PURPOSE

The purpose of the ARRL *Repeater Directory* is to provide:

1) A reference manual of repeater locations, frequencies and other pertinent data for the United States, Canada and US Territories.

2) Information necessary to contact Frequency Coordinators and ARRL officers.

FOREWORD

As the *Repeater Directory* enters its fourth decade, it continues to be the authoritative source of repeater listings throughout the United States and Canada. Most new licensees cut their teeth on repeaters, and many seasoned amateurs continue to enjoy the ease and clear signals of FM operation.

Regardless of your license class, age, or other interests in the Amateur Radio Service, all the information you need to find and use repeaters is in this publication. Whether you are on the road or at home, we hope you use it to get on the air.

As always, you will find information on general repeater operating procedures, specialized emergency procedures, and locating and effectively overcoming jamming. We continue to provide a comprehensive listing of regional frequency coordinators and coordination bodies, including Web URLs and email addresses where available. Coordinators across the United States and Canada not only provide us with the data in this publication, but also strive to facilitate interference-free operation among the thousands of repeaters in their databases. We all appreciate their efforts.

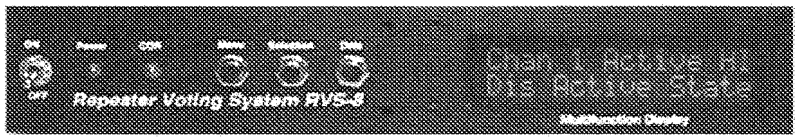

Thank you for your support of ARRL by purchasing this publication. It is our hope that you continue to find the *Repeater Directory* to be a useful tool for your operating library. Many thanks to *all* those involved in the process of making this the respected publication it continues to be.

ANNUAL UPDATE INFORMATION

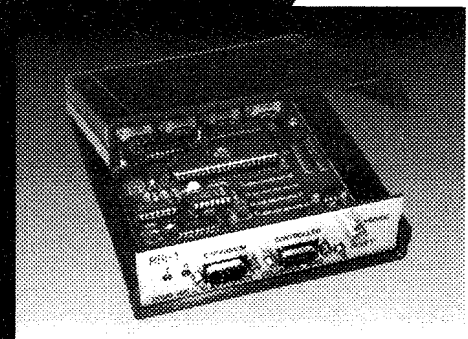

This edition of the Repeater Directory has been completely revised. Updates were received from all coordinators recognized by the National Frequency Coordinators' Council (NFCC) throughout the United States and Canada. In the few areas, noted throughout the book, served by a coordinator not recognized by the NFCC, information was provided by coordinating bodies seeking NFCC recognition.

PACKET AND FOREIGN LISTINGS

Please note that the digital listings contained in previous editions of the *Repeater Directory* have moved to a web site sponsored by Tucson Amateur Packet Radio Corporation (TAPR). The URL is: **http://www.tapr.org/directory**
Listings outside the United States and Canada have been moved to ARRL's comprehensive reciprocal licensing web site. ARRL welcomes the submission of additional foreign listings. Overseas travelers should refer to **http://www.arrl.org/FandES/field/regulations/io/recip-country.html**.

For Repeaters only.

Receiver Voter
4 channel, signal-to-noise

Improve coverage by adding receivers.

- Expandable to 32 channels by adding additional cards
- Continuous voting
- Available as a card or in a rack system
- Can be used with RF links or Telco lines
- Select/disable switches available for manual override
- External disable inputs
- LED indicators of COR and voted signals
- Remote voted indicators pinned out
- Thousands in service
- Starting at $410

Remote Base Interface

Add a Kenwood frequency agile remote base, now to 9 different repeater controllers.

- Connects and controls a maximum of 4 radios or bands
- Supports 16 Kenwood models
- Connects thru the radio's mike jack
- Controls frequency, power, RF power, CTCSS, Shift, etc.
- Expands user function output
- Just plug, program and play
- $285

CHAPTER ONE

GENERAL INFORMATION

This chapter will address repeater operating practices, give you a few user notes, provide information on special features some repeaters utilize, cover interference issues and discuss what to do if your repeater experiences jamming. A section listing CTCSS tone frequencies is also included for your information.

Repeater Operating Practices

The following suggestions will assist you in operating a repeater "like you've been doing it for years."

1) Monitor the repeater to become familiar with any peculiarities in its operation.

2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself known, but, generally, "This is NUØX monitoring" will suffice. Please don't "ker-chunk" (key up without identifying yourself) the repeater "just to see if it's working."

3) Identify legally; you must identify at the end of a transmission or series of transmissions and at least once each 10 minutes during the communication.

4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.

5) Keep transmissions short and thoughtful. Your "monologue" may prevent someone with an emergency from using the repeater. If you talk

long enough, you may actually time out the repeater. Your transmissions are being heard by many listeners, including non-hams with "public service band" monitors and scanners. Don't give a bad impression of our service.

6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.

