3071 - #5 Road, Unit 9
Richmond, B.C. Canada V6X 2T4
(604) 273-7400

For technical assistance over the phone, please call ICOM's **CUSTOMER SERVICE HOTLINE (206) 454-7619**

All locations are within minutes of a major airport and are easily accessible. Please feel free to drop in at any of the locations Monday through Friday, 8:30a.m. until 5:00p.m.

FOREWORD

Repeaters and FM! What a tasty combination they have become. It was not long ago that VHF and UHF communications were more properly identified as simplex and AM. Technology has changed greatly with the terms repeaters and FM, and in fact, they continue to grow in popularity. Even as we speak, our numbers are rising, and with the inception of Novice Enhancement, Novices join our everyday repeater and FM communications.

Growth is what this, the 1987-88 *Repeater Directory*, displays. With a total of 11,954 listings, there has been an overall increase in numbers to the tune of over 13 percent since last year's edition.

This newly revised sixteenth edition of the ARRL *Repeater Directory* has been edited solely from information which *your* frequency coordinators have supplied. These volunteers strive to achieve interference-free operations for all repeaters within their jurisdictions. To continue their neverending task, coordinators need your input. To assist coordinators, the national repeater data base project, which began in 1986, is part of an ongoing effort to give you, the repeater user and owner, trouble-free repeater operations.

Don't forget! Every active amateur, whether Novice or Extra, needs several copies of this pocket-sized *Directory*. So, no matter where you are, you will always be able to stay in touch with amateurs in your area.

David Sumner, K1ZZ
Executive Vice President

Newington, CT

USER INFORMATION

This edition of the *Repeater Directory* has been completely revised. Except for those in Texas and some foreign countries, all repeaters are listed according to the metropolitan areas in which they are located.

Repeaters that are not in a metropolitan area are listed according to the geographical area within the state or province (eg, northeast, south central, etc) in which they are located. Packet and special mode repeaters are not broken down by area.

Many private systems, including repeaters, remote base stations, control and link channels are in properly coordinated operation on authorized frequencies, but are not included within this directory. This is especially common on the 450-MHz band, which is frequently used for linking and/or remote control systems. Please consult your local frequency coordinator for recommendations of operating frequencies for new repeaters, remote bases or control/link channels.

With an increase in the number of reports of repeater-to-repeater interference, the FCC is placing more emphasis on repeaters being coordinated. Repeater coordination is an example of voluntary self-regulation within the Amateur Service. Noncoordinated repeater operation *may* imply nonconformance with locally recognized band plans (eg, an unusual frequency split) or simply that the repeater trustee has not yet applied for, or received "official" recognition from the frequency coordinator. Known noncoordinated repeaters are indicated in this directory with a pound (#) sign. This symbol does not indicate anything about the relative merit of a particular repeater.

In Virginia 800-572-4201

The following is an explanation of the information included in each repeater listing.

Location: The geographical location of the repeater.

Output: The output frequency in megahertz.

Input: The frequency offset (difference between input and output) either plus (+) or minus (-). The standard offsets, by band, are: 29 MHz (1.0 MHz); 52 MHz (1.0 MHz); 144 MHz (0.6 MHz); 220 MHz (1.6 MHz); 450 MHz (5.0 MHz); 902 MHz (12.0 MHz); and 1240 MHz (12.0 MHz). Repeaters which do not utilize the ARRL recommended standard offsets will show the entire input frequency in megahertz.

Call: The call sign of the repeater.

Notes: How the repeater may be accessed and other specialized features are indicated by the following abbreviations:

Access*:

- o — open, usually carrier-operated
- b — burst
- BI — Bi-lingual
- c — closed private repeater
- PL — Private Line™
- t — Touch-Tone™
- w — whistle
- c — closed private repeater

Specialized features:

- a — autopatch
- (ca) — closed private autopatch; may be used with authorization
- e — emergency power
- l — link and/or crossband
- p — portable
- r — RACES affiliated
- y — RTTY/ASCII

MARK 4CR

The **only** repeaters and controllers
with REAL SPEECH!

No other repeaters or controllers match Mark 4 in capability and features. That's why Mark 4 is the performance leader at amateur and commercial repeater sites around the world. Only Mark 4 gives you Message Master™ real speech • voice readout of received signal strength, deviation, and frequency error • 4-channel receiver voting • clock time announcements and function control • 7-helical filter receiver • extensive phone patch functions. Unlike others, Mark 4 even includes power supply and a handsome cabinet.

2 Meters
220
and 440

Create messages just by talking. Speak any phrases or words in any languages or dialect and *your own voice* is stored instantly in solid-state memory. Perfect for emergency warnings, club news bulletins, and DX alerts. Create unique ID and tail messages, and the ultimate in a real speech user mailbox — only with a Mark 4.

Call or write for specifications on the repeater, controller, and receiver winners.

REPEATER OPERATING PRACTICES

- 1) Monitor the repeater to become familiar with any peculiarities in its operation.
- 2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself heard, but, generally, "This is W1AW monitoring" will suffice.
- 3) Identify legally; you must identify at the end of a transmission or series of transmissions *and* at least once each 10 minutes during the communication.
- 4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.
- 5) Keep transmissions short and thoughtful. Your monologue may prevent someone with an emergency from using the repeater. If your monologue is long enough, you may *time out* the repeater. Your transmissions are being heard by many listeners including non-hams with "public service band" monitors or scanners; don't give a bad impression of our service.
- 6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.
- 7) Use the minimum amount of power necessary to maintain communications. This FCC regulation [97.67(a)] minimizes the possibility of accessing distant repeaters on the same frequency.

8) Don't break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended primarily to facilitate mobile operation. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC forbids using an autopatch for anything that could be construed as business communications. Nor should an autopatch be used to avoid a toll call. Do not use an autopatch where regular telephone service is available. Autopatch privileges that are abused may be rescinded.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or a group is responsible, and those who are regular users of a repeater should support the efforts of keeping the repeater on the air.

CTCSS (PL) TONE FREQUENCIES

The purpose of CTCSS (PL) is to reduce co-channel interference during band openings. CTCSS (PL) equipped repeaters would respond only to signals having the CTCSS tone required for that repeater. These repeaters would not respond to weak distant signals on their inputs and correspondingly not transmit to repeat to add to the congestion.

