PURPOSE

The purpose of the ARRL *Repeater Directory* is to provide:

- 1) a reference manual of repeater **locations, frequencies** and other pertinent data for the United States, Canada, the Caribbean, Central and South America and Pacific islands under US jurisdiction.
- 2) information necessary to contact local frequency coordinators, and members of the ARRL VHF Repeater Advisory Committee, VHF/UHF Advisory Committee, and the Committee on Amateur Radio Digital Communications.
- 3) limited listings of packet digipeaters, bulletin boards, gateways and networks.
- 4) listings of propagation beacons.
- 5) a national listing of all ARRL Special Service Clubs, their meeting times and locations.

FOREWORD

Are you a newcomer to Amateur Radio? Welcome! New amateurs and oldtimers alike will find this handy, informative reference helpful in getting the most out of the exciting realm of amateur FM repeater operation.

This edition of the ARRL *Repeater Directory* contains more than 19,000 individual listings for the United States, Canada and other countries. Most of the entries are of FM voice repeaters, but there are also sections devoted to beacon and packet radio frequencies, interference tracking and suggestions for proper use of repeaters. Listings of area frequency coordinators and of key ARRL Advisory Committee members are included for your reference. A new feature this year is a map showing repeater channel spacings for the 144 MHz band throughout the country. This will help you spot differences in bandplans as you travel to different parts of the US.

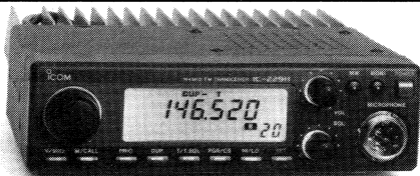

The information contained in this book is the culmination of many hours of work by devoted volunteer frequency coordinators, their assistants and ARRL staff who each year, must sort through hundreds of updates and changes to provide you with the most accurate and current information possible.

Many of this year's updates came by way of the on-line National Repeater Coordinator's Data Base. Housed in Newington, this data base provides regional coordinators access to one another's data in a centralized location, making coordination easier in areas where repeater coverages overlap.

If you have suggestions for improvements in the *Repeater Directory*, please complete and return the "Feedback" page located in the back of this publication. Some of the best features of this booklet resulted from such suggestions.

David Sumner, K1ZZ
Executive Vice President, ARRL

Newington, Connecticut

REPEATER OPERATING PRACTICES

1) Monitor the repeater to become familiar with any peculiarities in its operation.

2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself heard, but, generally, "This is W1AW monitoring" will suffice.

3) Identify legally; you must identify at the end of a transmission or series of transmissions *and* at least once each 10 minutes during the communication.

4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.

5) Keep transmissions short and thoughtful. Your monologue may prevent someone with an emergency from using the repeater. If your monologue is long enough, you may *time out* the repeater. Your transmissions are being heard by many listeners including nonhams with "public service band" monitors or scanners; don't give a bad impression of our service.

6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.

7) Use the minimum amount of power necessary to maintain communications. This FCC regulation [97.313(a)] minimizes the possibility of accessing distant repeaters on the same frequency.

8) Don't break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended primarily to facilitate

IC-2GAT

2-Meter Handheld

Powerful small package! Enjoy full base station operation right in your hand with today's most powerful handheld! Twenty memories store Tx offset frequencies and subaudible tones. Features programmable and memory scan functions, weather band reception capability and other numerous functions. An optional pocket beep function alerts you when selected calls are received.

mobile operation. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC forbids using an autopatch for anything that could be construed as business communications. Nor should an autopatch be used to avoid a toll call. Do not use an autopatch where regular telephone service is available. Autopatch privileges that are abused may be rescinded.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or group is responsible, and those who are regular users of a repeater should support the efforts of keeping the repeater on the air.

IC-2SAT

2-Meter Handheld

ICOM's IC-2SAT mini handheld delivers top performance on the 144 MHz band with super easy operation and a kaleidoscope of features. The IC-2SAT provides 2 watts of high output power with the internal battery and supplies a full 5 watts when powered via the optional BP-85 battery pack or 13 volts. A small rig with a big punch!

USER INFORMATION

This edition of the *Repeater Directory* has been revised except for the following areas: Alabama, Arizona, Connecticut (144), Louisiana, Minnesota and Utah. Except for several states and some foreign countries, all repeaters are listed according to the metropolitan areas or counties in which they are located.

Repeaters that are not in a metropolitan area are listed according to the geographical area or county within the state or province (eg, northeast, south central) in which they are located. Packet and special mode repeaters are not broken down by area.

Many private systems, including repeaters, remote base stations, control and link channels are in properly coordinated operation on authorized frequencies, but are not included within this directory. This is especially common on the 420-MHz band, which is frequently used for linking and/or remote control systems. Please consult your local frequency coordinator for recommendations of operating frequencies for new repeaters, remote bases or control/link channels.

With an increase in the number of reports of repeater-to-repeater interference, the FCC is placing more emphasis on repeaters being coordinated. Repeater coordination is an example of voluntary self-regulation within the Amateur Service. Noncoordinated repeater operation *may* imply nonconformance with locally recognized band plans (eg, an unusual frequency split) or simply that the repeater trustee has not yet applied for, or received "official" recognition from the frequency coordinator. Known noncoordinated repeaters are indicated in this directory with a pound (#) sign. This symbol does not indicate anything about the relative merit of a particular repeater.

The following is an explanation of the information included in each repeater listing.

here is the next generation Repeater

MARK 4CR The **only** repeaters and controllers with REAL SPEECH!

No other repeaters or controllers match Mark 4 in capability and features. That's why Mark 4 is the performance leader at amateur and commercial repeater sites around the world. Only Mark 4 gives you Message Master™ real speech • voice readout of received signal strength, deviation, and frequency error • 4-channel receiver voting • clock time announcements and function control • 7-helical filter receiver • extensive phone patch functions. Unlike others, Mark 4 even includes power supply and a handsome cabinet.

2 Meters
220
and 440

Create messages just by talking. Speak any phrases or words in any languages or dialect and *your own voice* is stored instantly in solid-state memory. Perfect for emergency warnings, club news bulletins, and DX alerts. Create unique ID and tail messages, and the ultimate in a real speech user mailbox — only with a Mark 4.

Call or write for specifications on the repeater, controller, and receiver winners.

MICRO CONTROL SPECIALTIES

Division of Kendecom Inc.

23 Elm Park, Groveland, MA 01834

(508) 372-3442

FAX: 508-373-7304

Location: The geographical location of the repeater.

A pound sign (#) indicates that coordination or sanction has not been issued.

Output: The output frequency in megahertz.

Input: The frequency offset (difference between input and output) either plus (+) or minus (-). The standard offsets, by band, are: 29 MHz (100 kHz); 52 MHz (1.0 MHz); 144 MHz (600 kHz); 220 MHz (1.6 MHz); 450 MHz (5.0 MHz); 902 MHz (12.0 MHz); and 1240 MHz (12.0 MHz). Repeaters which do not utilize the ARRL recommended standard offsets will show the entire input frequency in megahertz.

Call: The call sign of the repeater.

Notes: How the repeater may be accessed and other specialized features are indicated by the following abbreviations:

Access*:

o—open, usually carrier-operated

b — burst

BI—Bi-lingual

c—closed private repeater

CTCSS—sub-audible tone

RB—Remote Base

SNP—Shared nonprotected pair

In the areas of Western Washington, British Columbia and Oregon exists repeater frequencies identified as SNP. SNP frequencies are intended to provide spectrum for experimental repeaters, emergency or search-and-rescue operations, portable public service systems, site evaluation, a holding place for those awaiting coordination and a place for those who wish to have their own "garage" repeaters.

Users of SNP frequencies do so under the following guidelines: 1) The frequencies are shared by all users; 2) Operators of repeaters using SNP frequencies receive no protection from other co-channel users; 3) All systems

**AND NOW

use CTCSS or other suitable, approved method of limited access; and 4) The coordination organization shall coordinate the CTCSS tones.

