuses of autopatch privileges may lead to their loss.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or a group is responsible and it behooves those who are regular users of a repeater to support the efforts of keeping the repeater on the air.

Our Name Says Everything

HY-BANDER 2 Meter VHF Mobile Antennas combine broad bandwidth with high efficiency.

5/8 wave design provides low angle radiation for maximum gain. The exclusive Hy-Gain ratchet foldover will adjust through a 180° arc. The ratchet will hold its whip position even at 150 mph. Hy-Gain's high-powered ceramic magnet grips the vehicle's surface at speeds up to 120 mph. Hy-Gain's use of a fiberglass printed circuit loading coil insures incredible tuning accuracy for low VSWR. PC board technology provides up to 50% more surface area for improved conductivity.

FREQUENCY COORDINATORS

Frequency coordinators are volunteers who keep extensive records of repeater input, output and control frequencies, including those not published in directories (at the owners' request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex frequencies. Therefore, anyone considering the installation of a repeater should check with the frequency coordinator of his area.

In some heavily populated areas, the following list of "splinter" frequency pairs are being used for repeater operation. Please note that these pairs may be either low input and high output or high input and low output depending upon local agreement. For example, in one area 146.025 MHz may be a repeater input with an output at 146.625 MHz, while in another area, 146.625 MHz may be the input with an output at 146.025 MHz.

146.025/146.625	146.235/146.835	147.615/147.015	147.825/147.225

RADIO FREQUENCY INTERFERENCE

RADIO FREQUENCY INTERFERENCE

\$3.00

How to identify it and cure it:

- in your transmitter
- in your neighbor's TV, hi-fi/stereo, radio
- in CB radios

Published by the American Radio Relay League

Radio Frequency Interference can ruin your favorite TV show or curtail the enjoyment of operating on 11 meters. It can drive a wedge between neighbors who used to be friends. It can be a headache to the service technician who tried to get rid of it once and for all. RFI is a thorny problem that comes in many guises. Not only does it have many causes, but it has an ever increasing number of entertainment devices to prey upon. This book covers what you need to know to combat RFI. Often the solution is as simple as adjusting the fine tune of your TV, or it may involve a modification to the stereo. But whatever the cause, there is an answer to every type of RFI problem:

REPEATER RECEIVER!

25-550 MHz Single Channel, Fully Shielded, High Performance, Modular Receivers for Repeaters or Similar Highly Demanding Applications...

DIMENSION IN INCHES
 mm

Three models of this unique receiver cover the VHF/UHF spectrum from 25-550 MHz. All boast spurious signal rejection of over 100 dB, and adjacent channel selectivity and desensitization of -86 dB. The phase lock loop demodulator provides squelch immunity of better than 130 dB to signals 15 kHz off frequency! 12 dB SINAD sensitivity of the DFS (25-100 MHz) and DFS-V (100-300 MHz) is 15 uV, while for the DFS-U (300-550 MHz) it's .18 uV. Audio output is 30 mV into a 10 kOhm load; onboard tone squelch and 5 watt audio modules are available at \$15.00 each.

PRICES

DFS, DFS-V (.001% crystal)	\$130.00
DFS, DFS-V (.0005% crystal)	\$150.00
DFS-U (.001% crystal)	\$155.00
DFS-U (.0005% crystal)	\$180.00

2 METER FM ANTENNAS

NEW FROM THE WORLD'S LEADING MANUFACTURER OF VHF/UHF COMMUNICATION ANTENNAS

(A) **FM GAIN RINGO:** The most popular — high performance, half-wave FM antennas. Give peak gain, and efficiency, instant assembly and installation.

AR-2	100 watts	135-175 MHz
AR-25	500 watts	135-175 MHz
AR-220	100 watts	220-225 MHz
AR-450	100 watts	420-470 MHz
AR-6	100 watts	50-54 MHz

(B) **4 POLE:** A four dipole gain array with mounting booms and coax harness 52 ohm feed, 360° or 180° pattern.

AFM-4D	1000 watts	146-148 MHz
AFM-24D	1000 watts	220-225 MHz
AFM-44D	1000 watts	435-450 MHz

(C) **FM GAIN RINGO RANGER:** Extended Range — a one-eighth wave phasing stub and three half waves in phase concentrate your signal at the horizon. Extend your AR-2 with an ARX-2K Ranger Kit.

ARX-2	100 watts	146-148 MHz
ARX-220	100 watts	220-225 MHz
ARX-450	100 watts	435-450 MHz

(D) **POWER PACK:** A 22 element, high performance, vertically polarized FM array, complete with all hardware, mounting boom, harness and 2 antennas.

A147-22	1000 watts	146-148 MHz
---------	------------	-------------

(E) **4-6-11 ELEMENT YAGIS:** The standard of comparison in VHF/UHF communications, now cut for 2 meter FM and vertical polarization. 4 & 6 Element models can be tower side mounted.

A147-4	1000 watts	146-148 MHz
A147-11	1000 watts	146-148 MHz
A220-11	1000 watts	220-225 MHz
A449-6	1000 watts	440-450 MHz
A449-11	1000 watts	440-450 MHz

(F) **FM TWIST:** A Cush Craft exclusive — it's two antennas in one. Horizontal elements cut at 144.5 MHz, vertical elements cut at 147 MHz, two feed lines.

A147-20T	1000 watts	145 & 147 MHz

CHANNELS

**THE WORLD'S FIRST SYNTHESIZED 800 CHANNEL
HAND HELD TRANSCEIVER**

This amazing pocket sized radio represents the year's biggest breakthrough in 2-meter communications. Other units that are larger, heavier and are similarly priced can offer only 6 channels. The SYNCOM'S price includes the battery pack, charger, and a telescoping antenna. But, far more important is the 800 channels offered by the S1.

The optional touch tone pad adds greatly to its convenience and the addition of a Tempo solid state amplifier adds tremendously to its power.

SPECIFICATIONS

The broad-band characteristics enable you to cover the entire phone band with less than 2:1 VSWR.

A distinctive advantage is the low-noise characteristics of the antenna, especially effective in reducing static noises since the antenna is D.C. Ground design.

This antenna is constructed of "high-quality" materials and many hours of pleasurable operation can be expected.

Larsen

the coolest antenna
in town gives you the
hottest performance!

Since the first Larsen Antenna was introduced some 15 years ago, this basic fact has not changed: Larsen Mobile Antennas are designed and built to outperform.

With the introduction of the Larsen exclusive Kūlrod Antenna, this superior performance is a fact more than ever. We suggest that you make this simple test:

Take any antenna other than a Larsen . . . one with a regular unplated stainless steel whip. Apply a good husky signal to it . . . 100 watts, for say, a full minute. Then, power off, feel the antenna. Careful! Burn blisters aren't pleasant.

Next . . . try a Larsen Kūlrod Antenna. Put it to the same test. Amazing isn't it!

That's our story. Heat means power . . . power, not radiated. With the Larsen Kūlrod, power goes into communicating instead of heating the antenna. That's why you can HEAR the difference.

Larsen Antennas are available to fit all styles of mounts and to cover amateur frequencies from 6 meters through 450 MHz. Write for complete catalog and list of dealers nearest you.