The standard Electronic Industries Association (EIA) frequency codes, in hertz, with their Motorola alphanumeric designators, are as follows:

67.0—XZ	97.4—ZB	141.3—4A	206.5—8Z
69.3—WZ	100.0—1Z	146.2—4B	210.7—M2
71.9—XA	103.5—1A	151.4—5Z	218.1—M3
74.4—WA	107.2—1B	156.7—5A	225.7—M4
77.0—XB	110.9—2Z	162.2—5B	229.1—9Z
79.7—WB	114.8—2A	167.9—6Z	233.6—M5
82.5—YZ	118.8—2B	173.8—6A	241.8—M6
85.4—YA	123.0—3Z	179.9—6B	250.3—M7
88.5—YB	127.3—3A	186.2—7Z	254.1—ØZ
91.5—ZZ	131.8—3B	192.8—7A	
94.8—ZA	136.5—4Z	203.5—M1	

During 1980 the ARRL Board of Directors adopted the 10-meter CTCSS (PL) tone-controlled squelch frequencies listed below for voluntary incorporation into 10-meter repeater systems to provide a uniform national system.

<i>Call Area</i>	<i>Tone 1</i>	<i>Tone 2</i>
W1	3B-131.8 Hz	ZZ- 91.5 Hz
W2	4Z-136.5	ZA- 94.8

ARRL VHF-UHF ADVISORY COMMITTEE (VUAC)

In order that optimum VHF and UHF spectrum use can be better defined, the VUAC considers all suggestions for band plan revisions, not just those dealing with repeaters.

The members of the VUAC prepare recommendations to the ARRL Board of Directors concerning VHF and UHF frequency use. The recommendations are based upon consultation with segments of the membership and studies conducted by the committee.

As this is written, the VUAC members are:

face it, THE WORLD

of ham radio is a lot more complex than it used to be. We have new modes popping up every day, satellites racing around the globe, computers, spread-spectrum...how can you keep up with it all?

It's easy. Every month, the new *73 Amateur Radio* covers the whole spectrum of amateur radio with a light, easy-going style. We'll keep you up-to-date on what's happening in your hobby with an array of features, reviews, and columns on everything from ATV to Packet, from QRP to DXing!

Just \$19.97 will bring you 12 issues of *73*. A monthly trip to the newsstand would cost over \$35. Find out what your friends already know: the new *73 Amateur Radio* puts the fun back into ham radio.

Repeater Registration

Repeater registration is a necessity due to the many changes that may be made to a repeater system during a given period. In some cases only a change in a specialized feature has occurred. However, in many cases the change has been much more serious such as a change of location, frequency, or call sign. In all cases, these are changes that your coordinator and the *Repeater Directory* need to be made aware of.

In the past registration has been handled by the ARRL HQ in an effort to achieve the most up-to-date information possible on a given repeater for the *Repeater Directory*. With the implementation of the National Repeater Data Base, it will still be necessary for repeater owners/trustees to continue to register their repeaters, however, *all* registration will now be handled through the coordinator for your area (a complete list of coordinators is shown here and on the following pages). If a coordination body does *not* exist in your area, then please send your registration to the ARRL HQ, to the attention of the *Repeater Directory*. Three (3) tear-out registration forms have been provided for your convenience, and are located in the back of this directory.

THE TRI-STATE AMATEUR REPEATER COUNCIL, INC.

P. O. BOX 6743, E'PORT STATION, ELIZABETH, N. J. 07206-0743

SUGGESTED SPECTRUM MANAGEMENT PLAN FOR THE TWO METER BAND IN THE TSARC AREA OF CONNECTICUT, NEW YORK, AND NORTHERN NEW JERSEY

FREQUENCY COORDINATORS

The ARRL is not a frequency coordinator, nor does the ARRL certify coordinators. Coordinators are volunteers normally appointed by a coordinating body. The *Repeater Directory* only reports the fact of coordination or non-coordination as instructed by the coordinating body. Publication in the *Repeater Directory* does not constitute nor imply endorsement or recognition of the authority of such coordinators. Frequency and control frequencies, including those not published in directories (at the owner's request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex frequencies. Therefore, anyone considering the installation of a repeater should check with the local frequency coordinator.

The following is a list of frequency coordinators (or their contact persons) in the United States and Canada.

BAND PLANS

The ARRL supports regional frequency coordination efforts by amateur groups. Band plans published in the ARRL *Repeater Directory* are recommendations based on a consensus as to good amateur operating practice on a nationwide basis. In some cases, however, local conditions may dictate a variations from the national band plan. In these cases, the written determination of the regional frequency coordinating body shall prevail and be considered good amateur operating practice in that region.

When considering frequencies for use in conjunction with a repeater, be *sure* that both the input and output fall within subbands authorized for repeater use, and do not extend past the subband edges. FCC regulation 97.61(c) defines frequencies which are currently available for repeater use. For example, a 2-meter repeater on exactly 145.50 MHz would be "out-of-band," as the deviation will put the signal outside of the authorized band segment.

Packet-radio operations under automatic control should be guided by Section 97.80 of the FCC rules.

29.300-29.700 MHz

29.300-29.500	Amateur Radio satellites
29.520-29.580	Repeater inputs
29.600	Simplex
29.620-29.680	Repeater outputs

Repeater frequency pairs
(input/output):

29.520/29.620	29.560/29.660
29.540/29.640	29.580/29.680

50-54 MHz

50.000-50.100	CW and Beacons:
50.060-50.080	Automatically controlled Beacons
50.100-50.600	SSB and AM:
50.110	SSB and AM:
50.200	SSB National calling frequency (Note: Suggest QSY up for local and down for long distance QSOs)
50.400	AM calling frequency
50.600-51.000	Experimental and Special Modes:
50.700	RTTY Calling Frequency
50.800-50.980	Radio Control (R/C), ten channels on 20 kHz raster.
51.000-51.100	Pacific DX Window
51.100-52.000	FM Simplex
52.000-52.050	Pacific DX Window
52.000-54.000	FM Repeater and Simplex

Repeater frequency pairs (input/output)

52.010/53.010	52.330/53.330	52.710/53.710
52.030/53.030	52.350/53.350	52.730/53.730
52.050/53.050	52.370/53.370	52.750/53.750
52.070/53.070	52.390/53.390	52.770/53.770
52.090/53.090	52.410/53.410	52.790/53.790
52.110/53.110	52.430/53.430	52.810/53.810
52.130/53.130	52.450/53.450	52.830/53.830

52.230/53.230	52.610/53.610	52.930/53.930
52.250/53.250	52.630/53.630	52.950/53.950
52.270/53.270	52.650/53.650	52.970/53.970
52.290/53.290	52.670/53.670	52.990/53.990
52.310/53.310	52.690/53.690	

Simplex frequencies: 52.490 52.510 52.525*

*National Simplex Frequency

144-148 MHz

The following band plan has been proposed by the ARRL VHF-UHF Advisory Committee.