Users coming into the Pacific Northwest will find a variety of systems on SNP frequencies; thus, a listing of them is not practical.

t—Touch-Tone™

w—whistle

x—wide-area coverage

Specialized features:

a—autopatch

(ca)—closed private autopatch; may be used with authorization

DS—Dual squelch

e-Sun—Solar power

e—emergency power

l—link and/or crossband

p—portable

r—RACES affiliated

y—RTTY/ASCII

z—direct access to law enforcement (usually 911)

Wx—weather net

Exp—Experimental

pkt—data exchange capability

Specialized PACKET features:

d—Digipeater

g—Gateway

k—Kantronics KA-node

m—Message storage (BBS)

n—Network (high-level protocol), NET/ROM, TheNET and TexNET

Sponsor: The sponsor of the repeater. A plus (+) sign at the beginning of a call sign indicates that the repeater call is part of the sponsor.

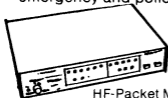

*The standard EIA frequency codes are listed on page 48.

HENRY RADIO IS THE PLACE to fill all your data communications needs

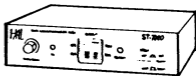

The TEMPO MMP 1

... a unique new mobile data printer, includes a packet controller and a 13.6 VDC printer that interfaces with any mobile radio. In a recent user test it proved to have about twice as much audio level range tolerance as other TNCs. It is also an ideal unit for emergency work and a commercial version is perfect for dispatching service, emergency and police vehicles.

HAL Communications' ST-7000

HF-Packet Modem... a high performance modem designed specifically for 300 baud HF-Packet. It offers no-compromise performance to assure optimum operation under the most demanding signal conditions.

The PK-232 by AEA

...the only controller offering Morse Code, Baudot, ASCII, AMTOR, Packet, and facsimile Transmission & Reception plus the ability to monitor the new Navtex marine weather and navigational system
...7 modes in one controller.

If you have any questions concerning these units, or would like to discuss your requirements with a knowledgeable specialist, please call and ask for George Sanso, AB6A. We also carry a large selection of excellent commercial products for data communications and emergency systems as well as a complete inventory of amateur equipment and linear power amplifiers.

USERS' GUIDE TO THE REPEATER DIRECTORY

Before using any repeater, new users may wish to review the section on REPEATER OPERATING PRACTICES.

Many codes are used in the repeater listings. For an explanation of these, see the USER INFORMATION section.

New users of repeaters should be aware of their transmit frequency or offset. Transmitting on the wrong offset may interfere with other amateur operators or, more seriously, may be out of band and interfere with other radio services. If you have any questions regarding the operation of your equipment, your owners manual or more experienced operators should be able to help.

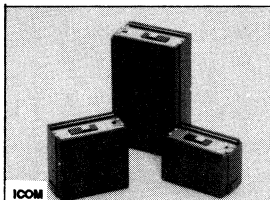

FM is only one of many modes available to Novices and Code-Free Technicians*. For further information on other modes of operation or license limitations, refer to *The FCC Rule Book*, one of the many helpful League publications.

The 1.25-meter (222.1-223.91 MHz) Novice band plan, simplex frequencies and repeater frequencies can be found on the following page entitled USER GUIDE TO THE 1.25-METER AND 23-CM NOVICE BANDS.

The 23-cm (1270-1295 MHz) Novice band plan can be found on the following page, entitled USER GUIDE TO THE 1.25-METER AND 23-CM NOVICE BANDS.

*Code-Free Technician VHF/UHF bandplans are the same as regular Technician bandplans.

A USER GUIDE TO THE 1.25-METER AND 23-CM NOVICE BANDS

222.10-223.91 MHz (1.25-meters)

Many repeater and simplex frequencies in this band are now available to Novices.

Here's where to look for simplex FM voice activity in the 1.25 meter Novice subband. Frequencies are in MHz:

223.42	223.56	223.68	223.80
223.44	223.58	223.70	223.82
223.46	223.60	223.72	223.84
223.48	223.62	223.74	223.86
223.50*	223.64	223.76	223.88
223.52	223.66	223.78	223.90
223.54			

*National simplex frequency

Novices will want to check out the following frequency pairs for 1.25-meter repeaters in their area.

Frequencies are (input/output) in MHz:

222.32/223.92	222.68/224.28	223.04/224.64
222.34/223.94	222.70/224.30	223.06/224.66
222.36/223.96	222.72/224.32	223.08/224.68
222.38/223.98	222.74/224.34	223.10/224.70
222.40/224.00	222.76/224.36	223.12/224.72

Demand More. Demand Kepro.

Innovation. Invention. Industry leadership. Few companies in the electronics industry exemplify those qualities as well as Kepro Circuit Systems, Inc.

For your needs in prototyping and short-run production of printed circuit boards, you can turn to Kepro for:

- Equipment
- Copper Clad Laminates
- Chemicals
- Art and Graphic Supplies
- CAD Software
- PC Kits
- Nameplate Materials
- Plotting, Digitizing
and Drilling Services

When you need to demand more, demand Kepro. For our catalog of products and services, call or write:

BAND PLANS

The ARRL supports regional frequency coordination efforts by amateur groups. Band plans published in the ARRL *Repeater Directory* are recommendations based on a consensus as to good amateur operating practice on a nationwide basis. In some cases, however, local conditions may dictate a variation from the national band plan. In these cases, the written determination of the regional frequency coordinating body shall prevail and be considered good amateur operating practice in that region.

When considering frequencies for use in conjunction with a repeater, be *sure* that both the input and output fall within subbands authorized for repeater use, and do not extend past the subband edges. FCC regulation 97.205(b) defines frequencies which are currently available for repeater use.

For example, a 2-meter repeater on exactly 145.50 MHz would be "out-of-band," as the deviation will put the signal outside of the authorized band segment.

Packet-radio operations under automatic control should be guided by Section 97.109(d) of the FCC rules.

29.300-29.700 MHz

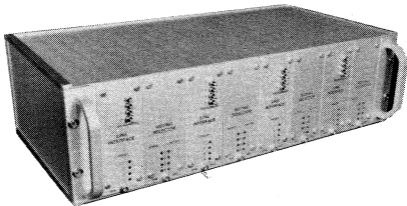

29.300-29.500	Amateur Radio Satellites
29.520-29.580	Repeater inputs
29.600	Simplex calling frequency
29.620-29.680	Repeater outputs

Repeater frequency pairs
(input/output):

29.520/29.620	29.560/29.660
29.540/29.640	29.580/29.680

51-54 MHz

The following band plan was adopted by the ARRL Board of Directors April 1983 meeting.

50.000-50.100	CW and Beacons:
50.060-50.080	Automatically controlled Beacons
50.100-50.600 ¹	SSB and AM:
50.110	SSB DX calling frequency
50.200	SSB National calling frequency (Note: Suggest QSY up for local and down for long distance QSOs)
50.400	AM calling frequency
50.600-51.000	Experimental and Special Modes:
50.700	RTTY Calling Frequency
50.800-50.980	Radio Control (R/C), ten channels on 20 kHz raster.
51.000-51.100	Pacific DX Window
51.100-52.000	FM Simplex
52.000-52.050	Pacific DX Window
51.000-54.000	FM Repeater and Simplex

Repeater frequency pairs (input/output):

52.010/53.010	52.330/53.330	52.710/53.710
52.030/53.030	52.350/53.350	52.730/53.730
52.050/53.050	52.370/53.370	52.750/53.750
52.070/53.070	52.390/53.390	52.770/53.770
52.090/53.090	52.410/53.410	52.790/53.790
52.110/53.110	52.430/53.430	52.810/53.810
52.130/53.130	52.450/53.450	52.830/53.830
52.150/53.150	52.470/53.470	52.850/53.850
52.170/53.170	52.550/53.550	52.870/53.870
52.190/53.190	52.570/53.570	52.890/53.890
52.210/53.210	52.590/53.590	52.910/53.910
52.230/53.230	52.610/53.610	52.930/53.930
52.250/53.250	52.630/53.630	52.950/53.950
52.270/53.270	52.650/53.650	52.970/53.970
52.290/53.290	52.670/53.670	52.990/53.990
52.310/53.310	52.690/53.690	