7) Use the minimum amount of power necessary to maintain communications. This FCC regulation {97.313(a)} minimizes the possibility of accessing distant repeaters on the same frequency.

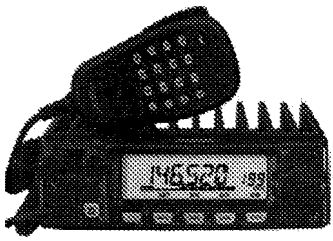

8) Don't break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended primarily to facilitate mobile operation. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC has liberalized Part 97.113 regarding business communications by amateurs. Amateur operators may not accept compensation for the use of their radios. Under certain conditions, however, the radio/autopatch can be utilized to make appointments and order items. This, though, is a decision that is made by the local repeater owner, so check with yours before making such calls. Autopatch facilities should never be used to avoid a toll call or where regular telephone service is available. Remember, autopatch privileges that are abused may be rescinded. For

further details on business communication rules, please consult *The FCC Rule Book* or *QST* magazine.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or group is responsible, and those who are regular users of a repeater should support the efforts of keeping the repeater on the air. Repeater owners may restrict individuals from using their machines, and the FCC expects users to comply with these restrictions. See Section 97.205 (e) of the FCC's rules.

AUTOPATCH GUIDELINES

Autopatch operation involves using a repeater as an interface to a local telephone exchange. Hams operating mobile or portable stations are able to use the autopatch to access the telephone system and place a call. Hams use autopatches to report traffic accidents, fires and other emergencies. There's no way to calculate the value of the lives and property saved by the intelligent use of autopatch facilities in emergencies. The public interest has been well served by amateurs with interconnect capabilities. As with any privilege, this one can be abused and the penalty for abuse could be the loss of the privilege for all amateurs. The suggested guidelines here are based on conventions that have been in use for years on a local or regional basis throughout the country. The ideas they represent have widespread support in the amateur community. Amateurs are urged to observe these standards carefully so our traditional freedom from government regulation may be preserved as much as possible.

1) Although it's not the intent of the FCC Rules to let Amateur Radio operation be used to conduct an individual's or an organization's commercial affairs, autopatching involving business affairs may be conducted on Amateur Radio. (The FCC has stated that it considers nonprofit and noncommercial organizations businesses.) On the other hand, amateurs are strictly prohibited from accepting any form of payment for operating their ham transmitters, they may not use Amateur Radio to conduct any form of business in which they have a financial interest and they may not use Amateur Radio in a way that economically

benefits their employers. Amateurs should generally avoid using Amateur Radio for any purpose that may be perceived as abuse of the privilege. The point of allowing hams to involve themselves in "business" communication is to make it more convenient and to remove obstacles from ham operations in support of public service activities. Before this rule was revised in 1993 it was often technically illegal for amateurs to participate in many charitable and community service events because the FCC regarded any organization, commercial or noncommercial, as a business with respect to the rules and prohibited hams from making any communications to in any way facilitate the business affairs of any party. That meant that operating a talk-in station for a local nonprofit radio club's hamfest constituted a violation! So now it's legal to use ham frequencies, including autopatch facilities, to communicate in such a way as to facilitate a business transaction. The distinction is essentially whether the amateur operator or his employer has a financial stake in the communication. This means that a ham may use a patch to call someone about a club event or activity, to make a dentist appointment, to order a pizza or to see if a load of dry cleaning is ready to be picked up. In such situations the ham isn't in it for the money. However, no one may use the ham bands to dispatch taxicabs or delivery vans, to send paid messages, to place a sales call to a customer or to cover news stories for the local media (except in emergencies if no other means of communication is available). If the ham is paid for or will profit from the communication it may not be conducted on an amateur frequency. That's why there are telephones and commercial business

radio services available. Use care in calling a business telephone via an amateur autopatch. Calls may be legally made to one's office to receive or to leave personal messages although using Amateur Radio to avoid the cost of public telephones, commercial cellular telephones or two-way business-band radio isn't considered appropriate to the purpose of the amateur service. Calls made in the interests of highway safety such as for the removal of injured persons from the scene of an accident or for the removal of a disabled vehicle from a hazardous location are clearly permitted. A final word on business communications: Just because the FCC says that a ham can place a call involving business matters on a repeater or autopatch doesn't mean that a repeater licensee or control operator must allow you to do so! If he or she prefers to restrict all such contacts he or she has the right to terminate your access to the system. A club for instance may decide that it would rather not have members order commercial goods over the repeater autopatch and may vote to forbid members from doing so. The radio station's licensee and control operator are responsible for what goes over the air and have the right to refuse anyone access to the station for any reason.

2) All interconnections must be made in accordance with telephone company rules and fee schedules (tariffs).

If you have trouble obtaining information about them from telephone company representatives, the tariffs are available for public inspection at your telephone company office. Although some local telephone companies consider Amateur Radio organizations to be commercial entities and

subject to business telephone rates, many repeater organizations as noncommercial volunteer public service groups have successfully arranged for telephone lines at repeater sites to be charged at the lower residential rate.