144.00-144.05	EME (CW)
144.05-144.06	Propagation beacons
144.06-144.10	General CW and weak signals
144.10-144.20	EME and weak signal SSB
144.20	National calling frequency
144.20-144.30	General SSB operation
144.30-144.50	New OSCAR sub-band
144.50-144.60	Linear translator inputs
144.60-144.90	FM repeater inputs
144.90-145.10	Weak signal and FM simplex*
145.10-145.20	Linear translator outputs
145.50-145.80	Miscellaneous and experimental modes
145.80-146.00	OSCAR sub-band
146.01-146.37**	Repeater inputs
146.40-146.58**	Simplex
146.61-147.39	Repeater outputs
147.42-147.57	Simplex
147.60-147.99	Repeater inputs

*The channels 145.01, .03, .05, .07 and .09 MHz are widely used for packet radio, and have been established by a number of frequency coordinators. Some have recognized Network Coordinating Agents to coordinate packet-radio use of these frequencies.

**The frequency 146.40 MHz is used in some areas as a repeater input.

Repeater frequency pairs (input/output):

144.51/145.11	144.77/145.37	146.19/146.79
144.53/145.13	144.79/145.39	146.22/146.82
144.55/145.15	144.81/145.41	146.25/146.85
144.57/145.17	144.83/145.43	146.28/146.88
144.59/145.19	144.85/145.45	146.31/146.91
144.61/145.21	144.87/145.47	146.34/146.94
144.63/145.23	144.89/145.49	146.37/146.97
144.65/145.25	146.01/146.61	146.40 or 147.60/147.00*
144.67/145.27	146.04/146.64	146.43 or 147.63/147.03*
144.69/145.29	146.07/146.67	146.46 or 147.66/147.06*
144.71/145.31	146.10/146.70	
144.73/145.33	146.13/146.73	
144.75/145.35	146.16/146.76	*local option

147.69/147.09	147.81/147.21	147.93/147.33
147.72/147.12	147.84/147.24	147.96/147.36
147.75/147.15	147.87/147.27	147.99/147.39
147.78/147.18	147.90/147.30	

Some areas use 146.40-146.60 and 147.40-147.60 MHz for either simplex or repeater inputs and outputs. Frequency pairs in those areas are:

147.415/146.415	147.46/146.46	147.505/146.505
147.43/146.43	147.475/146.475	147.595/146.595
147.445/146.445	147.49/146.49	

For repeaters located east of the Continental Divide, the ARRL suggests standardizing on upright 15-kHz splinter channels; that is, all repeater frequency pairs are low in/high out between 146 and 147 MHz, and high in/low out between 147 and 148 MHz. Recognizing the existence of a significant minority of inverted split repeaters east of the Divide, and wishing to minimize expense and inconvenience of these repeater groups, the ARRL recommends that these changes be completed by April 1989.

146.025/146.625	146.295/146.895	147.735/147.135
146.055/146.655	146.325/146.925	147.765/147.165
146.085/146.685	146.355/146.955	147.825/147.225
146.115/146.715	146.385/146.985	147.855/147.255
146.145/146.745	147.615/147.015	147.885/147.285
146.175/146.775	147.645/147.045	147.915/147.315
146.205/146.805	147.675/147.075	147.945/147.345
146.235/146.835	147.705/147.105	147.975/147.375
146.265/146.865		

Simplex frequencies:

*146.415	146.55	147.48
*146.43	146.565	147.495
*146.445	146.58	147.51
*146.45	146.595	147.525
*146.475	147.42	147.54
*146.49	147.435	147.555
*146.505	147.45	147.57
#146.52	147.465	147.585
146.535		

#National Simplex Frequency

*May also be a repeater (input or output). See repeater pairs listing.

Several states have chosen to realign the 146-148 MHz band, using 20 kHz spacing between channels. This choice was made to gain additional repeater pairs.

The transition from 30 to 20 kHz spacing is taking place on a case by case basis as the need for additional pairs occurs. Typically the repeater on an *odd* numbered pair will shift to 10 kHz, up or down, creating a new set on an even numbered channel. For example, the pair of 146.13/.73 would change to 146.12/.72 or 146.14/.74, while the pairs of 146.10/.70 and 146.16/.76 would be left status quo.

220-225 MHz

The following band plan is currently under review by the ARRL VHF-UHF Advisory Committee.

220.00-220.05	EME (Earth-Moon-Earth)
220.05-220.06	Propagation beacons
220.06-220.10	Weak signal CW
220.10	Calling frequency
220.10-220.50	General weak signal, rag chewing and experimental communications
220.50-221.90	Experimental and control links
221.90-222.00	Weak signal guard band
222.00-222.05	EME
222.05-222.06	Propagation beacons
222.06-222.10	Weak signal CW
222.10	Calling frequency
222.10-222.30	General operation CW or SSB, etc.
222.34-223.38	Repeater inputs
223.34-223.90	Simplex and repeater outputs (local option)
223.94-224.98	Repeater outputs

Comments concerning packet-radio frequencies in this band may be sent to the VUAC and VRAC member in your Division.