Simplex frequencies: 52.490 52.510 52.525*

*National Simplex Frequency

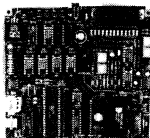

¹*Proposed: 50.1-50.125 MHz DX window

(305) 978-6171

Note: The subband 50.1-50.125 MHz has been gaining popular acceptance as an international DX window. It is recommended that domestic QSOs be conducted outside of this frequency range.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

1) National packet simplex frequency: 51.70

2) Duplex pairs to consider for local coordination for uses such as repeaters and meteor scatter:

50.62-51.62	50.68-51.68	50.76-51.76
50.64-51.64	50.72-51.72	50.78-51.78
50.66-51.66	50.74-51.74	

Note: Where duplex packet-radio stations are to be co-sited with voice repeaters, use high-in, low-out to provide maximum frequency separation from low-in high-out voice repeaters.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

144-148 MHz

The following band plan has been proposed by the ARRL VHF-UHF Advisory Committee.

144.00-144.05	EME (CW)
144.05-144.06 ¹	Propagation beacons
144.06-144.10	General CW and weak signals
144.10-144.20	EME and weak signal SSB
144.20	National calling frequency
144.20-144.30	General SSB operation
144.30-144.50	New OSCAR sub-band
144.50-144.60	Linear translator inputs
144.60-144.90	FM repeater inputs
144.90-145.10	Weak signal and FM simplex
145.10-145.20	Linear translator outputs
145.10-145.50	FM repeater outputs
145.50-145.80	Miscellaneous and experimental modes
145.80-146.00	OSCAR sub-band
146.01-146.37**	Repeater inputs
146.40-146.58**	Simplex
146.61-147.39	Repeater outputs
147.42-147.57	Simplex
147.60-147.99	Repeater inputs

**The frequency 146.40 MHz is used in some areas as a repeater input.

¹The FCC has amended the amateur service rules regarding beacon operation. The new beacon subband is 144.275-144.300. Amateurs are encouraged to conduct an orderly transition to the new subband.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

1) Automatic/unattended operations should be conducted on 145.01, 145.03, 145.05, 145.07 and 145.09 MHz.

a) 145.01 should be reserved for inter-LAN use.

b) Use of the remaining frequencies (above) should be determined by local user groups.

2) Additional frequencies within the 2-meter band may be designated for packet-radio use by local coordinators.

Packet Footnotes

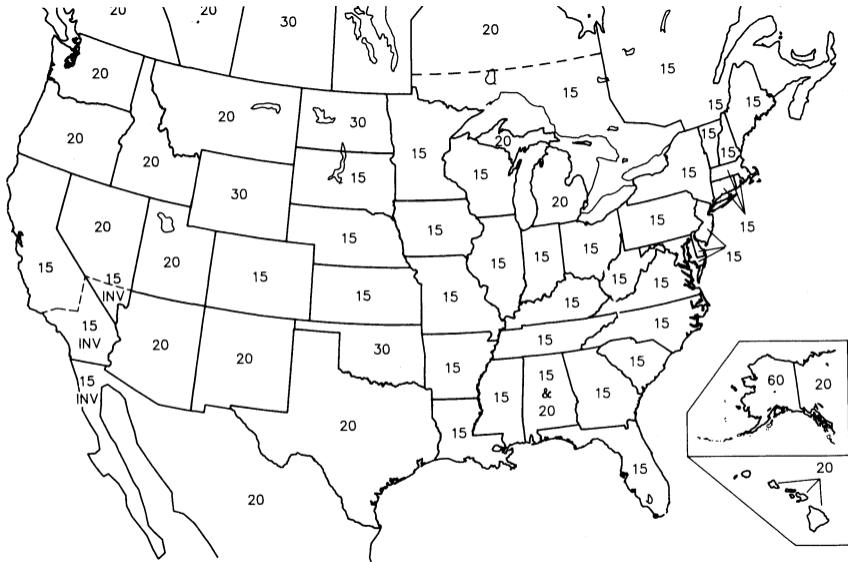

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Repeater frequency pairs (input/output):

144.51/145.11	146.07/146.67
144.53/145.13	146.10/146.70
144.55/145.15	146.13/146.73
144.57/145.17	146.16/146.76
144.59/145.19	146.19/146.79
144.61/145.21	146.22/146.82
144.63/145.23	146.25/146.85
144.65/145.25	146.28/146.88
144.67/145.27	146.31/146.91
144.69/145.29	146.34/146.94
144.71/145.31	146.37/146.97
144.73/145.33	146.40 or 147.60/147.00*
144.75/145.35	146.43 or 147.63/147.03*
144.77/145.37	146.46 or 147.66/147.06*
144.79/145.39	147.69/147.09
144.81/145.41	147.72/147.12
144.83/145.43	147.75/147.15
144.85/145.45	147.78/147.18
144.87/145.47	147.81/147.21
144.89/145.49	147.84/147.24
146.01/146.61	147.87/147.27
146.04/146.64	147.90/147.30
	147.93/147.33
	147.96/147.36
*local option	147.99/147.39

Some areas use 146.40-146.60 and 147.40-147.60 MHz for either simplex or repeater inputs and outputs. Frequency pairs in those areas are:

147.415/146.415	147.46/146.46	147.505/146.505
147.43/146.43	147.475/146.475	147.595/146.595
147.445/146.445	147.49/146.49	

Suggested 15-kHz splinter channels (input/output):

146.025/146.625	146.295/146.895	147.735/147.135
146.055/146.655	146.325/146.925	147.765/147.165
146.085/146.685	146.355/146.955	147.795/147.195
146.115/146.715	146.385/146.985	147.825/147.225
146.145/146.745	147.615/147.015	147.855/147.255
146.175/146.775	147.645/147.045	147.885/147.285
146.205/146.805	147.675/147.075	147.915/147.315
146.235/146.835	147.705/147.105	147.945/147.345
146.265/146.865		147.975/147.375

Simplex frequencies:

*146.415	*146.49	146.565	147.45	147.525
*146.43	*146.505	146.58	147.465	147.54
*146.445	#146.52	146.595	147.48	147.555
*146.46	146.535	147.42	147.495	147.57
*146.475	146.55	147.435	147.51	147.585

#National Simplex Frequency

*May also be a repeater (input/output). See repeater pairs listing.

Several states have chosen to realign the 146-148 MHz band, using 20-kHz spacing between channels. See page 33 for map.

The transition from 30- to 20-kHz spacing is taking place on a case by case basis. Typically the repeater on an *odd* numbered pair (eg, 146.13/.73) will move 10-kHz, up or down, creating a new even numbered channel. Therefore, the pair of 146.13/.73 would change to 146.12/.72 or 146.14/.74 while the pairs of 146.10/.70 and 146.16/.76 would be left unchanged.

220-225 MHz

The following band plan is currently under review by the ARRL VHF-UHF Advisory Committee.

