THE ARRL REPEATER DIRECTORY

1992-1993 EDITION

MORE THAN 19,000 LISTINGS

The ARRL Repeater Directory

Edited by
Jay Mabey, NUØX

The American Radio Relay League
Newington, CT 06111

PURPOSE

The purpose of the ARRL *Repeater Directory* is to provide:

1) a reference manual of repeater **locations, frequencies** and other pertinent data for the United States, Canada, and where available, the Caribbean, Central and South America, and Pacific Islands under US jurisdiction.

2) information necessary to contact frequency coordinators, and members of the ARRL VHF Repeater Advisory Committee (VRAC), VHF/UHF Advisory Committee (VUAC), the Digital Committee and the Future Systems Committee.

3) limited listings of packet systems. Normally only BBS systems, networks and gateways are published.

4) listings of propagation beacons as received at press time.

5) a national listing of all ARRL Special Service Clubs, their meeting times and locations.

FOREWORD

Welcome to the world of Amateur Radio FM repeaters! Whether you just received your license or have been using repeaters since they were first introduced, you'll find this completely revised edition to be an informative and easy-to-use resource.

The *Repeater Directory* contains over 19,000 listings from North America, Central and South America and the Caribbean. Listings are also provided for propagation beacons, packet radio and amateur television repeaters. A listing of ARRL Special Service Clubs (SSCs), their meeting times and locations is provided for your information.

This twenty-first edition of the ARRL *Repeater Directory* can also serve you as a handy reference for the names and addresses of Frequency Coordinators, Advisory Committee members for VHF, UHF and Digital bandplanning, as well as hints for tracking down interference and jammers. If you're just getting on the air, be sure to read over the User Information, Novice Guide and Bandplan sections for useful day-to-day information.

We wish to thank the many parent frequency coordination organizations, individual coordinators and their assistants who volunteered many hours of their time in order to place this resource in your hands. This year each entry was checked by Jay Mabey, NUØX, *Repeater Directory* editor, before being entered into the data base. Most coordinators received a "proof copy" as a final audit prior to publication.

The National Frequency Data Base (NFDB), located at ARRL HQ in Newington, has been totally renovated. It is presently being utilized by nearly 100 frequency coordinators, assistants and VRAC members for data exchange.

Thank you for choosing the ARRL *Repeater Directory*. We welcome your input. If there are any ideas or concerns you have please return the "Feedback" page (located in the back of this book) with your thoughts. 73.

David Sumner, K1ZZ
Excecutive Vice President, ARRL

REPEATER OPERATING PRACTICES

1) Monitor the repeater to become familiar with any peculiarities in its operation.

2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself heard, but, generally, "This is W1AW monitoring" will suffice.

3) Identify legally; you must identify at the end of a transmission or series of transmissions *and* at least once each 10 minutes during the communication.

4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.

5) Keep transmissions short and thoughtful. Your monologue may prevent someone with an emergency from using the repeater. If your monologue is long enough, you may *time out* the repeater. Your transmissions are being heard by many listeners including nonhams with "public service band" monitors or scanners; don't give a bad impression of our service.

6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.

7) Use the minimum amount of power necessary to maintain communications. This FCC regulation [97.313(a)] minimizes the possibility of accessing distant repeaters on the same frequency.

8) Don't break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended primarily to facilitate

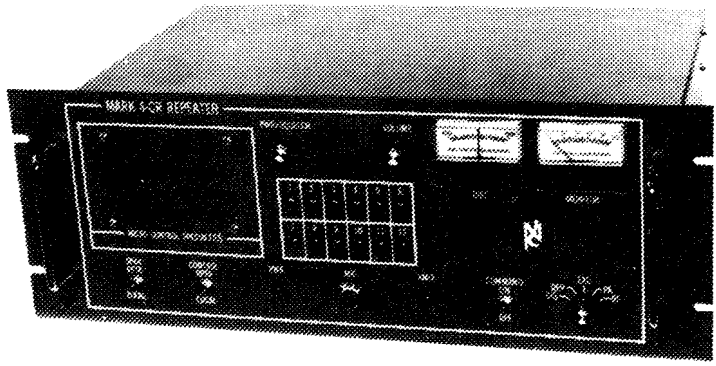

here is the next generation Repeater

MARK 4CR

The **only** repeaters and controllers with REAL SPEECH!

No other repeaters or controllers match Mark 4 in capability and features. That's why Mark 4 is the performance leader at amateur and commercial repeater sites around the world. Only Mark 4 gives you Message Master™ real speech • voice readout of received signal strength, deviation, and frequency error • 4-channel receiver voting • clock time announcements and function control • 7-helical filter receiver • extensive phone patch functions. Unlike others, Mark 4 even includes power supply and a handsome cabinet.

2 Meters
220
and 440

Create messages just by talking. Speak any phrases or words in any languages or dialect and *your own voice* is stored instantly in solid-state memory. Perfect for emergency warnings, club news bulletins, and DX alerts. Create unique ID and tail messages, and the ultimate in a real speech user mailbox — only with a Mark 4.

Call or write for specifications on the repeater, controller, and receiver winners.

mobile operation. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC forbids using an autopatch for anything that could be construed as business communications. Nor should an autopatch be used to avoid a toll call. Do not use an autopatch where regular telephone service is available. Autopatch privileges that are abused may be rescinded.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or group is responsible, and those who are regular users of a repeater should support the efforts of keeping the repeater on the air.

USER INFORMATION

This edition of the *Repeater Directory* has been revised with the exception of the following areas/frequencies:

1) TSARC (29, 52, 144, 440, ATV)
2) NESMC (52)
3) CANADA: BC, NB, NWT, NS, PEI, YT

Except where noted, repeaters are listed according to their Geographic Area (metropolitan area or county). Packet and special mode repeaters are not broken down by Geographic Area.

This directory lists private (closed) repeater systems as well as open systems. Many private systems, including repeaters, remote bases, control and link channels are in properly coordinated operation on authorized frequencies but are not included in this directory. This is especially common on the 440 MHz band, commonly utilized for linking and/or remote control systems. Please consult your Frequency Coordinator for their recommendations for operating frequencies on new repeaters, remote bases or control links.

With an increase in the number of reports of repeater-to-repeater interference, the FCC is placing more emphasis on repeaters being coordinated. Repeater coordination is an example of voluntary self-regulation within the Amateur Service. Non-coordinated repeater operation *may* imply non-conformance with locally recognized band plans (e.g. an unusual frequency split) or simply that the repeater trustee has not yet applied for, or received 'official' recognition from the Frequency Coordinator. Known non-coordinated repeaters are indicated in this directory with a pound sign (#) preceding the city of location. This symbol does not indicate anything about the relative merit of a particular repeater.

Repeater Terminology

The following is an explanation of the information included in each repeater listing:

LOCATION—The city/town where the repeater is located. A pound sign (#) indicates the repeater is uncoordinated by the coordination council.

OUTPUT—The output frequency in megahertz.

INPUT—The frequency offset (difference between input and output frequencies). Either a (+) or (−). When a

HENRY RADIO. . .

65 years of providing the amateurs of 50 states and 100 countries with the honest, reliable service they deserve.

We know that we have provided the kind of equipment and service that thousands of amateurs have come to expect. And they keep coming back because there are a lot of good reasons.

☆ A large inventory of fine equipment from the world's leading manufacturers ☆ A knowledgeable staff dedicated to amateur radio ☆ A complete line of accessories ☆ A well stocked repair shop staffed by experienced technicians ☆ We take trade-ins and sell used equipment ☆ Generous discounts on cash purchases ☆ We carry our own financing & accept most credit cards

frequency is printed in the input field, this indicates a "non-standard" offset.

Standard offsets by band:
29 MHz — 100 kHz
52 MHz — 1 MHz*
144 MHz — 600 kHz
222 MHz — 1.6 MHz
440 MHz — 5 MHz
902 MHz — 12 MHz
1240 MHz — 12 MHz

CALL—The call sign of the repeater.

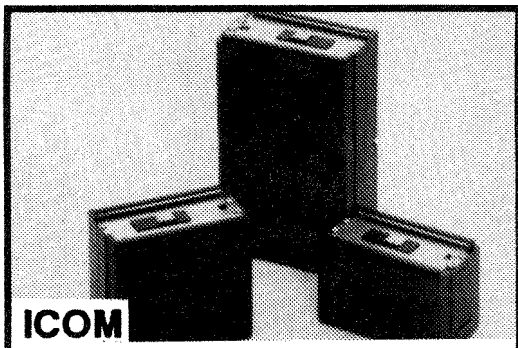

NOTES—How the repeater may be accessed and other specialized features are indicated by the following abbreviations:

o — Open (usually carrier-operated)
bl — Bi-lingual
c — Closed, private system
t (new abbreviation) — Tone-access (**CTCSS Tone**) required to access.
Standard EIA frequency codes are listed on page 48.
tt — Touch-Tone access to specialized repeater functions.
RB — Remote Base
SNP — Shared Nonprotected Pair. In the areas of Western Washington, British Columbia, Michigan and Oregon there are repeater frequencies listed as SNP. SNP frequencies are intended to provide spectrum for experimental repeaters, emergency/search and rescue operations and portable public service systems, and to act as a holding place for repeaters awaiting coordination.
Users of SNP frequencies do so under the following guidelines:
1) The frequencies are shared by all users.
2) *Operators receive no protection from other co-*channel users.
3) All systems use CTCSS or other approved method of limited access.
4) The frequency coordinator shall coordinate the CTCSS tones.

SPECIALIZED FEATURES:
a — Autopatch
(ca) — Closed autopatch
DS — Dual Squelch

*This is currently under study by ARRL.

USERS' GUIDE TO THE *REPEATER DIRECTOR*

Before using any repeater, new users may wish to review the section on REPEATER OPERATING PRACTICES.

Many codes are used in the repeater listings. For an explanation of these, see the USER INFORMATION section.

New users of repeaters should be aware of their transmit frequency or offset. Transmitting on the wrong offset may interfere with other amateur operators, or more seriously, may be out of band and interfere with other radio services. If you have any questions regarding the operating of your equipment, your owners manual or more experienced operators should be able to help.