Simplex frequencies:

223.42	223.52	223.62	223.72	223.82
223.44	223.54	223.64	223.74	223.84
223.46	223.56	223.66	223.76	223.86
223.48	223.58	223.68	223.78	223.88
223.50*	223.60	223.70	223.80	223.90

* National simplex frequency

Interim packet operation guidance:

223.40 primary simplex channel (avoid interference to any coordinated repeaters)

For other simplex channels or duplex channels, please consult your local frequency coordinator.

Repeater frequency pairs (input/output):

222.32/223.92	222.54/224.14	222.76/224.36	222.98/224.58	223.20/224.80
222.34/223.94	222.56/224.16	222.78/224.38	223.00/224.60	223.22/224.82
222.36/223.96	222.58/224.18	222.80/224.40	223.02/224.62	223.24/224.84
222.38/223.98	222.60/224.20	222.82/224.42	223.04/224.64	223.26/224.86
222.40/224.00	222.62/224.22	222.84/224.44	223.06/224.66	223.28/224.88
222.42/224.02	222.64/224.24	222.86/224.46	223.08/224.68	223.30/224.90

222.46/224.06	222.68/224.28	222.90/224.50	223.12/224.72	223.34/224.94
222.48/224.08	222.70/224.30	222.92/224.52	223.14/224.74	223.36/224.96
222.50/224.10	222.72/224.32	222.94/224.54	223.16/224.76	223.38/224.98
222.52/224.12	222.74/224.34	222.96/224.56	223.18/224.78	

420-450 MHz

The following band plan is currently under review by the ARRL VHF-UHF Advisory Committee.

420.00-426.00	ATV repeater or simplex with 421.25 MHz video carrier, control links and experimental
426.00-432.00	ATV simplex with 427.250 MHz video carrier frequency
432.00-432.070	EME (Earth-Moon-Earth)
432.07-432.08	Propagation beacons
432.08-432.10	Weak signal CW
432.100	70-cm calling frequency
432.10-432.125	Mixed mode and weak signal work
432.125-432.175	OSCAR inputs
432.175-433.00	Mixed mode and weak signals
433.00-435.00	Auxiliary/repeater links
435.00-438.00	Satellite only (Internationally)
438.00-444.00	ATV repeater input with 439.250 MHz video carrier frequency and repeater links
442.00-445.00	Repeater inputs and outputs (local option)
445.00-447.00	Shared by auxiliary and control links, repeaters and simplex (local option)
446.0	National Simplex Frequency
447.00-450.00	Repeater inputs and outputs (local option)

Comments concerning packet-radio frequencies in this band may be sent to the VUAC and VRAC member in your Division.

The band is shared by amateurs with Government Radio location services (RADAR); amateurs must not interfere with these priority Government stations. As part of WARC-79 proceedings, the 420-430 MHz portion of the band was removed from the Amateur Radio Service north of Line A (see figure).

In a later action, FCC allocated portions of the band 421-430 MHz to the Land Mobile Service within 50-mile radii centered on Buffalo, Detroit and Cleveland. Amateur stations south of Line A in the vicinities of these cities may continue to operate in the 421-430 MHz spectrum as long as they do not cause interference to land mobile or government radiolocation users. Additionally, 50-watt PEP output power limitations apply to certain amateurs operating within circles of designated military installations in the US. [See §97.3(i) and §97.7(g)(6)]

Repeater frequency pairs (input/output is local option):

442.000/447.000	442.600/447.600	443.200/448.200
442.025/447.025	442.625/447.625	443.225/448.225
442.050/447.050	442.650/447.650	443.250/448.250
442.075/447.075	442.675/447.675	443.275/448.275
442.100/447.100	442.700/447.700	443.300/448.300
442.125/447.125	442.725/447.725	443.325/448.325
442.150/447.150	442.750/447.750	443.350/448.350
442.175/447.175	442.775/447.775	443.375/448.375

444.125/449.125	444.550/449.550	444.975/449.975
444.150/449.150	444.575/449.575	
444.175/449.175	444.600/449.600	
444.200/449.200	444.625/449.625	

902-928 MHz⁽¹⁾

The following interim bandplan was adopted at the ARRL Board of Directors meeting in October 1984.

<i>Segment</i>	<i>Use</i>	<i>Footnotes</i>
902-904 MHz	Narrow bandwidth, weak signal communications	
902.0-902.8	SSTV, Fax, ACSSB, experimental	
902.8-903.0	Reserved for EME, CW expansion	
903.0-903.05	EME exclusive	
903.07-903.08	CW beacons	
903.1	CW, SSB calling frequency	
903.4-903.6	Crossband Linear Translator inputs	
903.6-903.8	Crossband Linear Translator outputs	
903.8-904.0	Experimental beacons exclusive	
904-906	Digital Communications	(2,8)
906-907	Narrow bandwidth FM simplex services, 25 kHz channels	(6)
906.50	National simplex frequency	
907-910	FM repeater inputs, paired with 919-922 MHz; 119 pairs every 25 kHz, e.g. 907.025, 050, 075, etc.	
	908-920 MHz uncoordinated pair.	(2,4)
910-916	ATV	(2,3)
916-918	Digital Communications	(2,8)
918-919	Narrow bandwidth, FM control links and remote bases	
919-922	FM repeater outputs, paired with 907-910 MHz	(2,4)
922-928	Wide bandwidth experimental, simplex ATV, Spread Spectrum	(5,7)

Canadian amateurs note: The amateur service will continue to have secondary status in the band 902-928 MHz throughout Canada, using any of the following emissions: N0N, A1A, A2A, A3C, A3E, C3F, F1A, F2A, F2B, F1C, F3E.

Before operation in this band, Canadian amateurs licensees are required to consult with their DOC District Office to ensure interference will not be caused to other services operating in the area as per Section 45 of the General Radio Regulations Part II, given in TRC 25.

Government of Canada shipborne radiolocation service is permitted within 150 km of the East and West Coasts, Arctic Ocean, Hudson Bay, James Bay and up the St. Lawrence River as far as Rimouski on pre-coordinated channels in the 902-928 MHz band.