220.00-220.05	EME (Earth-Moon-Earth)
220.05-220.06	Propagation beacons
220.06-220.10	Weak signal CW
220.10	Calling frequency
220.10-220.50	General weak signal, rag chewing and experimental communications
220.50-221.90	Experimental and control links
221.90-222.00	Weak signal guard band
222.00-222.05	EME
222.05-222.06	Propagation beacons
222.06-222.10	Weak signal CW
222.10	Calling frequency
222.10-222.30	General operation CW or SSB, etc.
222.34-223.38	Repeater inputs
223.34-223.90	Simplex and repeater outputs (local option)
223.94-224.98	Repeater outputs

The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

1) 100-kHz-bandwidth channels:

220.55	220.85
220.65	220.95
220.75	

2) 20-kHz-bandwidth channels:

221.01	221.07
221.03	221.09
221.05	223.40 National packet simplex calling

Candidate packet simplex channels shared with FM voice simplex. Check with your local frequency coordinator prior to use. Those channels are:

223.42	223.46
223.44	223.48

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US:

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Simplex frequencies:

223.42	223.52	223.62	223.72	223.82
223.44	223.54	223.64	223.74	223.84
223.46	223.56	223.66	223.76	223.86
223.48	223.58	223.68	223.78	223.88
223.50*	223.60	223.70	223.80	223.90

*National simplex frequency

Repeater frequency pairs (input/output):

222.32/223.92	222.68/224.28	223.04/224.64
222.34/223.94	222.70/224.30	223.06/224.66
222.36/223.96	222.72/224.32	223.08/224.68
222.38/223.98	222.74/224.34	223.10/224.70
222.40/224.00	222.76/224.36	223.12/224.72
222.42/224.02	222.78/224.38	223.14/224.74
222.44/224.04	222.80/224.40	223.16/224.76
222.46/224.06	222.82/224.42	223.18/224.78
222.48/224.08	222.84/224.44	223.20/224.80
222.50/224.10	222.86/224.46	223.22/224.82
222.52/224.12	222.88/224.48	223.24/224.84
222.54/224.14	222.90/224.50	223.26/224.86
222.56/224.16	222.92/224.52	223.28/224.88
222.58/224.18	222.94/224.54	223.30/224.90
222.60/224.20	222.96/224.56	223.32/224.92
222.62/224.22	222.98/224.58	223.34/224.94
222.64/224.24	223.00/224.60	223.36/224.96
222.66/224.26	223.02/224.62	223.38/224.98

420-450 MHz

The following band plan is currently under review by the ARRL VHF-UHF Advisory Committee.

420.00-426.00	ATV repeater or simplex with 421.25 MHz video carrier, control links and experimental
426.00-432.00	ATV simplex with 427.250 MHz video carrier frequency
432.00-432.070	EME (Earth-Moon-Earth)
432.07-432.08 ¹	Propagation beacons
432.08-432.10	Weak signal CW
432.100	70-cm calling frequency
432.10-432.125	Mixed mode and weak signal work
432.125-432.175	OSCAR inputs
432.175-433.00	Mixed mode and weak signals
433.00-435.00	Auxiliary/repeater links
435.00-438.00	Satellite only (Internationally)
438.00-444.00	ATV repeater input with 439.250 MHz video carrier frequency and repeater links
442.00-445.00	Repeater inputs and outputs (local option)
445.00-447.00	Shared by auxiliary and control links, repeaters and simplex (local option)
446.0	National Simplex Frequency
447.00-450.00	Repeater inputs and outputs (local option)

¹The FCC has amended the amateur service rules regarding beacon operation. The new beacon subband is 432.3-432.4. Amateurs are encouraged to conduct an orderly transition to the new subband.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) 100-kHz-bandwidth channels:

430.05	430.35	430.65
430.15	430.45	430.85
430.25	430.55	430.95

2) 25-kHz-bandwidth channels:

431.025	441.000	441.050
440.975	441.025	441.075

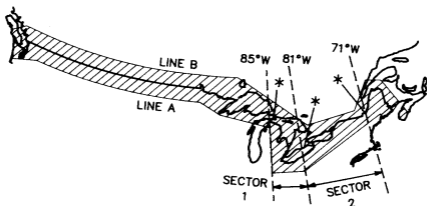

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Line A Restrictions:

The band is shared by amateurs with Government Radio location services (RADAR); amateurs must not interfere with these priority Government stations. As part of WARC-79 proceedings, the 420-430 MHz portion of the band was removed from the Amateur Radio Service north of Line A (see figure).

In a later action, FCC allocated portions of the band 421-430 MHz to the Land Mobile Service within 50-mile radii centered on Buffalo, Detroit and Cleveland. Amateur stations south of Line A in the vicinities of these cities may continue to operate in the 421-430 MHz spectrum as long as they do not cause interference to land mobile or government radio-location users. Additionally, 50-watt PEP output power limitations apply to certain amateurs operating within circles of designated military installations in the US. [See §97.313(F)(G)]

Repeater frequency pairs (output/input is local option):

442.000/447.000	443.000/448.000	444.000/449.000

442.950/447.950	443.950/448.950	444.950/449.950
442.975/447.975	443.975/448.975	444.975/449.975

902-928 MHz⁽¹⁾

The following interim band plan was adopted at the ARRL Board of Directors meeting in October 1984, and amended by the EC in October, 1989.

<i>Segment</i>	<i>Use</i>	<i>Footnotes</i>
902-904 MHz	Narrow bandwidth, weak signal communications	
902.0-902.8	SSTV, Fax, ACSSB, experimental	
902.3-902.4	Propagation beacons	
902.8-903.0	Reserved for EME, CW expansion	
903.0-903.05	EME exclusive	
903.1	CW, SSB calling frequency	
903.4-903.6	Crossband Linear Translator inputs	
903.6-903.8	Crossband Linear Translator outputs	
903.8-904.0	Experimental beacons exclusive	
904-906	Digital Communications	(2,8)
906-907	Narrow bandwidth FM simplex services, 25 kHz channels	(6)
906.50	National simplex frequency	
907-910	FM repeater inputs, paired with 919-922 MHz; 119 pairs every 25 kHz, eg 907.025, 050, 075, etc.	(2,4)
910-916	ATV	(2,3)
916-918	Digital Communications	(2,8)
918-919	Narrow bandwidth, FM control links and remote bases	
919-922	FM repeater outputs, paired with 907-910 MHz	(2,4)
922-928	Wide bandwidth experimental, simplex ATV, Spread Spectrum	(5,7)

Note: The ARRL Board, in July 1988, voted to change the beacon subband in this band plan. Amateurs are encouraged to conduct an orderly transition to the new subband.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988 as interim guidance.

Two 3-MHz-bandwidth channels are recommended for 1.5 Mbit/s links. They are 903-906 MHz and 914-917 MHz with 10.7-MHz spacing.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US. These channels may interfere with existing weak-signal communications operating on or about 903.100 MHz.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Canadian amateurs note: The amateur service will continue to have secondary status in the band 902-928 MHz throughout Canada, using any of the following emissions: N0N, A1A, A2A, A3C, A3E, C3F, F1A, F2A, F2B, F1C, F3E.

Before operating in this band, Canadian amateur licensees are required to consult with their DOC District Office to ensure interference will not be caused to other services operating in the area as per Section 45 of the General Radio Regulations Part II, given in TRC 25.

Government of Canada shipborne radiolocation service is permitted within 150 km of the East and West Coasts, Arctic Ocean, Hudson Bay, James Bay and up the St Lawrence River as far as Rimourski on precoordinated channels in the 902-928 MHz band.

Footnotes

- 1) Extracts of FCC Rules & Regulations, 97.303(G)(1). No amateur station shall transmit from within the States of Colorado and Wyoming, bounded on the south by latitude 39°N, on the north by latitude 42°N, on the east by longitude 105°W, and on the west by longitude 108°W. This band is allocated on a secondary basis to the amateur service subject to not causing harmful interference to, and not receiving protection from any interference due to the operation of, industrial, scientific and medical devices, automatic vehicle monitoring systems or Government stations authorized in this band.
- 2) Coordinated frequency assignments required.
- 3) ATV assignments should be made according to modulation type, eg VSB-ATV, SSB-ATV or combinations. Coordination of multiple uses of a single channel in a local area can be achieved through isolation by means of cross-polarization and directional antennas.
- 4) Coordinated assignments at 100 kHz until allocations are filled, then assign 50 kHz until allocations are filled, before assigning 25-kHz channels.
- 5) Simplex services only; permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.
- 6) Voice and nonvoice operation.
- 7) Spread-spectrum requires FCC authorization.
- 8) Consult FCC (97.307) for allowable data rates and bandwidths.

1240-1300 MHz

The following band plan was adopted by the ARRL Board of Directors meeting in January 1985.