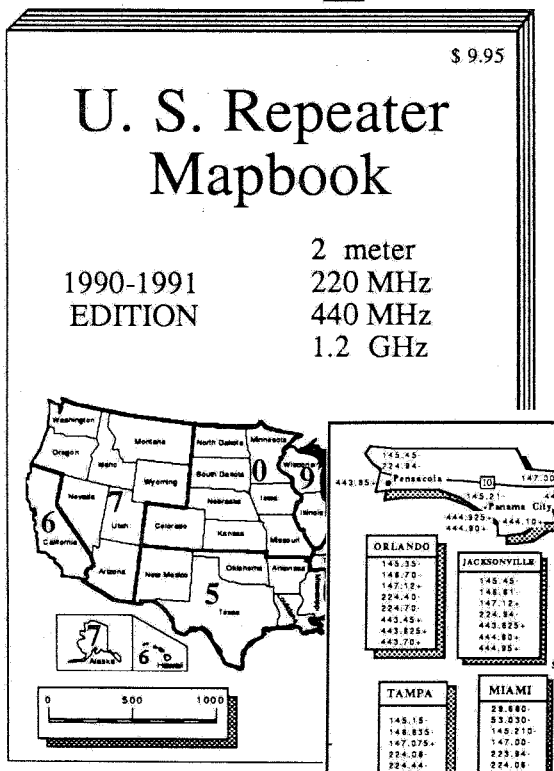

FM is only one of many modes available to Novices and Code-Free Technicians.* For further information on other modes of operation or license limitations, refer to *The FCC Rule Book,* one of the many helpful League publications.

The 1.25-meter (222.1-223.91 MHz) Novice band plan, simplex frequencies and repeater frequencies can be found on the following page entitled USER GUIDE TO THE 1.25-METER and 23-CM NOVICE BANDS.

The 23-cm (1270-1295 MHz) Novice band plan can be found on the following page, entitled USER GUIDE TO THE 1.25-METER and 23-CM NOVICE BANDS.

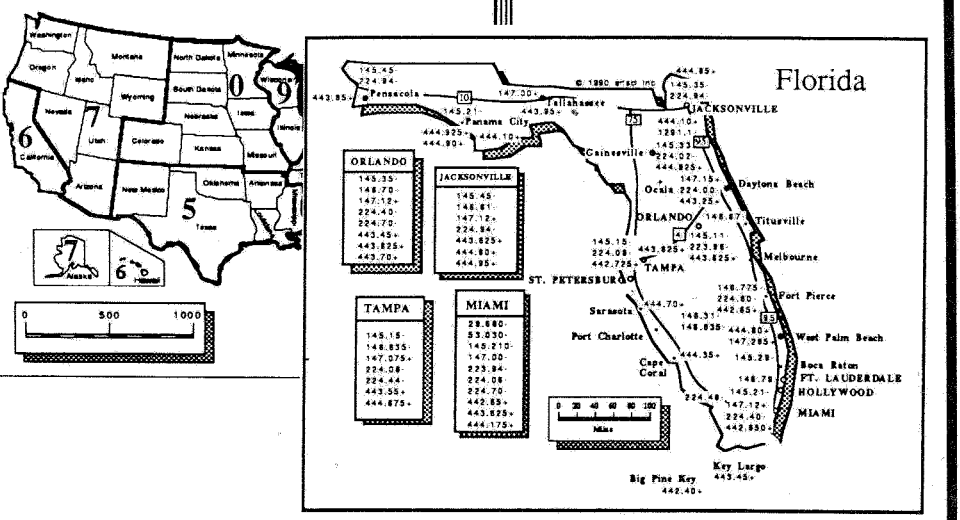

*Code-Free Technician VHF/UHF bandplans are the same as regular Technician bandplans.

A USER GUIDE TO THE 1.25-METER AND 23-CM NOVICE BANDS

222.10-223.91 MHz (1.25-meters)

Many repeater and simplex frequencies in this band are now available to Novices.

Here's where to look for simplex FM voice activity in the 1.25 meter Novice subband. Frequencies are in MHz:

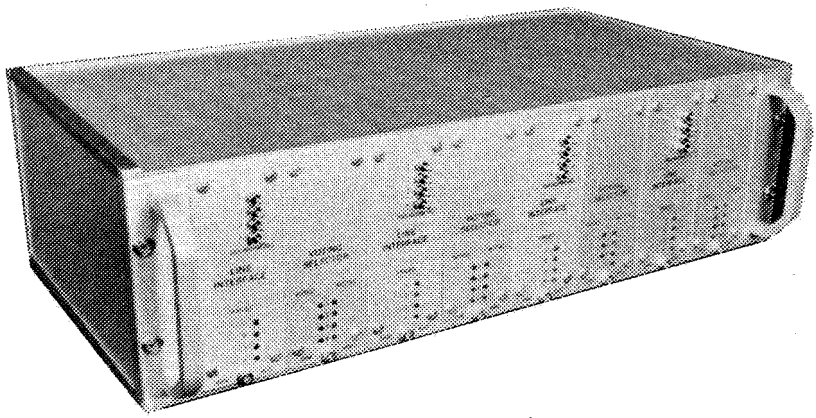

223.42	223.56	223.68	223.80
223.44	223.58	223.70	223.82
223.46	223.60	223.72	223.84
223.48	223.62	223.74	223.86
223.50*	223.64	223.76	223.88
223.52	223.66	223.78	223.90
223.54			

*National simplex frequency

Novices will want to check out the following frequency pairs for 1.25-meter repeaters in their area. Frequencies are (input/output) in MHz:

222.32/223.92	222.68/224.28	223.04/224.64
222.34/223.94	222.70/224.30	223.06/224.66
222.36/223.96	222.72/224.32	223.08/224.68
222.38/223.98	222.74/224.34	223.10/224.70
222.40/224.00	222.76/224.36	223.12/224.72
222.42/224.02	222.78/224.38	223.14/224.74
222.44/224.04	222.80/224.40	223.16/224.76

The following graphic illustrates the Novice 1.25-meter band plan.