Footnotes

- 1) Extracts of FCC Rules & Regulations, paragraph 2.106 "Table of Frequency Allocations" modified by General Docket 80-739, 8 Dec. 1983; Footnote US-267: "In the band 902-928 MHz, Amateur Radio stations shall not operate within the states of Colorado and Wyoming, bounded by the area of: latitude 39°N-42°N and longitude 103°W-108°W." Footnote US-275: "The band 902-928 MHz is allocated on a secondary basis to the amateur service subject to not causing harmful interference to the operations of Government stations authorized in this band or to Automatic Vehicle Monitoring (AVM) systems. Stations in the amateur service must tolerate any interference from the operations of industrial, scientific and medical (ISM) devices, AVM systems and the operations of Government stations authorized in this band."
- 2) Coordinated frequency assignments required.
- 3) ATV assignments should be made according to modulation type, e.g. VSB-ATV, SSB-ATV or combinations. Coordination of multiple uses of a single channel in a local area can be achieved through isolation by means of cross-polarization and directional antennas.
- 4) Coordinated assignments at 100 kHz until allocations are filled, then assign 50 kHz until allocations are filled, before assigning 25-kHz channels.
- 5) Simplex services only, permanent users shall not be coordinated in this segment. High altitude repeaters for other unattended fixed operations are not permitted.
- 6) Voice and non-voice operation.
- 7) Spread-spectrum requires FCC authorization.
- 8) Consult FCC R&R 97.69 for allowable data rates and bandwidths.

1240-1300 MHz

The following band plan was adopted by the ARRL Board of Directors meeting in January 1985.

<i>Segment</i>	<i>Use</i>	<i>Footnotes</i>
1240-1246	ATV #1	(2,3)
1246-1248	Narrow-bandwidth FM point-to-point links and digital, duplex with 1258-1260	(2)
1248-1252	Digital Communications	(2,8,9)
1252-1258	ATV #2	(2,3)
1258-1260	Narrow-bandwidth FM point-to-point links and digital, duplexed with 1246-1252	(2)
1260-1270	Satellite uplinks, reference WARC 1979	
1260-1270	Wide-bandwidth experimental, simplex ATV	(5,6)
1270-1276	Repeater inputs, FM and linear, paired with 1282-1288, 239 pairs every 25 kHz, e.g. 1270.025, .050, .075, etc. 1271.0-1283.0 uncoordinated test pair	(2,4,9,10)
1276-1282	ATV #3	(2,3)
1282-1288	Repeater outputs, paired with 1270-1276	(2,4,9,10)
1288-1294	Wide-bandwidth experimental, simplex ATV	(6)
1294-1295	Narrow-bandwidth FM simplex services, 25-kHz channels	(7)
1294.5	National FM simplex calling frequency	
1295-1297	Narrow bandwidth weak-signal communications (no FM)	
1295.0-1295.8	SSTV, FAX, ACSB, experimental	
1295.8-1296.0	Reserved for EME, CW expansion	
1296.0-1296.05	EME-exclusive	
1296.07-1296.08	CW beacons	
1296.1	CW, SSB calling frequency	
1296.4-1296.6	Crossband linear translator input	
1296.6-1296.8	Crossband linear translator output	
1296.8-1297.0	Experimental beacons (exclusive)	
1297-1300	Digital Communications	

Footnotes

- 1) Deleted
- 2) Coordinated assignments required.
- 3) ATV assignments should be made according to modulation type (for example, VSB-ATV, SSB-ATV, or combinations). Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross polarization and directional antennas. DSB ATV may be used, but only when local and regional activity levels permit. The excess bandwidths from such users are secondary to the assigned services.
- 4) Coordinate assignments with 100-kHz channels, beginning at the lower end of the segment until allocations are filled, then assign 50-kHz channels until allocations are filled before assigning 25-kHz channels.
- 5) Wide bandwidth experimental users are secondary to the satellite service and may be displaced upon the installation of any new satellites. Users are EIRP-limited to the noise floor of the satellites in service and may suffer interference from satellite uplinks.
- 6) Simplex services only; permanent users shall not be coordinated in this segment. High-altitude repeaters or other unattended fixed operations are not permitted.
- 7) Voice and non-voice operations.
- 8) Consult 47 C.F.R. 97.69 (FCC regulations) for allowable data rates and bandwidths.
- 9) Provide guard bands at the higher frequency end of segments, as required, to avoid interference to ATV.
- 10) 1274.0-1274.2 and 1286.0-1286.2 MHz are optionally reserved for contiguous Linear Translators supporting multiple narrow bandwidth users. These may also be duplexed with other non-coordinated band segments.

10 GHz

The following calling frequency was adopted by the ARRL Board of Directors at the January 1987 meeting.

10.368 GHz Narrow-band calling frequency

ITU Region 1 (Europe and Africa)

144-146 MHz Band Plan

144.00-144.01	EME
144.05	CW calling, once contact has been established move off frequency
144.10	CW random meteor scatter
144.15	Upper limit CW exclusive
144.20	SSB random meteor scatter
144.30	SSB calling, once contact has been established move off frequency
144.40	SSB meteor scatter reference frequency
144.50	SSTV calling, Upper limit of CW/SSB exclusive
144.60	RTTY calling
144.675	Data transmission calling frequency
144.70	FAX calling
144.845-144.990	Beacon exclusive
145.00-145.175	Repeater inputs R0 to R7
145.20-145.575	Channelized FM Simplex
145.50	FM calling frequency, once contact has been established move off frequency
145.60-145.775	Repeater outputs, R0 to R7
145.80-146.00	Space communications, CW/SSB uplink only

Repeater Channels (input/output)

R0	145.000/145.600
R1	145.025/145.625
R2	145.050/145.650
R3	145.075/145.675
R4	145.100/145.700
R5	145.125/145.725
R6	145.150/145.750
R7	145.175/145.775

Simplex Channels

S10	145.25	
S11	145.275	
S12	145.30	
S13	145.325	
S14	145.35	
S15	145.375	
S16	145.40	
S17	145.425	
S18	145.45	
S19	145.475	
S20	145.50	Most common simplex calling frequency, once contact has been established move off frequency
S21	145.525	
S22	145.55	
S23	145.575	

U.K. repeaters require a 1750-Hz (\pm 25 Hz) tone burst of about 200-ms duration to open the repeater. It is best to transmit this tone at the start of each transmission. Belgian repeaters require a 3-second tone burst. Swiss repeaters require a 1800-Hz tone burst.