<i>Segment</i>	<i>Use</i>	<i>Footnotes</i>
1240-1246	ATV #1	(2,3)
1246-1248	Narrow-bandwidth FM point-to-point links and digital, duplex with 1258-1260	(2)
1248-1252	Digital Communications	(2,8,9)
1252-1258	ATV #2	(2,3)

1258-1260	Narrow-bandwidth FM point-to-point links and digital, duplexed with 1246-1252	(2)
1260-1270	Satellite uplinks, reference WARC 1979	
1260-1270	Wide-bandwidth experimental, simplex ATV	(5,6)
1270-1276	Repeater inputs, FM and linear, paired with 1282-1288, 239 pairs every 25 kHz, eg, 1270.025, .050, .075, etc. 1271.0-1283.0 uncoordinated test pair	(2,4,9,10)
1276-1282	ATV #3	(2,3)
1282-1288	Repeater outputs, paired with 1270-1276	(2,4,9,10)
1288-1294	Wide-bandwidth experimental, simplex ATV	(6)
1294-1295	Narrow-bandwidth FM simplex services, 25-kHz channels	(7)
1294.5	National FM simplex calling frequency	
1295-1297	Narrow bandwidth weak-signal communications (no FM)	
1295.0-1295.8	SSTV, FAX, ACSB, experimental	
1295.8-1296.0	Reserved for EME, CW expansion	
1296.0-1296.05	EME-exclusive	
<i>Segment</i>	<i>Use</i>	<i>Footnotes</i>
1296.1	CW, SSB calling frequency	
1296.3-1296.4	Propagation beacons	
1296.4-1296.6	Crossband linear translator input	
1296.6-1296.8	Crossband linear translator output	
1296.8-1297.0	Experimental beacons (exclusive)	
1297-1300	Digital Communications	

Note: The ARRL Board, in July 1988, voted to change the beacon subband in this band plan. Amateurs are encouraged to conduct an orderly transition to the new subband.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) 2-MHz-bandwidth channels at:

1249.00 1251.00 1298.00

2) 100-kHz-bandwidth channels:

1299.05 1299.45 1299.75

1299.15 1299.55 1299.85

1299.25 1299.65 1299.95

1299.35

3) 25-kHz-bandwidth channels:

1294.025 1294.125

1294.050 1294.150

1294.075 1294.175

1294.100 National packet simplex calling

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Footnotes

1) Deleted

2) Coordinated assignments required.

3) ATV assignments should be made according to modulation type (for example, VSB-ATV, SSB-ATV or combinations). Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross polarization and directional antennas. DSB ATV may be used, but only when local and regional activity levels permit. The excess bandwidths from such users are secondary to the assigned services.

4) Coordinate assignments with 100-kHz channels, beginning at the lower end of the segment until allocations are filled, then assign 50-kHz channels until allocations are filled before assigning 25-kHz channels.

- 5) Wide bandwidth experimental users are secondary to the satellite service and may be displaced upon the installation of any new satellites. Users are EIRP-limited to the noise floor of the satellites in service and may suffer interference from satellite uplinks.
- 6) Simplex services only; permanent users shall not be coordinated in this segment. High-altitude repeaters or other unattended fixed operations are not permitted.
- 7) Voice and nonvoice operations.
- 8) Consult 47 CFR 97.307 (FCC regulations) for allowable data rates and bandwidths.
- 9) Provide guard bands at the higher frequency end of segments, as required, to avoid interference to ATV.
- 10) 1274.0-1274.2 and 1286.0-1286.2 MHz are optionally reserved for contiguous Linear Translators supporting multiple narrow bandwidth users. These may also be duplexed with other noncoordinated band segments.

2300-2310 and 2390-2450 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

2304.3-2304.4 Propagation beacons

3300-3500 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

3456.3-3456.4 Propagation beacons

5650-5925 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

5760.3-5760.4 Propagation beacons

10.000-10.500 GHz

The following subband recommendation was adopted by the ARRL Board of Directors in January 1987.

10.368 GHz Narrow-band calling frequency

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

10368.3-10368.4 MHz Propagation beacons

ITU Region 1 (Europe and Africa) 144-146 MHz Band Plan

144.00-144.01	EME
144.05	CW calling, once contact has been established move off frequency
144.10	CW random meteor scatter
144.15	upper limit CW exclusive
144.20	SSB random meteor scatter
144.30	SSB calling, once contact has been established move off frequency
144.40	SSB meteor scatter reference frequency
144.50	SSTV calling, Upper limit of CW/SSB exclusive
144.60	RTTY calling
144.675	Data transmission calling frequency
144.70	FAX calling
144.845-144.990	Beacon exclusive
145.00-145.175	Repeater inputs R0 to R7
145.20-145.575	Channelized FM Simplex
145.50	FM calling frequency, once contact has been established move off frequency
145.60-145.775	Repeater outputs R0 to R7
145.80-146.00	Space communications, CW/SSB uplink only

Repeater channels (input/output)

R0	145.000/145.600
R1	145.025/145.625
R2	145.050/145.650
R3	145.075/145.675
R4	145.100/145.700
R5	145.125/145.725
R6	145.150/145.750
R7	145.175/145.775

Packet frequencies most widely used are:

144.650 144.675 432.675

Simplex Channels

S10	145.25	S19	145.475
S11	145.275	S20	145.50
S12	145.30		Most common simplex
S13	145.325		calling frequency, once
S14	145.35		contact has been estab-
S15	145.375	S21	145.525
S16	145.40	S22	145.55
S17	145.425	S23	145.575
S18	145.45		lished move off frequency

UK repeaters require a 1750-Hz (± 25 -Hz) tone burst of about 200-ms duration to open the repeater. It is best to transmit this tone at the start of each transmission. Belgian repeaters require a 3-second tone burst. Swiss repeaters require an 1800-Hz tone burst.

Note! Several French repeaters are on nonstandard frequency pairs. Those pairs are:

144.725/145.325	144.825/145.425
144.750/145.350	144.850/145.450
144.800/145.400	144.875/145.475

CTCSS (PL) TONE FREQUENCIES

The purpose of CTCSS (PL)[™] is to reduce co-channel interference during band openings. CTCSS (PL)[™] equipped repeaters would respond only to signals having the CTCSS tone required for that repeater. These repeaters would not respond to weak distant signals on their inputs and correspondingly not transmit and repeat to add to the congestion.

The standard Electronic Industries Association (EIA) frequency codes, in hertz, with their Motorola alphanumeric designators, are as follows:

67.0—XZ	97.4—ZB	141.3—4A	206.5—8Z
69.3—WZ	100.0—1Z	146.2—4B	210.7—M2
71.9—XA	103.5—1A	151.4—5Z	218.1—M3
74.4—WA	107.2—1B	156.7—5A	225.7—M4
77.0—XB	110.9—2Z	162.2—5B	229.1—9Z
79.7—WB	114.8—2A	167.9—6Z	233.6—M5
82.5—YZ	118.8—2B	173.8—6A	241.8—M6
85.4—YA	123.0—3Z	179.9—6B	250.3—M7
88.5—YB	127.3—3A	186.2—7Z	254.1—ØZ
91.5—ZZ	131.8—3B	192.8—7A	
94.8—ZA	136.5—4Z	203.5—M1	

During 1980 the ARRL Board of Directors adopted the 10-meter CTCSS (PL)[™] tone-controlled squelch frequencies listed below for voluntary incorporation into 10-meter repeater systems to provide a uniform national system.

<i>Call Area</i>	<i>Tone 1</i>	<i>Tone 2</i>
W1	131.8 Hz-3B	91.5 Hz-ZZ
W2	136.5 -4Z	94.8 -ZA
W3	141.3 -4A	97.4 -ZB

ARRL VHF REPEATER ADVISORY COMMITTEE (VRAC)

The ARRL Board of Directors created the VRAC as an advisory group organized to provide a greater opportunity for members to express their ideas and opinions in regard to VHF and UHF repeater operation.