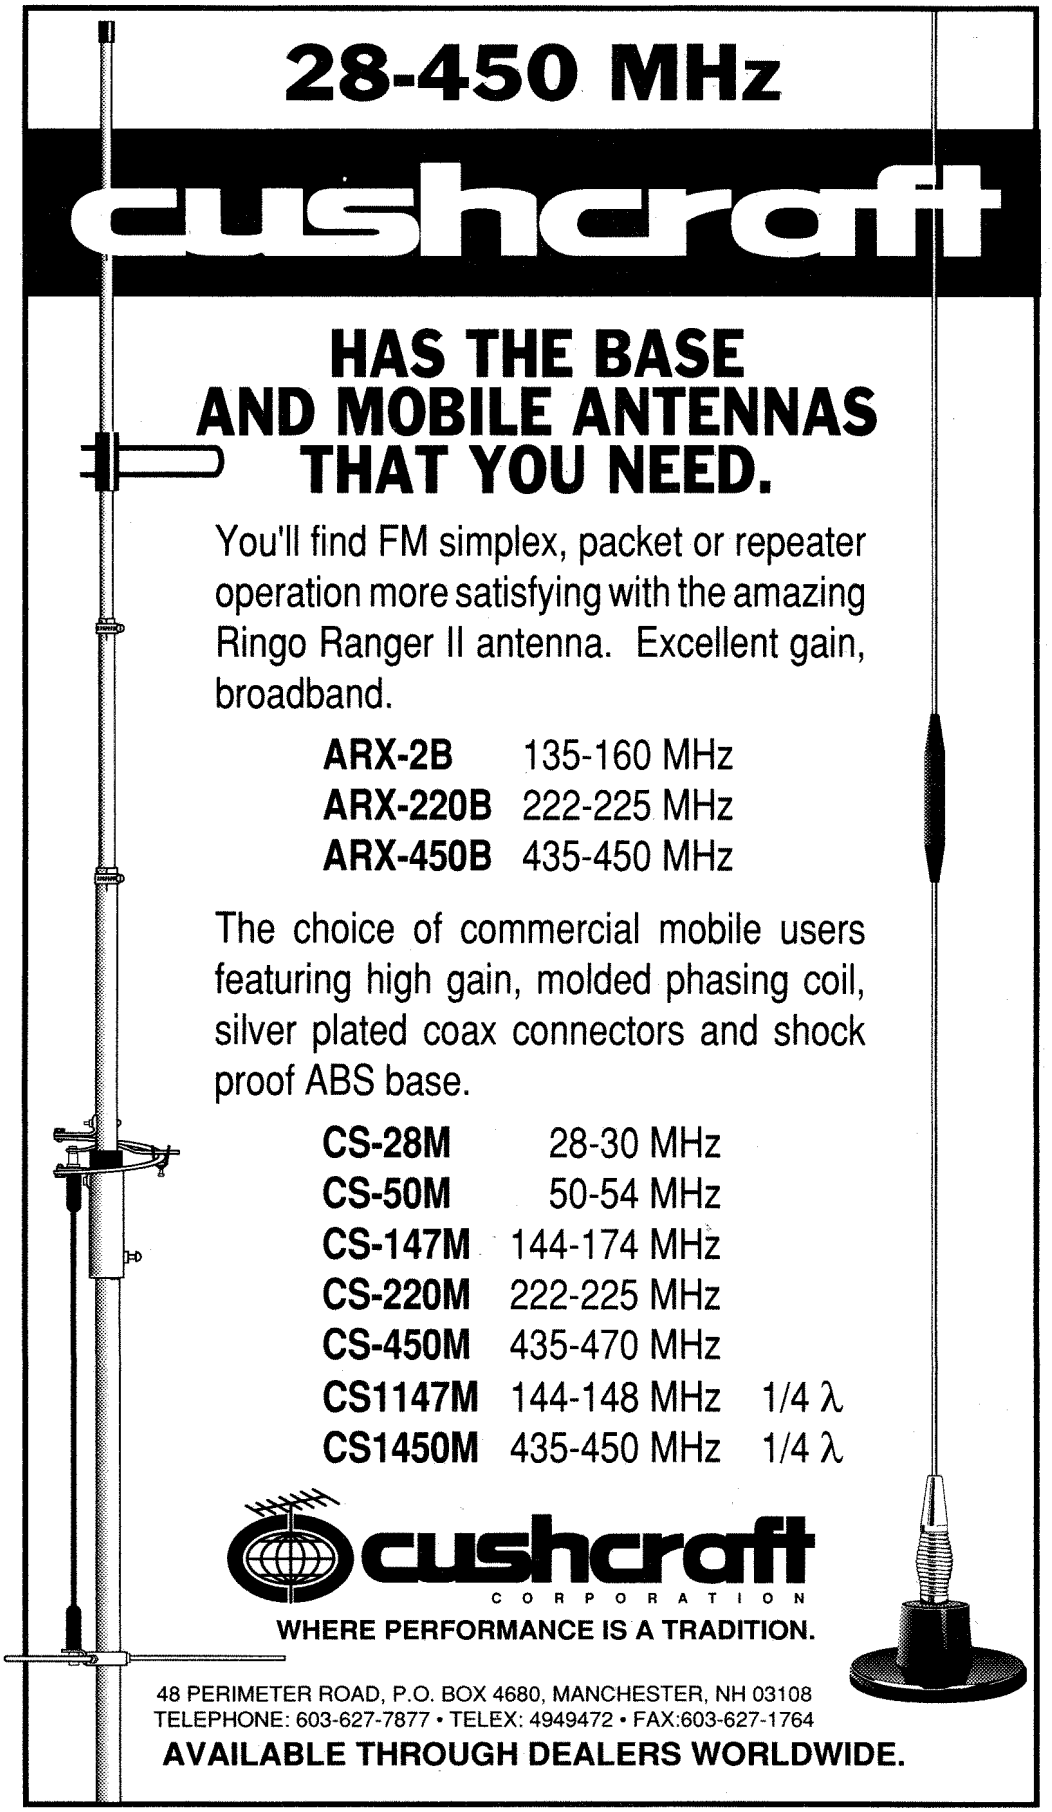

The Novice 23-cm band (1270-1295 MHz) contains many different types of use. The Novice will find that many repeaters listed in the "1240 MHz and Above" section of this publication are on frequencies available to them.

28-450 MHz

cushcraft

HAS THE BASE AND MOBILE ANTENNAS THAT YOU NEED.

You'll find FM simplex, packet or repeater operation more satisfying with the amazing Ringo Ranger II antenna. Excellent gain, broadband.

ARX-2B	135-160 MHz
ARX-220B	222-225 MHz
ARX-450B	435-450 MHz

The choice of commercial mobile users featuring high gain, molded phasing coil, silver plated coax connectors and shock proof ABS base.

CS-28M	28-30 MHz	
CS-50M	50-54 MHz	
CS-147M	144-174 MHz	
CS-220M	222-225 MHz	
CS-450M	435-470 MHz	
CS1147M	144-148 MHz	1/4 λ
CS1450M	435-450 MHz	1/4 λ

AVAILABLE THROUGH DEALERS WORLDWIDE.

The following graphic illustrates the 1270-1295 MHz Novice band plan.

BAND PLANS

When considering frequencies for use in conjunction with a repeater, be *sure* that both the input and output fall within subbands authorized for repeater use, and do not extend past the subband edges. FCC regulation 97.205(b) defines frequencies which are currently available for repeater use.

For example, a 2-meter repeater on exactly 145.50 MHz would be "out-of-band," as the deviation will put the signal outside of the authorized band segment.

Packet-radio operations under automatic control should be guided by Section 97.109(d) of the FCC rules.

Regional Frequency Coordination

The ARRL supports regional frequency coordination efforts by amateur groups. Band plans published in the ARRL *Repeater Directory* are recommendations based on a consensus as to good amateur operating practice on a nationwide basis. In some cases, however, *local conditions may dictate a variation from the national band plan.* In these cases, *the written determination of the regional frequency coordinating body shall prevail* and be considered good amateur operating practice in that region.

29.000-29.700 MHz

28.000-28.070	CW
28.070-28.150	RTTY
28.150-28.190	CW
28.190-28.200	CW (New beacon band)
28.200-28.300	CW (Old beacon band)
28.300-29.300	Phone
29.300-29.150	Satellite
29.510-29.590	Repeater inputs
29.600	FM simplex calling frequency
29.610-29.700	Repeater outputs

Repeater frequency pairs (input/output):

29.520/29.620	29.560/29.660
29.540/29.640	29.580/29.680

50-54 MHz

50.0-50.10	CW/Beacons
50.06-50.08	Automatically Controlled Beacons
50.10-50.30	SSB/CW
50.10-50.125	DX Window
50.125	SSB Calling Frequency
50.30-50.60	All Modes
50.60-50.80	Nonvoice Communications
50.62	Digital Calling Frequency
50.80-51.00	Radio Control (20 kHz Channels)
51.00-51.10	Pacific DX Window
51.12-51.48	Repeater Inputs (19 Channels)
51.12-51.18	Digital Repeater Inputs
51.50-51.60	Simplex (6 Channels)
51.62-51.98	Repeater Outputs (19 Channels)
51.62-51.68	Digital Repeater Outputs
52.00-52.48	Repeater Inputs (except as noted: 23 Channels)
52.02-52.04	FM Simplex
52.50-52.98	Repeater Outputs (except as noted: 23 Channels)
52.525	Primary FM Simplex
52.54	Secondary FM Simplex
53.00-53.48	Repeater Inputs (except as noted: 19 Channels)
53.0	Remote Base FM Simplex
53.1,53.2	Radio Remote Control
53.3,53.4	
53.50-53.98	Repeater Outputs (except as noted; 23 Channels)
53.5,53.6	Radio Remote Control
53.7,53.8	
53.52-53.9	Simplex

Simplex frequencies: 52.490 52.510 52.525*

*National Simplex Frequency

1*Proposed: 50.1-50.125 MHz DX window

(See following page)

Note: The subband 50.1-50.125 MHz has been gaining popular acceptance as an international DX window. It is recommended that domestic QSOs be conducted outside of this frequency range.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

1) National packet simplex frequency: 51.70
2) Duplex pairs to consider for local coordination for uses such as repeaters and meteor scatter:

50.62-51.62	50.68-51.68	50.76-51.76
50.64-51.64	50.72-51.72	50.78-51.78
50.66-51.66	50.74-51.74	

Note: Where duplex packet-radio stations are to be co-sited with voice repeaters, use high-in, low-out to provide maximum frequency separation from low-in high-out voice repeaters.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

144-148 MHz

144.0-144.05	EME (CW)
144.05-144.06	General CW and weak signals
144.06-144.10	General CW and weak signals
144.10-144.20	EME and weak signal SSB
144.20	National Calling Frequency
144.20-144.275	General SSB operation
144.275-144.30	Propagation Beacons
144.30-144.50	New OSCAR subband
144.50-144.60	Linear Translation Inputs
144.60-144.90	FM Repeater Inputs
144.9-145.10	Weak Signal and FM Simplex
145.10-145.20	Linear Translation Outputs
145.10-145.50	FM Repeater outputs
145.50-145.80	Miscellaneous and Experimental modes
145.80-146.00	OSCAR Subband
146.01-146.37	Repeater Inputs
146.40-146.58	Simplex**
146.61-147.39	Repeater Outputs
147.42-147.57	Simplex
147.60-147.99	Repeater Inputs

*This band plan has been proposed by the ARRL VHF-UHF Advisory Committee.

**The frequency 146.40 MHz is used in some areas as a repeater input.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

1) Automatic/unattended operations should be conducted on 145.01, 145.03, 145.05, 145.07 and 145.09 MHz.

a) 145.01 should be reserved for inter-LAN use.

b) Use of the remaining frequencies (above) should be determined by local user groups.

2) Additional frequencies within the 2-meter band may be designated for packet-radio use by local coordinators.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Repeater frequency pairs (input/output):

144.51/145.11	144.81/145.41	146.31/146.91
144.53/145.13	144.83/145.43	146.34/146.94
144.55/145.15	144.85/145.45	146.37/146.97
144.57/145.17	144.87/145.47	146.40 or 147.60/147.00*
144.59/145.19	144.89/145.49	146.43 or 147.63/147.03*
144.61/145.21	146.01/146.61	146.46 or 147.66/147.06*
144.63/145.23	146.04/146.64	147.69/147.09
144.65/145.25	146.07/146.67	147.72/147.12
144.67/145.27	146.10/146.70	147.75/147.15
144.69/145.29	146.13/146.73	147.78/147.18
144.71/145.31	146.16/146.76	147.81/147.21
144.73/145.33	146.19/146.79	147.84/147.24
144.75/145.35	146.22/146.82	147.87/147.27
144.77/145.37	146.25/146.85	147.90/147.30
144.79/145.39	146.28/146.88	147.93/147.33
147.96/147.36		