Note! Several French repeaters are on nonstandard frequency pairs.

29.5 — 29.7 MHz

Introducing the next logical step.

Yaesu's Dual Band Handie.

Double your HT operating capability with Yaesu's dual-band FT-727R.

You get 5 watts on 2 meters and 440 MHz. Battery saver. 10 memories. Separate VHF and UHF VFO registers. Scanning functions. And much more. Introduce yourself to the dual-band FT-727R today!

- Built-In, Low-Noise Preamp for Receive
- Remotable
- 9-10dB Gain on Low-Drive Units Makes Them Ideal for H.T.'s
- Built to Commercial Standards
- Full-Line Includes Units for 50, 144, 220 and 450 MHz,
and Commercial Bands
- Repeater Versions Available

Put a famous **LUNAR** GaAs FET Preamp on **your** receiver
and find out why commercial repeater owners
have been using them for years!

**...CELEBRATING TEN YEARS
IN THE AMATEUR INDUSTRY.**

see your dealer or contact

GREETINGS FROM LIMARC THE LONG ISLAND MOBILE AMATEUR RADIO CLUB, INC.

Celebrating its 21st Year.

LIMARC is an ARRL Affiliated Radio Club and a Special Service Club, a member of AMSAT, the Tri-State Amateur Repeater council and the Hudson Amateur Radio Council. Membership is over 600.

We're a not-for-profit organization dedicated to the advancement of Amateur Radio, community public service and assistance to fellow Hams in need.

LIMARC sponsors many services including the following:

- | | | |
|---------------------|--------|---------|
| • Repeater stations | W2VL | 146.85 |
| | WB2NHO | 147.375 |
| | WB2NHO | 224.820 |
| | WB2NHO | 449.125 |
| | WB2NHO | 29.66 |
- Autopatch.
 - The Helen Reed Memorial Fund.
 - Monthly license testing (VE), call Joe Kolb, W2NL 516-541-2450 at night.
 - HAMFESTS in February, May and September. Call Hank WB2ALW 516-484-4322.
 - Bunny Hunt, monthly.
 - Info Net, Monday at 8:30 PM on 146.85
 - Code Practice on 146.85. Check Info Net.
 - SWAP & SHOP, Wednesday 8 PM on 146.85.
 - Bowling Party, Morning Show Breakfasts, Picnic, Thursday lunch, social hour with refreshments at each meeting and much more.
 - Monthly LIMARC meetings are held the first Tuesday of each month (except July and Aug.) at the Thompson Jr. High School, Syosset, NY. Talk in on 146.85.
 - Membership information from Lee Abrams, WB2CUW 516-783-7590, 2 Tardy Lane South, Wantagh, NY 11793.
- President, Art Altarac, WA2KXE; Vice Pres., Hank Wener, WB2ALW; Secretary, Steve Schuck, WB2WAK; Treasurer, Ken Gunther, WB2KWC.

WASHINGTON**SHARED NON-PROTECTED (SNP) REPEATER PAIRS . . .**

In the areas of Western Washington, British Columbia and Oregon exists repeater frequencies identified as SNP. SNP frequencies are intended to provide spectrum for experimental repeaters, emergency or search-and-rescue operations, portable public service systems, site evaluation, a holding place for those awaiting coordination and a place for those who wish to have their own "garage" repeaters.

Users of SNP frequencies do so under the following guidelines: 1) The frequencies are shared by all users; 2) Operators of repeaters using SNP frequencies receive no protection from other co-channel users; 3) All systems use CTCSS or other suitable, approved method of limited access; and 4) The coordination organization shall coordinate the CTCSS tones.

Users coming into the Pacific Northwest will find a variety of systems on SNP frequencies, thus a listing of them is not practical.

SPECIAL SERVICE CLUBS (SSC)

These Amateur Radio Clubs have qualified for Special Service Club status by demonstrating an extra commitment to the advancement of Amateur Radio in their communities. Many SSCs also sponsor repeaters (listed within this directory), some of which have open autopatch capabilities. Should you find yourself in these areas, whether you are a permanent resident or just passing through, feel free to contact the Special Service Club and

<i>Club Name</i>	<i>Address</i>	<i>Mbrs</i>

REPEATER-TO-REPEATER INTERFERENCE

In an effort to resolve repeater-to-repeater interference complaints, FCC has offered the following definition of "Repeater operation." Where an amateur radio station in repeater or auxiliary operation causes harmful interference to the repeater or auxiliary operation of another amateur radio station, the two are equally and fully responsible for resolving the interference unless one station's operation is coordinated (see §97.3(k)) and the other's is not. In that case, the station engaged in the non-coordinated operation has primary responsibility to resolve the interference.

§97.85 (g)

TRACKING DOWN REPEATER JAMMERS

Repeaters, which of course, are fixed frequency devices, are vulnerable to abuse by some among us who find a perverse pleasure in destroying the pleasure of others by disrupting repeater communications.

REPEATER JAMMERS AND THE LOCAL INTERFERENCE COMMITTEE

Interference problems on VHF or UHF repeaters are primarily local problems requiring local resolution. This kind of problem varies from non-existent in some parts of *the country to extremely serious in others, even to the point of a threat of bodily harm.* The Amateur Auxiliary mechanism for dealing with any local amateur-to-amateur interference (primarily on VHF) is the local interference committee. The philosophy of the committee approach to solving this type of problem was provided by the ARRL Interference Task Force in 1980. The Task Force summarized its findings in its operational "green book," *Handbook For Local Interference Committees.* Although this fine book was published prior to the enactment of Public Law 97-259, it provides excellent information on direction-finding techniques and methods of combating amateur-to-

amateur interference. Many repeater groups have already successfully established local interference committees, some employing very sophisticated methods; the committee approach to solving this type of problem has proven most effective.

The Amateur Auxiliary incorporates this program of local interference committees into its comprehensive program of dealing with all types of amateur variations with the regulations. Since the ARRL Field Organization is the focus of Amateur Auxiliary involvement as recognized by agreement with FCC, the local interference committee now comes within the purview of the Section Manager's overall Amateur Auxiliary program. The local interference committee gains official standing through the Section Manager. It is, in effect, a "group appointment" of the Section Manager, for specific authorization to deal with local problems of amateur-to-amateur interference. Thus, the local interference committee plays a crucially important role in the makeup of the Amateur Auxiliary.