Currently, the VRAC consists of 16 members, each of whom represents one of the ARRL Divisions. The VRAC members are appointed to the committee by the appropriate Division Director. At this writing, the composition of the committee is as follows:

ATLANTIC DIVISION

Willem Van Aller, K3CZ
7623 Old Washington Road
Woodbine, MD 21797

CENTRAL DIVISION

Kermit Carlson, W9XA
36 W 345 McKee Rd
Batavia, IL 60510

DAKOTA DIVISION

Eric Foss, KDØZ
4615 Oakview Lane North
Plymouth, MN 55442

DELTA DIVISION

Nita Wofford, N4DON
2966 Cordell
Memphis, TN 4971

GREAT LAKES DIVISION

George Waldie, W8JRL
118 N Vine St
Mt Gilead, OH 43338

HUDSON DIVISION

Phil Bradway, KB2HQ
1119 Hedgewood Lane
Schenectady, NY 12309

MIDWEST DIVISION

Al H. Groff, KØVM
1446 Council Street
Cedar Rapids, IA 52402

NEW ENGLAND DIVISION

Mitch Stern, WB2JSJ
14 Kimberly Dr
Essex Junction, VT 05452

NORTHWESTERN DIVISION

Clay Freinwald, K7CR
32521 107th Ave SW
Auburn, WA 98002

PACIFIC DIVISION

William L. Walters, WA2IBM
6248 Meridian Ave
San Jose, CA 95120

ROANOKE DIVISION

A. Carter Cogle, K4ARO
1667 Varina Ave
Petersburg, VA 23805

ROCKY MOUNTAIN DIVISION

Robert Q. Fugate, W8GY
8820 Delamar Avenue, NE
Albuquerque, NM 87111

SOUTHEASTERN DIVISION

David L. Shiplett, WL7ACY
107 Mossy Lake Road
Perry, GA 31069

SOUTHWESTERN DIVISION

*Karl Pagel, N6BVU
PO Box 6080
Anaheim, CA 92816-6080

ARRL VHF-UHF ADVISORY COMMITTEE (VUAC)

In order that optimum VHF and UHF spectrum use can be better defined, the VUAC considers all suggestions for band plan revisions, not just those dealing with repeaters.

The members of the VUAC prepare recommendations to the ARRL Board of Directors concerning VHF and UHF frequency use. The recommendations are based upon consultation with segments of the membership and studies conducted by the committee.

As this is written, the VUAC members are:

ATLANTIC DIVISION

Robert Bennett, W3WCQ
1006 Green Acre Rd
Towson, MD 21204

CENTRAL DIVISION

Joseph Schroeder, W9JUV

The ARRL Committee on Amateur Radio Digital Communication

The ARRL Board of Directors created the Committee on Amateur Radio Digital Communications in an effort to provide a greater opportunity for members to express their ideas and opinions in regard to technical standards and digital frequency allocations and band planing. Currently, the Committee on Amateur Radio Digital Communications consists of members appointed by the ARRL President. At this writing, the composition of the committee is as follows:

**Paul L. Rinaldo, W4RI
ARRL
225 Main Street
Newington, CT 06111

†Frank M. Butler, Jr, W4RH
323 Elliot Rd SE
Fort Walton Beach, FL 32548

Frederick, MD 21701

*Correspondence to this committee may be sent to ARRL HQ, ATTN: Digital Committee, 225 Main St, Newington, CT 06111.

Repeater Registration

Repeater registration is a necessity due to the many changes that may be made to a repeater system during a given period. In some cases only a change in a specialized feature has occurred. However, in many cases the change has been much more serious such as a change of location, frequency, or call sign. In all cases, these are changes that your coordinator and the *Repeater Directory* need to be made aware of.

With the implementation of the National Repeater Data Base, it will still be necessary for repeater owners/trustee's to continue to register their repeaters, however, **all registration will now be handled through the frequency coordinator for your area** (a complete list of coordinators is shown here and on the following pages). If a coordination body does *not* exist in your area, then please send your registration to the ARRL HQ, to the attention of the *Repeater Directory*.

Three (3) tear-out registration forms have been provided for your convenience, and are located in the back of this directory.

Listings

Listings in this *Repeater Directory* have been provided by your area frequency coordinator.

Listings provided by member states of the Mid-America Coordination Council, Inc, are Copyright 1990 and are published by permission.

Listings provided by member states of the Southeastern Repeater Association, Inc are Copyright 1990 and are published by permission.

In exceptional cases, where frequency coordinators do not exist, listings have been obtained by the best source available to the *Repeater Directory*. Foreign listings for the Pacific, South America, Central America, Caribbean Islands and North America (excluding US States who have active Frequency Coordinators) are invited for future editions. Many foreign listings in this issue were supplied by IARU Societies.

Southern California 220 MHz listings are provided by the 220 SMA. Questions should be addressed to Karl Pagel, N6BVU, PO Box 6490, Orange, CA 92613-6490.

The listings are believed to be accurate, but no guarantee of accuracy is made or implied. The listing of a repeater in the *Repeater Directory* does not imply that the repeater has any greater legal status than other amateur stations.

Frequency Coordinators

The ARRL is not a frequency coordinator, nor does the ARRL certify coordinators. Coordinators are volunteers normally appointed by a coordinating body. The *Repeater Directory* reports only the fact of coordination or non-coordination as instructed by the coordinating body. Publication in the *Repeater Directory* does not constitute nor imply endorsement or recognition of the authority of such coordinators as coordinators derive their authority from the voluntary participation of the entire amateur community in the areas they serve.

In some cases the person or group listed only compiles information for listings in the *RD*. In other cases the listed individual or group offers guidance but not coordination.

Frequency coordinators keep extensive records of repeater input, output, and control frequencies, including those not published in directories (at the owner's request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex operations. Therefore, anyone considering the installation of a repeater should check with the local frequency coordinator.

The following is a listing of groups or individuals for the United States and Canada who are active in frequency coordination and are acknowledged, by virtue of the recognition accorded them by the entire amateur community, as the sole frequency coordinators in their respective jurisdictions:

GREETINGS FROM LIMARC THE LONG ISLAND MOBILE AMATEUR RADIO CLUB, INC.

Celebrating our 26th Year

LIMARC is an ARRL Affiliated Radio Club, and a Special Service Club, a member of AMSAT, the Tri-State Amateur Repeater Council, and the Hudson Amateur Radio Council. Membership is over 500.

We are a not-for-profit organization dedicated to the advancement of Amateur Radio, community public service and assistance to fellow Hams in need.

LIMARC sponsors many services including the following Repeater Stations:

W2VL	146.85
WB2NHO	147.375
WB2NHO	224.820
WB2NHO	449.125
WB2NHO	29.66

- AUTOPATCH
- The Helen Reed Memorial Fund
- Monthly license testing (VE). Call 516-921-0085 WA2BGE held at the New York Institute of Technology
- Hamfests in February, May and September.
Call 561-462-5549 (WE2V)
- Swap and Shop Net - Wednesday 8 PM on W2VL.
Call 516-293-7808 (WB2CUK)
- Social Activities - Thursday lunch
- TECH NET - Sunday 8 PM - W2VL - Net Control - K2RIW
- MONTHLY MEETING - First Tuesday, 8 PM
(except July/Aug) in Thompson Middle School, Lesley Lane, Syosset. Talk-in on W2VL (146.85)
- INFO NET - Every Monday 8:30 PM on 146.85 - Net Cont. KA2YMR
- ARES NET - Every Wednesday 8:30 PM on 146.805 - WA2WKV
- Membership Chairperson - WA2BGE, POB 11, Jericho, NY 11753
- OFFICERS: Pres. K2YEW; V.P. WE2V; Secy. WA2BGE; Treas. KA2YMR. DIRECTORS: WB2WAK, N2GQR, WF2Q, WB2IBO, N2FF, N2FP, NK2T
- REPEATER TRUSTEES: WB2WAK and WA2WKV
24 Hour Information Phone: 516-735-2500

CALIFORNIA SOUTH

The activities and coordinations on the frequencies between 420 and 440 MHz are not listed below. The 420 through 431 segment is heavily utilized with over 850 coordinations for fixed (point-to-point) links and ATV communications. The 431 through 440 MHz segment is heavily utilized by various coordinated modes including ATV, satellite, weak signal and point-to-point communications. See band plans published in the southern California 51 MHz or 902 MHz listings.