**Local Option 147.99/147.39*

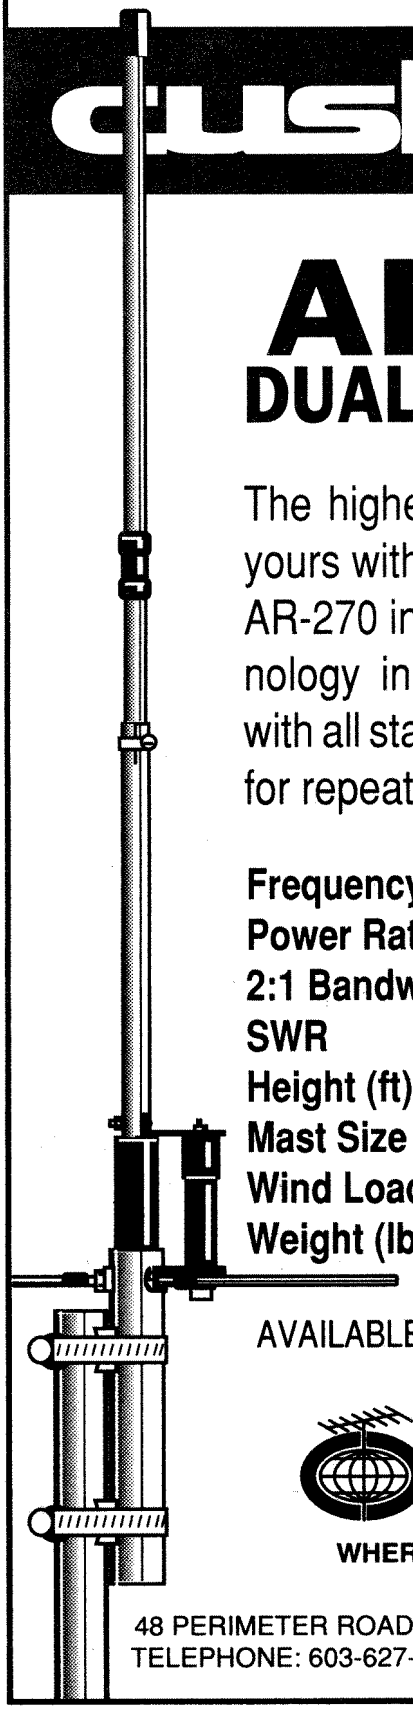

Some areas use 146.40-146.60 and 147.40-147.60 MHz for either simplex or repeater inputs and outputs. Frequency pairs in those areas are:

147.415/146.415	147.46/146.46	147.505/146.505
147.43/146.43	147.475/146.475	147.595/146.595
147.445/146.445	147.49/146.49	

144-148 MHz / 435-450 MHz

146.115/146.715	146.385/146.985	147.855/147.255
146.145/146.745	147.615/147.015	147.885/147.285
146.175/146.775	147.645/147.045	147.915/147.315
146.205/146.805	147.675/147.075	147.945/147.345
146.235/146.835	147.705/147.105	147.975/147.375
146.265/146.865		

Simplex frequencies:

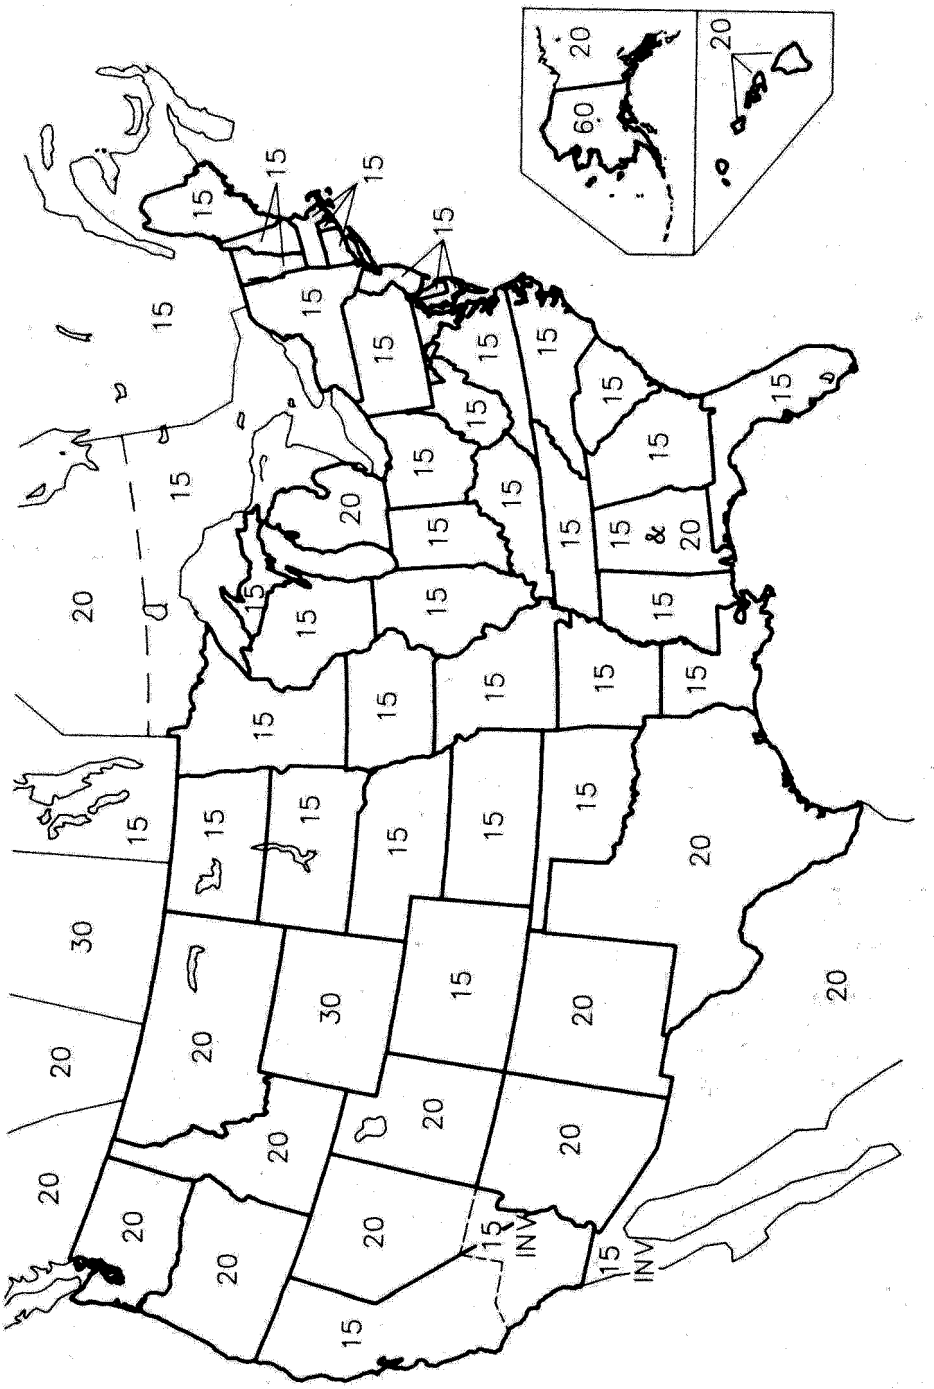

*146.415 *146.475 146.535 146.595 147.465 147.525
*146.43 *146.49 146.55 147.42 147.48 147.54 *146.445
*146.505 146.565 147.435 147.495 147.555 *146.46
#146.52 146.58 147.45 147.51 147.57 147.585

#National Simplex Frequency

*May also be a repeater (input/output). See repeater pairs listing.

Several states have chosen to realign the 146-148 MHz band, using 20 kHz spacing between channels. This choice was made to gain additional repeater pairs. For further information on which states are currently utilizing which spacing structure see map on page **33**.

The transition from 30 to 20 kHz spacing is taking place on a case by case basis as the need for additional pairs occurs. Typically the repeater on an odd numbered pair will shift to 10 kHz, up or down, creating a new set on an even numbered channel. For example, the pair of 146.13/.73 would change to 146.12/.72 or *146.14/.74 while the pairs of 146.10/.70 and 146.16/.76* would be left unchanged.

222.66/224.26	223.02/224.62	223.38/224.98

420-450 MHz

420.00-426.00	ATV repeater or simplex with 421.25-MHz video carrier, control links and experimental
426.00-432.00	ATV simplex with 427.25-MHz video carrier
432.00-432.07	EME (Earth-Moon-Earth)
432.07-432.10	Weak-signal CW
432.10	Calling frequency
432.10-432.30	Mixed mode and weak signal
432.30-432.40	Propagation beacons
432.40-433.00	Mixed mode and weak signal
433.00-435.00	Auxiliary/repeater links
435.00-438.00	Satellite only (internationally)
438.00-444.00	ATV repeater input with 439.25-MHz video carrier and repeater links
442.00-445.00	Repeater inputs and outputs (local option)
445.00-447.00	Shared by auxiliary and control links, repeaters and simplex (local option)
446.00	National simplex frequency
447.00-450.00	Repeater inputs and outputs (local option)

This band is under review by the ARRL VHF-UHF Advisory Committee.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) *100-kHz-bandwidth channels:*

430.05	430.35	430.65
430.15	430.45	430.85
430.25	430.55	430.95

2) 25-kHz-bandwidth channels:

431.025	441.000	441.050
440.975	441.025	441.075

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

THE TRI STATE AMATEUR REPEATER COUNCIL, INC.

SPECTRUM MANAGEMENT PLAN FOR THE 420-450 MHz BAND IN THE TSARC AREA OF CONNECTICUT NEW YORK, AND NORTHERN NEW JERSEY

420 - 421	10 MHz split. At coordinator's option with 430-431 Mhz.
421 - 422	System links & control.
422 - 428	ATV Repeater Inputs. 423.25 Video Carrier.
428 - 430	Voice Repeater/Packet 5 MHz split with 433-435 Mhz.
430 - 431	10 MHz split. At coordinator's option split with 420-421 MHz. Various bandwidth channels for voice, packet, ctrl.
431 - 433	Weak signal modes.
433 - 435	Voice Repeater/Packet 5 MHz split with 428-430 Mhz. 428.0-428.5 5 MHz split packet repeater inputs/links 428.5-429.5 5 Mhz split voice repeater inputs. 429.5-430.0 5 MHz split packet repeater inputs/links 433.0-433.5 5 MHz split packet repeater outputs/links 433.5-434.5 5 MHz split voice repeater outputs 434.5-435.0 5 MHz split packet repeater outputs/links
435-438	Space communications
438-444	ATV Channel 439.25 Video Carrier. ATV crossband inputs, simplex, ATV repeater output with 422-428 MHz. VSB required for users and repeaters. ATV accepts interference from 440-444 MHz repeaters.
440-450	5 MHz split FM Repeaters. 25 KHz spacing. Alternately inverted: 44X.025 and 44X.075 -5 MHz inputs 44X.000 and 44X.050 +5 MHz inputs

National FM Voice Simplex Calling Frequency - 446.000 MHz

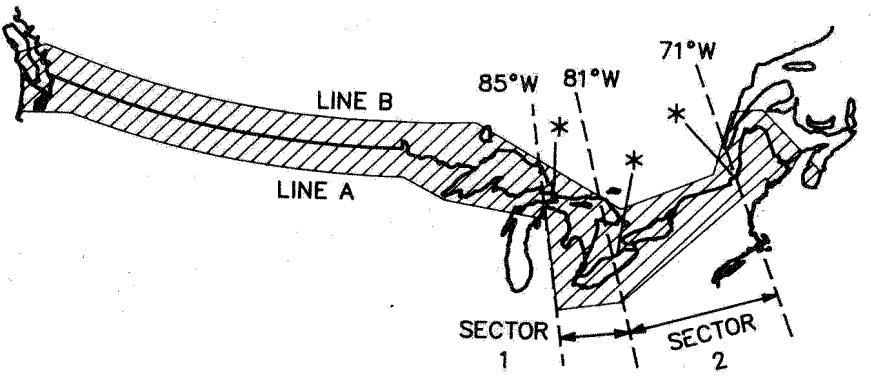

Packet: National Packet Calling Frequency - 441.000 MHz

441.025, 441.050, 441.075, 446.025, 446.050, 446.075 MHz

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Line A Restrictions:

The band is shared by amateurs with Government Radio location services (RADAR); amateurs must not interfere with these priority Government stations. As part of WARC-79 proceedings, the 420-430 MHz portion of the band was removed from the Amateur Radio Service north of Line A (see figure).