For more information on local interference committees, Amateur Auxiliary and the ARRL Field Organization, contact your ARRL Section Manager, or the Field Services Dept at ARRL HQ.

Definitions of the words frequently used on FM repeaters:

Autopatch—a device that interfaces the repeater system with the telephone system to extend ham communications over the telephone communications network.

Breaker—a ham who interjects his call sign during a QSO in an attempt to get a chance to communicate over the repeater.

Channel—the pair of frequencies (input and output) a repeater operates on.

Closed repeater—a repeater whose use is limited to certain individuals.

Control operator—an individual ham designated to “control” the repeater, as required by FCC regulations.

COR—Carrier-operated relay, a device that, upon sensing a received signal, turns on the repeater’s transmitter to repeat the received signal.

Courtesy beeper—a tone sounded shortly after each repeater transmission to permit other stations to gain access to the repeater before the tone sounds.

Coverage—the geographical area in which the repeater may be used for communications.

Crossband—communications to another amateur frequency band by means of a link interfaced with the repeater.

Desense—degradation of receiver sensitivity caused by strong unwanted signals reaching the receiver front end.

Duplexer—a device that permits the use of one antenna for both transmitting and receiving with minimal degradation to either the incoming or outgoing signals.

Frequency synthesis—a scheme of frequency generation in transceivers using digital techniques.

Full quieting—signal strength in excess of amount required to mask ambient noise.

Hand-held—a portable FM transceiver that is small enough to use and carry in one hand.

Input—the frequency the repeater receiver is tuned to: the frequency that a repeater user transmits on.

Intermod—interference caused by spurious signals generated by intermodulation distortion in a receiver front end or transmitter power-amplifier stage.

Key-up—turning on a repeater by transmitting on its input frequency.

Machine—the complete repeater system.

Mag-mount—a mobile antenna with a magnetic base that permits quick installation and removal from the motor vehicle.

NiCds—nickel-cadmium batteries that may be recharged hundreds of times, used to power portable FM transceivers.

Offset—the spacing between a repeater's input and output frequencies.

Omnidirectional—an antenna system that radiates equally in all directions.

Output—the frequency the repeater transmits on; the frequency that a repeater user receives on.

Picket-fencing—rapid flutter on a mobile signal resulting from multipath fading.

Polarization—the plane an antenna system operates in; most repeaters are vertically polarized.

Reverse autopatch—a device that interfaces the repeater with the telephone system and permits users of the phone system to call the repeater and converse with on-the-air repeater users.

Reverse split—a split-channel repeater operating in the opposite direction of other repeaters.

RPT, R—abbreviations used after repeater call signs to indicate that the call sign is being used for repeater operation.

Simplex—communications on one frequency, not via a repeater.

Splinter—frequency—2-meter repeater channel 15 kHz above or below the standard 30 kHz-spaced channel.

Split sites—the use of two locations for repeater operation (the receiver is at one site and the transmitter at another), and the two are linked by telephone or radio.

Squelch tail—the noise burst that follows the short, unmodulated carrier following each repeater transmission.

Timer—a device that limits the length of a single repeater transmission.

Tone pad—a device that generates the standard telephone system tones used for controlling various repeater functions.

“The RC-850 Repeater Controller ... still the leader of the pack!”

The RC-850 controller offers your group the most advanced repeater control technology available anywhere. Through ongoing hardware and software enhancements, even our first customers enjoy new features that keep it ahead of the pack.

With the '850, your repeater becomes fully remotely programmable. From command codes to the repeater's operating schedule, virtually everything can be easily changed. Touch-Tone programming from your radio or the phone with synthesized voice readback, or programming from your home computer via modem or packet.

The autopatch supports local and radio-linked remote phone lines, extending your patch coverage to match your RF coverage. You don't even need a phone line at your site! The 250 autodial slots meet everyone's needs, with up to 35 digit storage for personal MCI/Sprint codes.

The easy-to-use mailbox lets you include phone numbers, times, or frequencies in messages. The controller is so smart, it'll leave you a message if you miss a reverse patch or an alarm.

Selective call capabilities range from CTCSS and two-tone to display paging, so you can always be available without having to listen. Voice response telemetry lets you remotely meter your site. Its continuous measurements with storage of updated min and max readings let you find out how cold it gets, how high the reflected power reads . . . and when.

Individual user access codes, with callsign ID, offer secure access to selected functions to completely prevent horseplay.

The industry's top-of-the-line controller, now better than ever, for *your* repeater.

“The Digital Voice Recorder echos your thoughts”

ACC's Digital Voice Recorder allows you to remotely record your voice over the air using digital storage in its huge memory array. PCM recording results in the highest possible fidelity, so you're proud of how it sounds on your repeater.

The DVR's voice mailbox gives your repeater users computer bulletin-board like capability from any radio with a mic and Touch-Tone pad. With messages stored in voice, your users don't need special gear to enjoy the latest in communications technology (from anywhere).

Your repeater's IDs and other messages can consist of remotely recorded DVR audio tracks which can provide information to your users — about your system, club, meetings, and special events. And you can make your repeater the friendliest around. With its no compromise high quality PCM digital audio processing, even famous celebrities can sound like they're live at your repeater site!

The DVR connects easily to your RC-850 or RC-85 controller. And one DVR can support up to *three* repeaters for a cost effective installation.

The Digital Voice Recorder is the neatest thing to happen to repeaters since ACC's repeater controllers. Request our audio demonstration tape so you can hear it for yourself.

"The RC-85 Repeater Controller is the second best controller anywhere"

The RC-85 controller offers the high tech basics of repeater control, plus! Of course, much of what we consider to be the "basics" aren't found *anywhere else, at any price.*

Remote programming lets you configure the operating characteristics of your repeater and change them at any time — without a trip to the hill. Non-volatile memory remembers your parameters, even after a power loss.

Synthesized speech makes it easy for users to interact with the repeater. Commands are acknowledged and information is available to users through remotely programmable ID, tail, and bulletin board messages. The new, larger speech vocabulary is ideal for repeater groups, emergency and public service needs. And since your repeater talks, it's friendly and fun to use.