Systems are listed by their general coverage area:

County abbreviations: Imperial (IMP); Inyo (IN); Kern (KE); Los Angeles (LA); Orange (OR); Riverside (RIV); San Bernardino (SBER); San Diego (SD); Santa Barbara (SBAR); Ventura (VE).

PktGOLD Multi-Mode

AEA PK232, PK88 owners:
You won't believe what your
digital station can do!

Features: Maildrop access, Binary file transfers, Conference bridge for roundtables and emergencies, Automatic session control (with manual override) makes multi-connects a snap, Continuous monitoring even while connected means no more wondering "what's going on" DOS shell, Huge scroll back buffers including previous sessions, cut and paste text between sessions (also between modes on pk232). Brag files, quick connects, name log, session text saved and/or printed, tactical callsigns supported using our quick-connects, multi-hop NET/ROM usage a snap, manual or automatic. Shown above, one screen with a new connect message, in split screen mode. Separate screens for previous connects, text editing, and more!

Easy to run! Many powerful features, but use only those you need now, learn the rest at your own pace. You'll be on the air in 5 minutes. Comes with a 75-page reference manual, easy to follow step-by-step tutorial, on-line help screens, quick reference guide, and phone support. Our users call us to say how great it is. We know you will agree!

AMTOR: For PK232 owners, Amtor has never been so easy to use. On screen you see whether you are sender or receiver, RQ or traffic, FEC, SELFEC, ARQlisten, etc. If you have a PK88, and upgrade to the PK232, you'll find AMTOR operation as easy as Packet with "quick connects" and "disconnects" features. All other character modes as well, Baudot, Morse, Navtex, TDM, and Ascii.

Ordering: Price: \$59.95 (CA res add 6%) plus \$5 S&H. InterFlex Systems Design Corp., P.O. Box 6418, Laguna Niguel, CA 92607-6418 Phone: (714) 496-6639 Call or write today. VISA & MasterCard welcome.

PROPAGATION BEACONS

The following listing of propagation beacons has been compiled by ARRL HQ from the generous input of many sources. Please send any updates to ARRL HQ, *Repeater Directory*, 225 Main St, Newington, CT 06111.

Note: Amateurs are urged to avoid transmitting on beacon frequencies; interference reduces the value of the beacon service to other amateurs.

The following abbreviations have been used in the beacon listings:

Antennas

Dpl — Dipole
DtLp — Delta Loop
GP — Ground Plane
InvV — Inverted Vee
J-Pole — J-pole
Omni — Omni-directional
Sqlo — Squalo
Tstl — Turnstile
V Bm — V-Beam
Quad — Quad

Polarization

V — Vertical
H — Horizontal

Remarks

Cont — Continuous
Intr — Intermittent

Listings 28 MHz - 24.15 GHz

BEACONS

SPECIAL SERVICE CLUBS (SSC)

These Amateur Radio Clubs have qualified for Special Service Club status by demonstrating an extra commitment to the advancement of Amateur Radio in their communities. Many SSCs also sponsor repeaters (listed within this directory), some of which have open autopatch capabilities. Should you find yourself in these areas, whether you are a permanent resident or just passing through, feel free to contact the Special Service Club and become a part of this vital component of the ARRL organization.

The following is a list of those clubs that have been designated as Special Service Clubs as of February 15, 1991. Club mailing addresses, as well as meeting information, are included.

<i>Club Name</i>	<i>Address</i>	<i>Mbrs</i>
Birmingham ARC	750 Eastern Manor Lane Birmingham, AL 35215	373
East Alabama ARC	403 4th Ave Opelika, AL 36801	59

REPEATER-TO-REPEATER INTERFERENCE

In an effort to resolve repeater-to-repeater interference complaints, FCC has offered the following definition of "Repeater operation." Where an amateur radio station in repeater or auxiliary operation causes harmful interference to the repeater or auxiliary operation of another amateur radio station, the two are equally and fully responsible for resolving the interference unless one station's operation is coordinated and the other's is not. In that case, the station engaged in the non-coordinated operation has primary responsibility to resolve the interference.

TRACKING DOWN REPEATER JAMMERS

Repeaters, which of course are fixed frequency devices, are vulnerable to abuse by some among us who find a perverse pleasure in destroying the pleasure of others by disrupting repeater communications.

REPEATER JAMMERS AND THE LOCAL INTERFERENCE COMMITTEE

Interference problem on VHF or UHF repeaters are primarily local problems requiring local resolution. This kind of problem varies from non-existent in some parts of the country to extremely serious in others, even to the point of a threat of bodily harm. The Amateur

Auxiliary mechanism for dealing with any local amateur-to-amateur interference (primarily on VHF) is the local interference committee. The philosophy of the committee approach to solving this type of problem was provided by the ARRL Interference Task Force in 1980. The Task Force summarized its findings in its operation "green book," *Handbook for Local Interference Committees*. Although this fine book was published prior to the enactment of Public Law 97-259, it provides excellent information on direction-finding techniques and methods of combating amateur-to-amateur interference. Many repeater groups have already successfully established local interference committees, some employing very sophisticated methods. The committee approach to solving this type of problem has proven most effective.

The Amateur Auxiliary incorporates this program of local interference committees into its comprehensive program of dealing with all types of amateur variations with the regulations. Since the ARRL Field Organization is the focus of Amateur Auxiliary involvement as recognized by agreement with FCC, the local interference committee now comes within the purview of the Section Manager's overall Amateur Auxiliary program. The local interference committee gains official standing through the Section Manager. It is, in effect, a "group appointment" of the Section Manager, for specific authorization to deal with local problems of amateur-to-amateur interference. Thus, the local interference committee plays a crucially important role in the makeup of the Amateur Auxiliary.

For more information on local interference committees, Amateur Auxiliary and the ARRL Field Organization, contact your ARRL Section Manager, or the Field Services Dept at ARRL HQ.

REPEATER LINGO

Definitions of the words frequently used on FM repeaters:

Autopatch—a device that interfaces the repeater system with the telephone system to extend ham communications over the telephone communications network.

Breaker—a ham who interjects his call sign during a QSO in an attempt to get a chance to communicate over the repeater.

Channel—the pair of frequencies (input and output) a repeater operates on.

Closed repeater—a repeater whose use is limited to certain individuals.

Control operator—an individual ham designated to “control” the repeater, as required by FCC regulations.

COR—Carrier-operated relay, a device that, upon sensing a received signal, turns on the repeater’s transmitter to repeat the received signal.

Courtesy beeper—a tone sounded shortly after each repeater transmission to permit other stations to gain access to the repeater before the tone sounds.

Coverage—the geographical area in which the repeater may be used for communications.

CTCSS—Continuous Tone Coded Squelch System: is a sub-audible tone system which operates the squelch (COR) of a repeater when the corresponding sub-audible tone is present on a transmitted signal. The squelch on a repeater which uses CTCSS will not activate if the improper CTCSS tone, or if no tone, is transmitted.

Crossband—communications to another amateur frequency band by means of a link interfaced with the repeater.

Desense—degradation of receiver sensitivity caused by strong unwanted signals reaching the receiver front end.

Duplexer—a device that permits the use of one antenna for both transmitting and receiving with minimal degradation to either the incoming or outgoing signals.

Frequency synthesis—a scheme of frequency generation in transceivers using digital techniques.

Full quieting—signal strength in excess of amount required to mask ambient noise.

Hand-held—a portable FM transceiver that is small enough to use and carry in one hand.

Input—the frequency the repeater receiver is tuned to: the frequency that a repeater user transmits on.