In a later action, FCC allocated portions of the band 421-430 MHz to the Land Mobile Service within 50-mile radii centered on Buffalo, Detroit and Cleveland. Amateur stations south of Line A in the vicinities of these cities may continue to operate in the 421-430 MHz spectrum as long as they do not cause interference to land mobile or government radiolocation users. Additionally, 50-watt PEP output power limitations apply to certain amateurs operating within circles of designated military installations in the US. [See §97.313(F)(G)

902-928 MHz

902.00-903.00	Weak signal communications
902.1	Calling frequency
903.30-906.00	Digital modes
906.00-909.00	FM repeater outputs
909.90-915.00	ATV
915.00-918.00	Digital modes
918.00-921.00	FM repeater inputs
921.00-927.00	ATV
927.00-928.00	FM simplex and links

Adopted by the ARRL Board of Directors meeting in July 1989.

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988 as interim guidance.

Two 3-MHz-bandwidth channels are recommended for 1.5 Mbit/s links. They are 903-906 MHz and 914-917 MHz with 10.7-MHz spacing.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US. These channels may interfere with existing weak-signal communications operating on or about 903.100 MHz.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Canadian amateurs note: The amateur service will continue to have secondary status in the band 902-928 MHz throughout Canada, using any of the following emissions: NØN, A1A, A2A, A3C, A3E, C3F, F1A, F2A, F2B, F1C, F3E.
Before operating in this band, Canadian amateur licensees are required to consult with their DOC

District Office to ensure interference will not be caused to other services operating in the area as per Section 45 of the General Radio Regulations Part II, given in TRC 25.

Government of Canada shipborne radiolocation service is permitted within 150 km of the East and West Coasts, Arctic Ocean, Hudson Bay, James Bay and up the St Lawrence River as far as Rimourski on precoordinated channels in the 902-928 MHz band.

Footnotes

1) Extracts of FCC Rules & Regulations, 97.303(G)(1). No amateur station shall transmit from within the States of Colorado and Wyoming, bounded on the south by latitude 39°N, on the north by latitude 42°N, on the east by longitude 105°W, and on the west by longitude 108°W. This band is allocated on a secondary basis to the amateur service subject to not causing harmful interference to, and not receiving protection from any interference due to the operation of, industrial, scientific and medical devices, automatic vehicle monitoring systems or Government stations authorized in this band.
2) Coordinated frequency assignments required.
3) ATV assignments should be made according to modulation type, eg VSB-ATV, SSB-ATV or combinations. Coordination of multiple uses of a single channel in a local area can be achieved through isolation by means of cross-polarization and directional antennas.
4) Coordinated assignments at 100 kHz until allocations are filled, then assign 50 kHz until allocations are filled, before assigning 25-kHz channels.
5) Simplex services only; permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.
6) Voice and nonvoice operation.
7) Spread-spectrum requires FCC authorization.
8) Consult FCC (97.307) for allowable data rates and bandwidths.

1240-1300 MHz

1240.00-1246.00	ATV #1
1246.00-1248.00	NB FM point-to-point links and digital duplex with 1258-1260
1248.00-1258.00	Digital communications
1252.00-1258.00	ATV #2
1258.00-1260.00	NB FM point-to-point links and digital duplex with 1246-1252
1260.00-1270.00	Satellite uplinks, experimental simplex ATV
1270.00-1276.00	Repeater inputs, FM and linear, paired with 1282-1288, 239 pairs, every 25 kHz, eg 1270.025, 050, etc.
1271/1283	Non-coordinated test pair
1276.00-1282.00	ATV #3
1282.00-1288.00	Repeater outputs paired with 1270-1276
1288.00-1294.00	WB experimental, simplex ATV
1294.00-1295.00	NB FM simplex, 25-kHz channels
1294.5	National FM simplex calling
1295.00-1297.00	NB weak signal (no FM)
1295.00-1295.80	SSTV, FAX, ACSSB experimental
1295.00-1296.00	Reserved for EME, CW expansion
1296.00-1296.05	EME exclusive
1296.07-1296.08	CW beacons
1296.1	CW/SSB calling frequency
1296.40-1296.60	Crossband linear translator output
1296.80-1297.00	Experimental beacons (exclusive)
1297.00-1300.00	Digital communications

The following Packet Radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) 2-MHz-bandwidth channels at:
1249.00 1251.00 1298.00
2) 100-kHz-bandwidth channels:
1299.05 1299.45 1299.75
1299.15 1299.55 1299.85
1299.25 1299.65 1299.95
1299.35
3) 25-kHz-bandwidth channels:
1294.025 1294.125
1294.050 1294.150
1294.075 1294.175
1294.100 National packet simplex calling

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet-radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet-radio users.

Footnotes

1) Deleted
2) Coordinated assignments required.
3) ATV assignments should be made according to modulation type (for example, VSB-ATV, SSB-ATV or combinations). Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross polarization and directional antennas. DSB ATV may be used, but only when local and regional activity levels permit. The excess bandwidths from such users are secondary to the assigned services.
4) Coordinate assignments with 100-kHz channels, beginning at the lower end of the segment until allocations are filled, then assign 50-kHz channels until allocations are filled before assigning 25-kHz channels.
5) Wide bandwidth experimental users are secondary to the satellite service and may be displaced upon the

installation of any new satellites. Users are EIRP-limited to the noise floor of the satellites in service and may suffer interference from satellite uplinks.

6) Simplex services only; permanent users shall not be coordinated in this segment. High-altitude repeaters or other unattended fixed operations are not permitted.
7) Voice and nonvoice operations.
8) Consult 47 CFR 97.307 (FCC regulations) for allowable data rates and bandwidths.
9) Provide guard bands at the higher frequency end of segments, as required, to avoid interference to ATV.
10) 1274.0-1274.2 and 1286.0-1286.2 MHz are optionally reserved for contiguous Linear Translators supporting multiple narrow bandwidth users. These may also be duplexed with other noncoordinated band segments.

2300-2310 and 2390-2450-MHz

The following band was adopted by the ARRL Board of Directors at its January 1991 meeting.

2300.00-2303.00	High-rate data
2303.00-2303.50	Packet
2303.50-2303.80	TTY packet
2303.80-2303.90	Packet, TTY, CW, EME
2303.90-2304.10	CW, EME
2304.10	Calling frequency
2304.10-2304.20	CW, EME,SSB
2304.20-2304.30	SSB, SSTV, FAX, Packet AM, AMTOR
2304.30-2304.32	Propagation beacon network
2304.32-2304.40	*General propagation beacons*
2304.40-2304.50	SSB, SSTV, ACSSB, FAX, Packet AM, AMTOR experimental
2304.50-2304.70	Crossband linear translator input
2304.70-2304.90	Crossband linear translator output
2304.90-2305.00	Experimental beacons
2305.00-2305.20	FM simplex (25-kHz spacing)
2305.20	FM simplex calling frequency
2305.20-2306.00	FM simplex (25-kHz spacing)
2306.00-2309.00	FM repeaters (25-kHz) input
2309.00-2310.00	Control and auxiliary links

2390.00-2396.00	Fast-scan TV
2396.00-2399.00	High-rate data
2399.00-2399.50	Packet
2399.50-2400.00	Control and auxiliary links
2400.00-2403.00	Satellite
2403.00-2408.00	satellite high-rate data
2408.00-2410.00	Satellite
2410.00-2413.00	FM repeaters (25-kHz spacing) output
2413.00-2418.00	High-rate data
2418.00-2430.00	Fast-scan TV
2430.00-2433.00	Satellite
2433.00-2438.00	Satellite high-rate data
2438.00-2450.00	WB FM, FSTV, FMTV, SS experimental

3300-3500 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

3456.3-3456.4 Propagation beacons

5650-5925 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

5760.3-5760.4 Propagation beacons

10.000-10.500 GHz

The following subband recommendation was adopted by the ARRL Board of Directors in January 1987.