The patch provides ten Emergency autodial numbers and 190 user loadable autodial slots. With toll restrict, "cover tone", and more.

The remote base port lets you hook up a transceiver to your repeater for remotely controlled linking to other repeaters and simplex channels. With full frequency control! Frequency agile linking is invaluable for public service uses, and it's fun!

There's even more ... a talking S-meter so users can check how well they're getting into the repeater, a site alarm for security, paging, and remote control outputs for controlling equipment at the site.

Any repeater can be brought up-to-date at a price that's right with ACC's RC-85 Repeater Controller.

“Why upgrade your repeater with ACC products ...”

Advanced Computer Controls continues to lead the way in advanced repeater technology, changing the face of amateur repeaters every day. While old fashioned repeaters are just relay stations, repeaters equipped with ACC controllers offer users, control operators, and site managers features and tools to make operation more convenient, useful, and FUN!

And ACC's amateur radio repeater controllers are anything but “amateur”. They're used by the U.S. Army, Navy, Forest Service, and other government and commercial users around the country. And, of course, you'll also find them on the leading amateur systems in North America and abroad.

There's never been a better time to upgrade your repeater system with ACC's products, unmatched in the industry in quality, sophistication, and performance. With well written, illustrated, easy-to-read manuals, training tapes, and free telephone technical support.

We welcome you to order manuals for evaluation, with the cost applied as a credit toward the equipment. Or request our latest demonstration tape cassette so you can hear for yourself. And request our free “ACC Notes” newsletter.

Please call or write now for the rest of the story on all our repeater products, including controllers, digital voice storage units, and other Touch-Tone control products.

You'll be *GLAD* you did.

AND VALUE**
WITHOUT COMPROMISE

KRP-5000 REPEATER

2 meters, 220, and 440!

**Word is spreading fast-
"Nothing matches the KRP-5000
for total performance and value. Not GE, not even Motorola."**

RF performance really counts in tough repeater environments, so the KRP-5000 receiver gives you 7 helical resonators, 12-poles of IF filtering, and a precise Schmitt trigger squelch with automatic threshold switching. The transmitter gives you clean TMOS FET power.

Enjoy high performance operation with: remote programmability, sequential tone paging, autopatch, reverse autopatch, 200-number autodial, remote squelch setting, status inputs, control outputs, and field-programmable Morse messages.

**Call or write for the full
performance story . . . and
the super value price!**

#1 Source of PACKET Info

Magazine

For Amateur Radio and Computerists

(in our 6th year)

Why Should You Subscribe?

Read what our subscribers say!

It's in the fine print!

Your magazine is the finest innovation that I have seen in ham radio since 1953 - except... maybe the all-solid state transceiver. Carl Soltesz, W8PFT • ...have most certainly received my moneys worth in software... Michael Regan, K8WRB • ...you have found a nice niche for CTM in packet... you have me getting interested... Charlie Curle, AD4F Chattanooga, TN • The packet computer info convinced me to subscribe. John Skubick, K8JS • Enclosed is my check for renewal of my subscription. I enjoy the down to earth and honey style of your magazine and the many fine computer articles... Andy Kosiorek, Lakewood, OH • I was both pleased and dismayed upon becoming acquainted with your magazine at HAM-COM. Pleased that I discovered your magazine - dismayed that I didn't long before now. Bill Lathan, AK5K ...CTM gives the finest coverage to packet radio that I have seen in any of the computer or amateur radio magazines. It would appear that CTM has just the right blend of packet amateur radio articles and computer articles. Barry Siegfried, K2MF • Of the three HAM magazines I receive each month QST, 73 and CTM, CTM is the only one I read from cover to cover and carry with me during my travels abroad. Most of the time it remains in that country. Buck Rogers, K4ABT

Selfridge Air Force Base

Affordable Packet Radio

MFJ-1274 \$169.95; MFJ-1270, \$139.95

These MFJ clones of the TAPR TNC-2 let you join the exciting world of packet radio simply and inexpensively. All you need to operate packet radio is an MFJ TNC, your rig and any home computer with an RS-232 serial port and terminal program. With a Commodore 64/128 or VIC-20 you can use MFJ's optional Starter Pack to get on the air immediately. It includes a cable, terminal software and complete instructions. Order MFJ-1282 (disk) or MFJ-1283 (tape), \$19.95 each.

They feature AX.25 Level 2 Version 2 software, hardware HDLC, true Data Carrier Detect for HF, multiple connects, 256K EPROM, 16K RAM (expandable to 32K with optional EPROM), socketed ICs plus more.

MFJ-1274, \$169.95, has switchable VHF/HF modem and precision tuning indicator. MFJ-1270, \$139.95, does not. Add \$5 shipping. Both can be used as excellent digipeaters.

HEAR POLICE/FIRE CALLS

on 2 Meter Handhelds with this MFJ VHF Converter.

MFJ-313

\$ 39⁹⁵

*Scanning
Handhelds
become
Police/Fire
Scanners*

New MFJ VHF converter turns your synthesized scanning 2 meter handheld into a hot Police/Fire/Weather band scanner.

144-148 MHz handhelds receive Police/Fire on 154-158 MHz with direct frequency readout. Hear NOAA weather, maritime coastal plus more on 160-164 MHz.

Mounts between handheld and rubber ducky.

Feedthru allows simultaneous scanning of both 2 meters and Police/Fire bands. No missed calls.

Highpass input filter and 2.5 GHz transistor gives excellent uniform sensitivity over both bands. Crystal controlled.

Bypass/OFF switch allows transmitting. Won't burn out if you transmit (up to 5 watts) with converter on. Low insertion SWR. Uses AAA battery. 2¼x1½x1½ in. BNC connectors.

Enjoy scanning, memory, digital readout, etc.

as provided by your handheld on Police/Fire band.

Order from MFJ and try it-no obligation. If not delighted, return it within 30 days for refund (less shipping). One year unconditional guarantee.

Order today. Call toll free 800-647-1800. Charge VISA, MC or mail check, money order for amount indicated plus \$4.00 each shipping.

Hear police/fire/weather. Order now.