Intermod—interference caused by spurious signals generated by intermodulation distortion in a receiver front end or transmitter power-amplifier stage.

Key-up—turning on a repeater by transmitting on its input frequency.

Machine—the complete repeater system.

Mag-mount—a mobile antenna with a magnetic base that permits quick installation and removal from the motor vehicle.

Offset—the spacing between a repeater's input and output.

Ominidirectional—an antenna system that radiates equally in all directions.

Output—the frequency the repeater transmits on; the frequency that a repeater user receives on.

Picket-fencing—rapid flutter on a mobile signal as it travels past an obstruction.

Polarization—the plane an antenna system operates in; most repeaters are vertically polarized.

Reverse autopatch—a device that interfaces the repeater with the telephone system and permits users of the phone system to call the repeater and converse with on-the-air repeater users.

Reverse split—a split-channel repeater operating in the opposite direction of the standard 30-kHz repeaters.

RPT, R—abbreviations used after repeater call signs to indicate that the call sign is being used for repeater operation.

Simplex—communications on one frequency, not via a repeater.

Splinter—frequency—2-meter repeater channel 15 kHz above or below the standard 30 kHz-spaced channel.

Split sites—the use of two locations for repeater operation (the receiver is at one site and the transmitter at another), and the two are linked by telephone or radio.

Squelch tail—the noise burst that follows the short, unmodulated carrier following each repeater transmission.

Timer—a device that limits the length of a single repeater transmission.

Tone pad—a device that generates the standard telephone system tones used for controlling various repeater functions.

"The Epitome of Excellence"

Elevate the status of your repeater with the RC-850 Repeater Controller.

Ever heard a really great repeater? One that sounds superb? Is fun to use? And benefits its users through its wealth of interactive features? Chances are, it's controlled by an ACC RC-850 Repeater Controller. Because more discriminating repeater owners choose ACC controllers for their systems than any other. And the 850 leads the industry in performance.

The '850 is extensively programmable, using interactive Touch-Tone entry and voice response, or a computer terminal. All *remotely!* From access codes to its operating schedule, nearly everything can be easily changed.

The patch supports local and radio-linked phone lines. A three-tiered system offers flexibility in call routing, assignment of privileges and control. The 250 autodial slots support even the largest groups.

The Touch-Tone activated mailbox lets users leave messages for each other. The *system* will leave you messages if you miss a reverse patch or alarm. Paging support includes all popular tone formats so users can always be available without having to listen.

Multi-band linking extends your repeater's range, ties your repeater to others for emergency and public service activities, and lets you benefit from the elevation of your repeater site for working all bands. Individual user codes offer secure access to selected functions to bar unauthorized use.

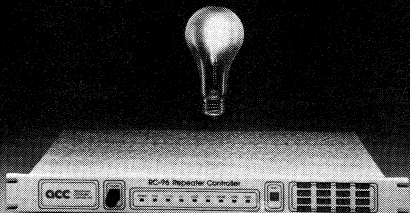

The top-of-the-line '850 distinguishes itself as a stellar performer on hundreds of repeaters. And it can do the same for you. Learn more about how to enrich your repeater system by contacting us directly.

"What a Brilliant Idea!"

The RC-96 Repeater Controller will light up your day ... every day that you use your repeater.

You'll get its top-notch auto-patch and its full complement of linking, remote control and programming. Plus, its synthesized voice will shed light on your group, communicating information through IDs, tail messages, and bulletin boards.

Installation will be an illuminating experience - of just how easy it can be. With supplied cables, easily accessible adjustments, and a front panel display that will light your way

to what's happening. Even Thomas Edison would have been impressed.

Then there is the legendary lightning protection that Ben Franklin could have used. Backed up by our two year lightning warranty.

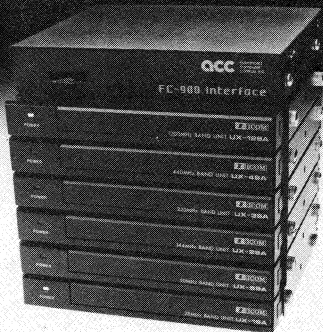

Turn even a flickering repeater into a beacon - a lighthouse of the airwaves. The RC-96 controller will lead to a bright future for your repeater group. Oh yes, light bulb not included.

"How Does Your Remote Base Stack Up?"

Now it's easy to add a multi-band remote to your repeater.

Your repeater can now link to any frequency on up to six bands with ACC's new interface to the ICOM IC-900/901 FM Mobile band units.

Our unique FC-900 Interface connects your ACC repeater controller to the ICOM band units (the ICOM fiber optic controller and interface aren't needed). Add new bands to your system by just adding band units. And best of all - everything just plugs together!

If you've built remotes before, you'll appreciate the simplicity - and the performance. If you haven't, now is

the time to add a new remote base or linking system to your repeater.

Extend the range of your repeater, link to other repeaters for emergency and public service activities, and benefit from the elevation of your repeater site for all bands. From ten meter DX to 1200 MHz linking - and everything in between.

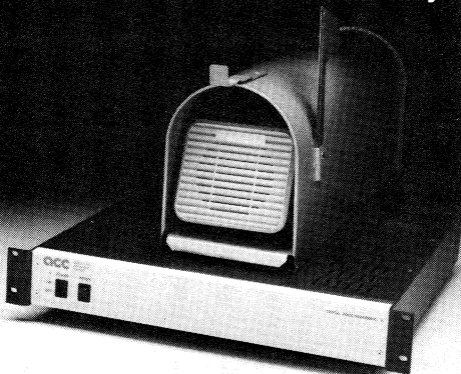

ACC pioneered frequency agile remotes and links on repeaters years ago. Now we've made it easy. One more reason that ACC is the right choice for your repeater system.

So stack the deck in your favor and write or call for more information on the FC-900 Interface.

"Have You Listened To Your Mailbox Today?"

Mail Call! The Digital Voice Recorder gives your FM repeater users a voice mailbox.

With messages stored in voice, your users will keep in touch with each other even if they aren't on the air at the same time.

In addition, your repeater's IDs and other messages can be remotely recorded so they're personalized and can provide information to your users — about your system, club, meetings and events.

Audio is recorded remotely and stored digitally. PCM recording (like CDs) results in the highest possible fidelity, so people will sound like they're live at your repeater site!

The DVR connects easily to your ACC repeater controller. And one DVR supports up to three repeaters for a cost effective installation.

Call or write for more information. Then check your mailbox.

Free technical support is available for all ACC products. Manuals can be purchased for any product, and their cost is applicable as a credit toward the purchase of new equipment. Request our free demonstration audio cassette so you can hear for yourself how good ACC's products sound.

KRP-5000 REPEATER

2 meters, 220, and 440!

**Word is spreading fast-
"Nothing matches the KRP-5000
for total performance and value. Not GE, not even Motorola."**

RF performance really counts in tough repeater environments, so the KRP-5000 receiver gives you 7 helical resonators, 12-poles of IF filtering, and a precise Schmitt trigger squelch with automatic threshold switching. The transmitter gives you clean TMOS FET power.

Enjoy high performance operation with: remote programmability, sequential tone paging, autopatch, reverse autopatch, 200-number autodial, remote squelch setting, status inputs, control outputs, and field-programmable Morse messages

**Call or write for the full
performance story . . . and
the super value price!**

ABOUT QUEMENT

Quement Electronics...one of the Bay Area's oldest and most diversified electronics distributors, combining the latest in product inventory with "Old Fashioned Personalized Service" that you thought was a thing of the past.

"Old Fashioned Service" is however, the only old fashioned item we stock. Quement inventories Northern California's largest stock of products, offering over 225 lines of stock in its 40,000 square foot San Jose facility.

The newest and most advanced products are foremost with Quement and have been for over 51 years. Our reputation and dedication in quality service to our customers have brought us the distinction as a leader that we will never relinquish.

Quement Electronics is one of the most complete service-oriented companies you will find.

At Quement—people are our daily business.