10.368 GHz Narrow-band calling frequency

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

10368.3-10368.4 MHz	Propagation beacons
10364.00	Calling frequency

ITU Region 1 (Europe and Africa) 144-146 MHz Band Plan

144.00-144.01	EME
144.05	CW calling, once contact has been established move off frequency
144.10	CW random meteor scatter
144.15	upper limit CW exclusive
144.20	SSB random meteor scatter
144.30	SSB calling, once contact has been established move off frequency
144.40	SSB meteor scatter reference frequency
144.50	SSTV calling, Upper limit of CW/ SSB exclusive
144.60	RTTY calling
144.675	Data transmission calling frequency
144.70	FAX calling
144.845-144.990	Beacon exclusive
145.00-145.175	Repeater inputs RØ to R7
145.20-145.575	Channelized FM Simplex
145.50	FM calling frequency, once contact has been established move off frequency
145.60-145.775	Repeater outputs RØ to R7
145.80-146.00	Space communications, CW/SSB uplink only

Repeater channels (input/output)

RØ	145.000/145.600
R1	145.025/145.625
R2	145.050/145.650
R3	145.075/145.675
R4	145.100/145.700
R5	145.125/145.725
R6	145.150/145.750
R7	145.175/145.775

Packet frequencies most widely used are:
144.650 144.675 432.675

Simplex Channels

S10	145.25	S19	145.475
S11	145.275	S20	145.50 Most common simplex calling frequency, once contact has been established move off frequency
S12	145.30		
S13	145.325		
S14	145.35		
S15	145.375	S21	145.525
S16	145.40	S22	145.55
S17	145.425	S23	145.575
S18	145.45		

UK repeaters require a 1750-Hz (±25-Hz) tone burst of about 200-ms duration to open the repeater. It is best to transmit this tone at the start of each transmission. Belgian repeaters require a 3-second tone burst. Swiss repeaters require an 1800-Hz tone burst.

Note! Several French repeaters are on nonstandard frequency pairs. Those pairs are:

144.725/145.325	144.825/145.425
144.750/145.350	144.850/145.450
144.800/145.400	144.875/145.475

CTCSS (PL) TONE FREQUENCIES

The purpose of CTCSS (PL)™ is to reduce co-channel interference during band openings. CTCSS (PL)™ equipped repeaters would respond only to signals having the CTCSS tone required for that repeater. These repeaters would not respond to weak distant signals on their inputs and correspondingly not transmit and repeat to add to the congestion.

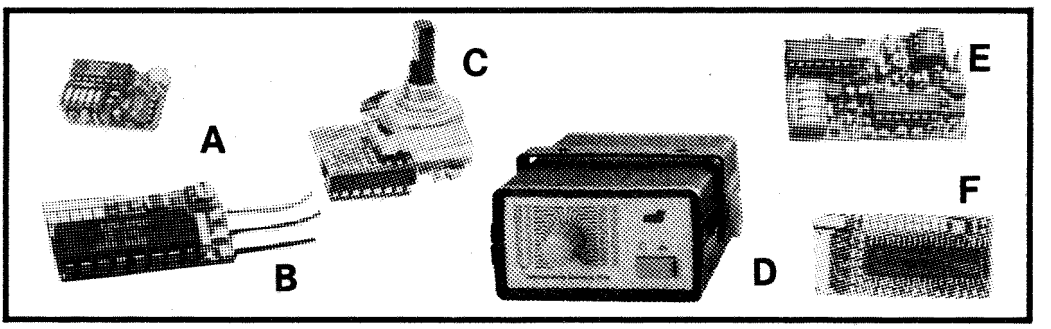

The standard Electronic Industries Association (EIA) frequency codes, in hertz, with their Motorola alphanumeric designators, are as follows:

67.0—XZ	97.4—ZB	141.3—4A	206.5—8Z
69.3—WZ	100.0—1Z	146.2—4B	210.7—M2
71.9—XA	103.5—1A	151.4—5Z	218.1—M3
74.4—WA	107.2—1B	156.7—5A	225.7—M4
77.0—XB	110.9—2Z	162.2—5B	229.1—9Z
79.7—WB	114.8—2A	167.9—6Z	233.6—M5
82.5—YZ	118.8—2B	173.8—6A	241.8—M6
85.4—YA	123.0—3Z	179.9—6B	250.3—M7
88.5—YB	127.3—3A	186.2—7Z	254.1—ØZ
91.5—ZZ	131.8—3B	192.8—7A	
94.8—ZA	136.5—4Z	203.5—M1	

During 1980 the ARRL Board of Directors adopted the 10-meter CTCSS (PL)™ tone-controlled squelch frequencies listed below for voluntary incorporation into 10-meter repeater systems to provide a uniform national system.

Call Area	*Tone 1*	*Tone 2*
W1	131.8 Hz-3B	91.5 Hz-ZZ
W2	136.5 -4Z	94.8 -ZA
W3	141.3 -4A	97.4 -ZB
W4	146.2 -4B	100.0 -1Z
W5	151.4 -5Z	103.5 -1A
W6	156.7 -5A	107.2 -1B
W7	162.2 -5B	110.9 -2Z
W8	167.9 -6Z	114.8 -2A
W9	173.8 -6A	118.8 -2B
WØ	179.9 -6B	123.0 -3Z
VE	127.3 -3A	88.5 -YB

Communications Specialists, Inc. manufactures CTCSS encoders and decoders used in repeater applications, as well as other signalling devices. In repeater use, a decoder is installed in the repeater receiver. An encoder programmed to the same tone is then required in the radios accessing the repeater, eliminating intermod or other unwanted access to the machine. The tone frequencies in the decoder and encoders can be quickly and easily programmed by the radio operator. See below for the tone unit that best fits your needs, or call the factory for a complete catalog.

(A) SS-32P DIP Switch Programmable CTCSS Encoder
Size: .9''x1.3''x.4'' **$28.95**

(B) SS-32SMP Micro-Miniature CTCSS Encoder
Size: .53''x1.0''x.16'' **$27.95**

(C) SS-12A Twelve Tone CTCSS Encoder
Rotary dial selectable. Size: 1.3''x.9''x.73'' **$39.95**

(D) TE-64 Self-contained Encoder with Rotary Switch
Size: 5.25''x3.3''x1.7'' **$79.95** (add $50 for LED display)

(E) TS-32P Programmable CTCSS Encoder-Decoder
Provides squelch control for any FM transceiver.
Size: 1.25''x2.0''x.4'' **$57.95**

(F) TS-64 Microminiature CTCSS Encoder-Decoder
Jumper programmable. Includes time-out timer, busy channel lockout, and reverse burst squelch-tail elimination.
Size: .78''x1.70''x.25'' **$64.95**

ARRL VHF REPEATER ADVISORY COMMITTEE (VRAC)

The ARRL Board of Directors created the VRAC as an advisory group organized to provide a greater opportunity for members to express their ideas and opinions in regard to VHF and UHF repeater operation.

Currently, the VRAC consists of 16 members, each of whom represents one of the ARRL Divisions. The VRAC members are appointed to the committee by the appropriate Division Director. At this writing, the composition of the committee is as follows:

ATLANTIC DIVISION
Willem Van Aller, K3CZ
7623 Old Washington Road
Woodbine, MD 21797

CENTRAL DIVISION
George Isley, WD9GIG
736 Fellows Street
St Charles, IL 60174

DAKOTA DIVISION
Eric Foss, KDØZ
4615 Oakview Lane North
Plymouth, MN 55442

DELTA DIVISION
Nita Wofford, N4DON
2966 Cordell
Memphis, TN 4971

GREAT LAKES DIVISION
Open

HUDSON DIVISION
*Phil Bradway, KB2HQ
1119 Hedgewood Lane
Schenectady, NY 12309

MIDWEST DIVISION
Wayne L Fowler, KAØE
4708 Bluejacket
Shawnee, KS 66203

NEW ENGLAND DIVISION
Mitch Stern, WB2JSJ
14 Kimberly Dr
Essex Junction, VT 05452

NORTHWESTERN DIVISION
Clay Freinwald, K7CR
32521 107th Ave SW
Auburn, WA 98002

PACIFIC DIVISION

ARRL VHF-UHF ADVISORY COMMITTEE (VUAC)

In order that optimum VHF and UHF spectrum use can be better defined, the VUAC considers all suggestions for band plan revisions, not just those dealing with repeaters.

The members of the VUAC prepare recommendations to the ARRL Board of Directors concerning VHF and UHF frequency use. The recommendations are based upon consultation with segments of the membership and studies conducted by the committee.

As this is written, the VUAC members are:

Repeater Registration

Repeater registration and updates are necessary in order to compile a current and accurate *Repeater Directory.* In some cases the changes only involve the addition or deletion of a specilized feature. In other cases it may involve a frequency or location change. Your Frequency Coordinator is in charge of seeing to it that this updated information is provided to the *Repeater Directory* in a timely manner for publication.

Please note that ***all*** repeater registration is now carried out through Frequency Coordinators. ARRL HQ only takes information and updates for Beacon stations. In rare cases where a coordination body does *not* exist in your area, you may submit (in writing) documentation listing all pertinent information on your repeater for publication to:

Editor, *ARRL Repeater Directory*
225 Main Street
Newington, CT 06111

Several tear-out registration forms have been provided for your convenience, and are located in the back of this directory.

Listings

All repeater listings in this *Repeater Directory* are provided by regional and state Frequency Coordinators and are printed exactly as they are received. If you notice any errors or omissions, please immediately notify your Frequency Coordinator (see page 56 for coordinator list).

Listings provided by member states of the Mid-America Coordination Council, Inc, (MACC), are Copyright 1992 and are published by permission.

Listings provided by member states of the Southeastern Repeater Association, Inc, (SERA), are Copyright 1992 and are published by permission.

In exceptional cases, where organizations do not exist, listings have been obtained by the best source available. Foreign listings are invited for inclusion in future editions of the *Repeater Directory.* Foreign listings included in this edition are provided by IARU Societies.

These listings are accurate to best of our ability; however, no guarantee of accuracy is made or implied. The listing of a repeater in the *Repeater Directory* does not imply that the listed repeater has any greater legal status than other amateur stations.

Frequency Coordinators

The ARRL is not a frequency coordinator, nor does the ARRL certify coordinators. Coordinators are volunteers normally appointed by a coordinating body. The *Repeater Directory* reports only the fact of coordination or noncoordination as instructed by the coordinating body. Publication in the *Repeater Directory* does not constitute nor imply endorsement or recognition of the authority of such coordinators as coordinators derive their authority from the voluntary participation of the entire amateur community in the areas they serve.

In some cases the person or group listed only compiles information for listings in the *RD*. In other cases the listed individual or group offers guidance but not coordination.

Frequency coordinators keep extensive records of repeater input, output, and control frequencies, including those not published in directories (at the owner's request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex operations. Therefore, anyone considering the installation of a repeater should check with the local frequency coordinator.

The following is a listing of groups or individuals for the United States and Canada who are active in frequency coordination and are acknowledged, by virtue of the recognition accorded them by the entire amateur community, as the sole frequency coordinators in their respective jurisdictions:

GREETINGS FROM LIMARC THE LONG ISLAND MOBILE AMATEUR RADIO CLUB, INC.

Celebrating our 27th Year

LIMARC is an ARRL Affiliated Radio Club, and a Special Service Club, a member of AMSAT, the Tri-State Amateur Repeater Council, and the Hudson Amateur Radio Council. Membership is over 525.

We are a not-for-profit organization, dedicated to the advancement of Amateur Radio, community public service and assistance to fellow Hams in need.

LIMARC sponsors many services including the following Repeater Stations:

W2VL	146.85	4Z - PL
WB2NHO	147.375	4Z - PL
WB2NHO	224.820	4Z - PL
WB2NHO	449.125	4Z - PL

- AUTOPATCH
- The Helen Reed Memorial Fund
- Monthly license testing (VE). Call 516-921-0085 WA2BGE held at the NY Institute of Technology 2nd Saturday 9am.
- Hamfests in February, May and September. Call 516-462-5540 - WE2V.
- Swap and Shop Net - Weekly on W2VL 8pm - Thursday. Call 516-293-7808 - WB2CUK.
- TECH NET - Weekly - W2VL - Sunday 8pm - K2RIW
- MONTHLY MEETING - First Tuesday - H.B. Thompson Middle School, Syosset 8pm. Talk-in on 146.85.
- INFO NET - Weekly - Monday 8:30pm - KA2YMR
- ARES NET - Weekly - Wednesday 8:30pm - 146.805 - WA2WKV
- MEMBERSHIP - WA2BGE, Jean Chittenden - 516-921-0085
- OFFICERS: President. KA2YMR; V.P. N2GQR; Secy. WA2BGE; Treas. WA2LUL. DIRECTORS: N2FF, N2FP, WB2IBO, WF2Q, WB2WAK, N2GSL, K2YEW.
- REPEATER TRUSTEES: W2VL - WA2WKV; WB2NHO - WB2WAK.

The activities and coordinations on the frequencies between 420 and 440 MHz are not listed below. The 420 through 431 segment is heavily utilized with over 850 coordinations for fixed (point-to-point) links and ATV communications. The 431 through 440 MHz segment is heavily utilized by various coordinated modes including ATV, satellite, weak signal and point-to-point communications. See band plans published in the southern California 51 MHz or 902 MHz listings.

Systems are listed by their general coverage area: County abbreviations: Imperial (IMP); Inyo (IN); Kern (KE); Los Angeles (LA); Orange (OR); Riverside (RIV); San Bernardino (SBER); San Diego (SD); Santa Barbara (SBAR); Ventura (VE).

PROPAGATION BEACONS

The following listing of propagation beacons has been compiled by ARRL HQ from the generous input of many sources. Please send any updates to ARRL HQ, *Repeater Directory,* 225 Main St, Newington, CT 06111.

Note: Amateurs are urged to avoid transmitting on beacon frequencies; interference reduces the value of the beacon service to other amateurs.

The following abbreviations have been used in the beacon listings:

Antennas

Dpl — Dipole
DtLp — Delta Loop
GP — Ground Plane
InvV — Inverted Vee
J-Pole — J-pole
Omni — Omni-directional
Sqlo — Squalo
Tstl — Turnstile
V Bm — V-Beam
Quad — Quad

Polarization

V — Vertical
H — Horizontal

Remarks

Cont — Continuous
Intr — Intermittent

Novice Antenna Notebook

W1FB welcomes the newcomer to the wonderful world of antennas. Written in Doug's plain-language style, you don't need to be a mathematician in order to duplicate the standard antenna designs presented in easy-to-understand pictorial drawings for Novice and Technician band use. Don't let the lack of an antenna keep you from getting on the air after your license arrives. With this book you can choose which wire, vertical or beam antenna design suits your needs, and you'll be ready for all the fun of seeing that the antenna you put up really works! 130 pages #3088 $10 plus $3 *($4 UPS)* shipping and handling.

225 MAIN ST
NEWINGTON, CT 06111

SPECIAL SERVICE CLUBS (SSC)

These Amateur Radio Clubs have qualified for Special Service Club status by demonstrating an extra commitment to the advancement of Amateur Radio in their communities. Many SSCs also sponsor repeaters (listed within this directory), some of which have open autopatch capabilities. Should you find yourself in these areas, whether you are a permanent resident or just passing through, feel free to contact the Special Service Club and become a part of this vital component of the ARRL organization.

The following is a list of those clubs that have been designated as Special Service Clubs as of January, 1992. Club mailing addresses, as well as meeting information, are included.

Club Name	*Address*	*Mbrs*
Birmingham ARC	750 Eastern Manor Lane Birmingham, AL 35215	373

REPEATER-TO-REPEATER INTERFERENCE

In an effort to resolve repeater-to-repeater interference complaints, FCC has offered the following definition of "Repeater operation." Where an amateur radio station in repeater or auxiliary operation causes harmful interference to the repeater or auxiliary operation of another amateur radio station, the two are equally and fully responsible for resolving the interference unless one station's operation is coordinated and the other's is not. In that case, the station engaged in the non-coordinated operation has primary responsibility to resolve the interference.

REPEATER JAMMERS AND THE LOCAL INTERFERENCE COMMITTEE

Interference on VHF or UHF repeaters is primarily a local problem requiring local resolution. This kind of problem varies from non-existent in some parts of the country to extremely serious in others. The Amateur Auxiliary mechanism for dealing with any local amateur-to-amateur interference (primarily on VHF) is the local interference committee. The philosophy of the committee approach to solving this type of problem was provided by the ARRL Interference Task Force in 1980. Many repeater groups have already successfully established local interference committees, some employing very sophisticated methods. The committee approach to solving this type of problem , and public law 97.259, have proven most effective.

The Amateur Auxiliary incorporates this program of local interference committees into its comprehensive program of dealing with all types of amateur variations with the regulations. Since the ARRL Field Organization is the focus of Amateur Auxiliary involvement as recognized by agreement with FCC, the local interference committee now comes within the purview of the Section Manager's overall Amateur Auxiliary program. The local interference committee gains official standing through the Section Manager. It is, in effect, a "group appointment" of the Section Manager, for specific authorization to deal with local problems of amateur-to-amateur interference. Thus, the local interference committee plays a crucially important role in the makeup of the Amateur Auxiliary.

For more information on local interference committees, Amateur Auxiliary and the ARRL Field Organization, contact your ARRL Section Manager, or the Field Services Dept at ARRL HQ.

REPEATER LINGO

Definitions of the words frequently used on FM repeaters:

Autopatch—a device that interfaces the repeater system with the telephone system to extend ham communications over the telephone communications network.

Breaker—a ham who interjects his call sign during a QSO in an attempt to get a chance to communicate over the repeater.

Channel—the pair of frequencies (input and output) a repeater operates on.

Closed repeater—a repeater whose use is limited to certain individuals.

Control operator—an individual ham designated to "control" the repeater, as required by FCC regulations.

COR—Carrier-operated relay, a device that, upon sensing a received signal, turns on the repeater's transmitter to repeat the received signal.

Courtesy beeper—a tone sounded shortly after each repeater transmission to permit other stations to gain access to the repeater before the tone sounds.

Coverage—the geographical area in which the repeater may be used for communications.

CTCSS—Continuous Tone Coded Squelch System: is a sub-audible tone system which operates the squelch (COR) of a repeater when the corresponding sub-audible tone is present on a transmitted signal. The squelch on a repeater which uses CTCSS will not activate if the improper CTCSS tone, or if no tone, is transmitted.

Crossband—communications to another amateur frequency band by means of a link interfaced with the repeater.

Desense—degradation of receiver sensitivity caused by strong unwanted signals reaching the receiver front end.

Duplexer—a device that permits the use of one antenna for both transmitting and receiving with minimal degradation to either the incoming or outgoing signals.

Frequency synthesis—a scheme of frequency generation in transceivers using digital techinques.

Full quieting—signal strength in excess of amount required to mask ambient noise.

Hand-held—a portable FM transceiver that is small enough to use and carry in one hand.

Input—the frequency the repeater receiver is tuned to: the frequency that a repeater user transmits on.

Intermod—interference caused by spurious signals generated by intermodulation distortion in a receiver front end or transmitter power-amplifier stage.

Key-up—turning on a repeater by transmitting on its input frequency.

Machine—the complete repeater system.

Mag-mount—a mobile antenna with a magnetic base that permits quick installation and removal from the motor vehicle.

Offset—the spacing between a repeater's input and output.

Ominidirectional—an antenna system that radiates equally in all directions.

Output—the frequency the repeater transmits on; the frequency that a repeater user receives on.

Picket-fencing—rapid flutter on a mobile signal as it travels past an obstruction.

Polarization—the plane an antenna system operates in; most repeaters are vertically polarized.

Reverse autopatch—a device that interfaces the repeater with the telephone system and permits users of the phone system to call the repeater and converse with on-the-air repeater users.

Reverse split—a split-channel repeater operating in the opposite direction of the standard 30-kHz repeaters.

RPT, R—abbreviations used after repeater call signs to indicate that the call sign is being used for repeater operation.

Simplex—communications on one frequency, not via a repeater.

Splinter—frequency—2-meter repeater channel 15 kHz above or below the standard 30 kHz-spaced channel.

Split sites—the use of two locations for repeater operation (the receiver is at one site and the transmitter at another), and the two are linked by telephone or radio.

Squelch tail—the noise burst that follows the short, unmodulated carrier following each repeater transmission.

Timer—a device that limits the length of a single repeater transmission.

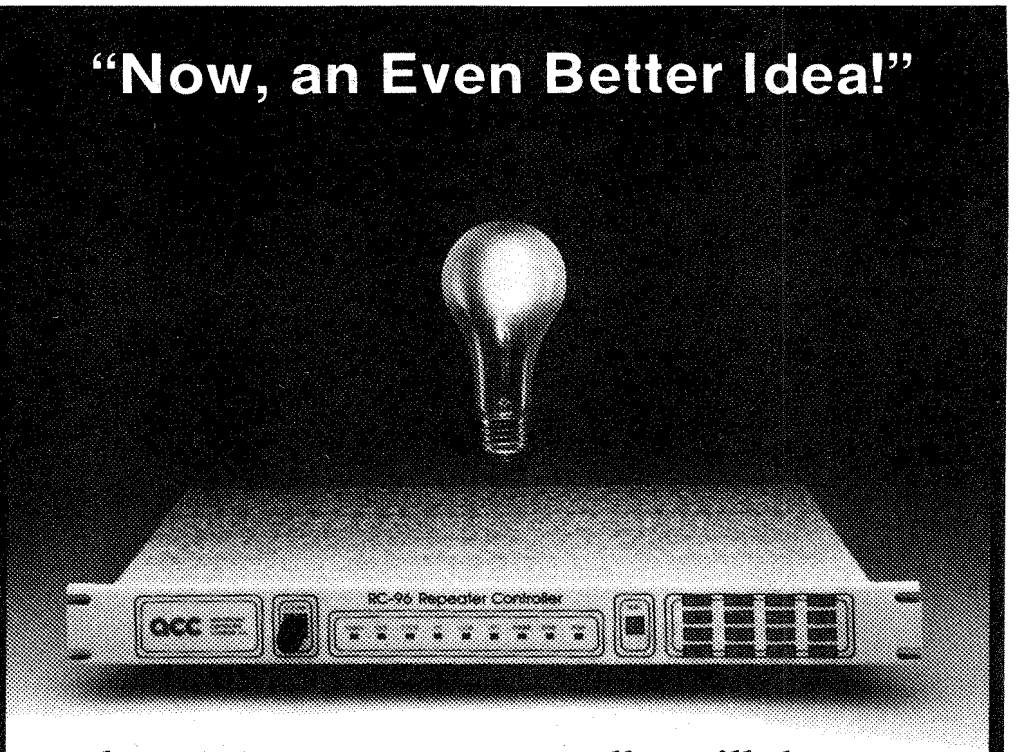

Tone pad—a device that generates the standard telephone system tones used for controlling various repeater functions.

"Now, an Even Better Idea!"

The RC-96 Repeater Controller will do your repeater chores for you.

With its new clock and calendar, the '96 knows what time it is. So it automatically does all the things you used to have to do yourself. Like put your repeater to sleep at night, wake it up in the morning, bring up the remote base for nets, and remind users of meetings. We invented scheduling technology for two-way radio repeaters, and now you can get it in the '96 – with no increase in price.

The pleasant new female voice (we call her Juliet) will tell you the time. And you'll know your repeater is in good hands with Romeo and Juliet at the controls.

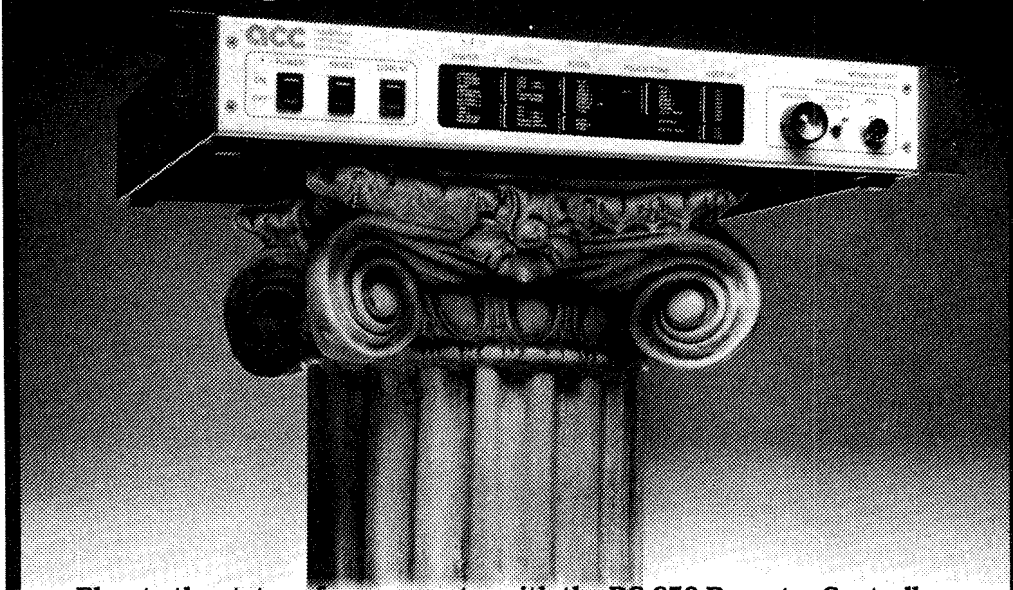

The '96 brings its top-notch autopatch and full complement of remote control and programming to your repeater. And now it can also control an HF radio, so you can work HF from your handheld. It's easy to install and is backed up by our two year lightning warranty.

No, the '96 won't wash your dishes. Or change light bulbs. But it will do your repeater chores. And make your repeater a lot more fun!

acc advanced computer controls, inc.

2356 Walsh Avenue, Santa Clara, California 95051 (408) 727-3330

"The Epitome of Excellence"

Elevate the status of your repeater with the RC-850 Repeater Controller.

Ever heard a really great repeater? One that sounds superb? Is fun to use? And benefits its users through its wealth of interactive features? Chances are, it's controlled by an ACC RC-850 Repeater Controller. Because more discriminating repeater owners choose ACC controllers for their systems than any other. And the 850 leads the industry in performance.

The '850 is extensively programmable, using interactive Touch-Tone entry and voice response, or a computer terminal. All *remotely!* From access codes to its operating schedule, nearly everything can be easily changed.

The patch supports local and radio-linked phone lines. A three-tiered system offers flexibility in call routing, assignment of privileges and control. The 250 autodial slots support even the largest groups.

The Touch-Tone activated mailbox lets users leave messages for each other. The *system* will leave you messages if you miss a reverse patch or alarm. Paging support includes all popular tone formats so users can always be available without having to listen.

Multi-band linking extends your repeater's range, ties your repeater to others for emergency and public service activities, and lets you benefit from the elevation of your repeater site for working all bands. Individual user codes offer secure access to selected functions to bar unauthorized use.

The top-of-the-line '850 distinguishes itself as a stellar performer on hundreds of repeaters. And it can do the same for you. Learn more about how to enrich your repeater system by contacting us directly.

acc advanced computer controls, inc.

2356 Walsh Avenue, Santa Clara, CA 95051 (408) 727-3330

"Have You Listened to Your Mailbox Today?"

Mail Call! The Digital Voice Recorder gives your FM repeater users a voice mailbox.

With messages stored in voice, your users will keep in touch with each other even if they aren't on the air at the same time.

In addition, your repeater's IDs and other messages can be remotely recorded so they're personalized and can provide information to your users — about your system, club, meetings and events.

Audio is recorded remotely and stored digitally. PCM recording (like CDs) results in the highest possible fidelity, so people will sound like they're live at your repeater site!

The DVR connects easily to your ACC repeater controller. And one DVR supports *up to three* repeaters for a cost effective installation.

Call or write for more information. Then check your mailbox.

Free technical support is available for all ACC products. Manuals can be purchased for any product, and their cost is applicable as a credit toward the purchase of new equipment. Request our free demonstration audio cassette so you can hear for yourself how *good* ACC's products sound.

Pico™ J

Pico-J rolls up and hides in his 4-ounce pocket-sized holder, waiting like the Genie in a bottle till you need full-quieting signal punch.
Call him forth and his glistening black weather sealed lines reveal a sleek end-fed halfwave antenna ready to hang anywhere.

Carry Pico-J with you for emergencies. Hang in the Motel when on the road. Suspend in the aparftment closet or patio doorway.
Attach Pico-J to window glass or curtain rod. He needs no radials for broadband low-angle omni-directional vertical halfwave gain.
Pico-J comes ready for work with 72" isolated coaxial feedline and gold pin BNC connector.
Hand-crafted in the U.S.A.
Typical edge-to-edge SWR under 1.2:1.

Tone and Code Finder

Pricing

Tone Only	$189.95
Tone & Digital	$299.95
Tone w/Memory	$239.95
Tone & Digital w/Memory	$339.95

The Tone/Code Finder is composed of a high speed display unit mounted to a scanning receiver. Its purpose is to instantly find and display all **CTCSS** and **DIGITAL** codes, including split channel and inverted codes. On board memory retains all hit and time information which is then transferred to a printer via a RS 232 port upon command. Time is stored in seconds and hits in units. In the event of power loss, the **FINDER** will maintain memory for up to three weeks.

PERFORMANCE AND VALUE WITHOUT COMPROMISE

KRP-5000 REPEATER

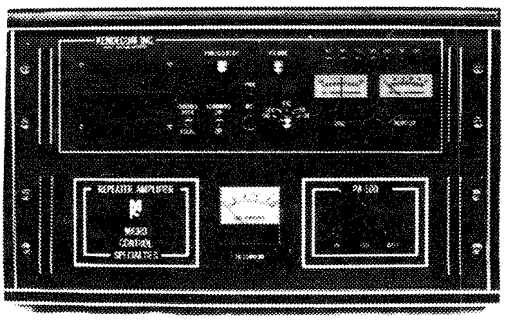

2 meters, 220, and 440!

Word is spreading fast-
"Nothing matches the KRP-5000 for total performance and value. Not GE, not even Motorola."

RF performance really counts in tough repeater environments, so the KRP-5000 receiver gives you 7 helical resonators, 12-poles of IF filtering, and a precise Schmitt trigger squelch with automatic threshold switching. The transmitter gives you clean TMOS FET power.

Enjoy high performance operation with: remote programmability, sequential tone paging, autopatch, reverse autopatch, 200-number autodial, remote squelch setting, status inputs, control outputs, and field-programmable Morse messages

Call or write for the full performance story . . . and the super value price!