3) Autopatches should not be made solely to avoid telephone toll charges. Autopatches should never be made when normal telephone service could be just as easily used. The primary purpose of an autopatch is to provide vital, convenient access to authorities during emergencies. Operators should exercise care, judgment and restraint in placing routine calls.

4) Third parties (nonhams) should not be put on the air until the responsible control operator has explained to them the nature of Amateur Radio. Control of the station must never be relinquished to an unlicensed person. Permitting a person you don't know well to conduct a patch in a language you don't understand amounts to relinquishing control because you don't know whether what they are discussing is permitted by FCC rules.

5) Autopatches must be terminated immediately in the event of any illegality or impropriety.

6) Station identification must be strictly observed.

7) Phone patches should be kept as brief as possible as a courtesy to other amateurs; the amateur bands are intended primarily for communication among radio amateurs, not to permit hams to communicate with nonhams who can also be reached by telephone.

8) If you have any doubt as to the legality or advisability of a patch, don't make it. Compliance with these guidelines will help ensure that amateur autopatch privileges will continue to be available in

the future, which helps the Amateur Radio service contribute to the public interest.

USER INFORMATION

Except where noted, repeaters are listed according to their Geographic Area (metropolitan area or county). There are, however, some state Frequency Coordinators who prefer to list their systems alphabetically by location.

This directory lists private (closed) repeater systems as well as open systems. Many private systems, including repeaters, remote bases, control and link channels are in properly coordinated operation on authorized frequencies but are not included in this directory. This is especially common on the 440 MHz band, commonly utilized for linking and/or remote control systems. Please consult your Frequency Coordinator for their recommendations for operating frequencies on new repeaters, remote bases or control links.

With an increase in the number of reports of repeater-to-repeater interference, the FCC is placing more emphasis on repeaters being coordinated. Repeater coordination is an example of voluntary self-regulation within the Amateur Service. Non-coordinated repeater operation may imply non-conformance with locally recognized band plans (e.g. an unusual frequency split) or simply that the repeater trustee has not yet applied for, or received "official" recognition from the Frequency Coordinator. Known non-coordinated repeaters are indicated in this directory with a pound sign (#) in the Notes field. This symbol does not indicate anything about the relative merit of any particular repeater.

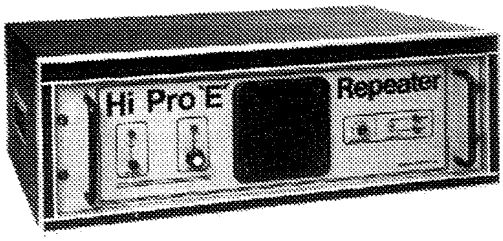

PLEASE NOTE: It is the responsibility of the

MAGGIORE
ELECTRONIC LAB

Hi Pro "R1" LOW COST Repeater.
144 MHz, 222 MHz or 440 MHz

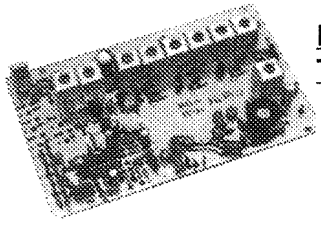

HERE IS A COMPLETE LOW COST VHF REPEATER, LESS CONTROLLER, PRICED AT $639.00. A 35 WATT VHF 2M REPEATER WITH COMPUTER CONTROLLER, VOICE SYNTHESIZER, AUTO PATCH, AUTO DIALERS, USER FUNCTIONS ETC. PRICED AT $1195.00. THIS IS NOT A KIT BUT A COMPLETE REPEATER WITH A 2 YEAR WARRANTY. THE "R1" IS ALSO AVAILABLE IN 220 AND 440 MHZ.

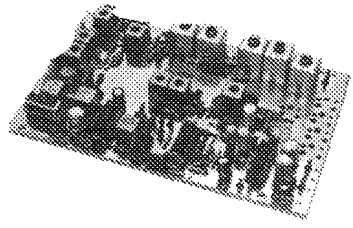

The Hi Pro "E" is the choice if you need a power supply plus room for an extra receiver, transmitter, small duplexer or large controller. The front panel provides status lights, microphone, control switches, etc.

If you need a receiver or transmitter in a housing or as a board, we can provide them. These are the same boards used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

EV1 VHF Transmitter

R4V VHF Receiver

OUR PRODUCTS CARRY A TWO YEAR WARRANTY.

operation has primary responsibility to resolve the interference. See Sections 97.201 (c) and 97.205 (c) of the Commission's Rules.

REPEATER JAMMERS AND THE LOCAL INTERFERENCE COMMITTEE

Interference on VHF or UHF repeaters is primarily a local problem requiring local resolution. This kind of problem varies from non-existent in some parts of the country to extremely serious in others. The Amateur Auxiliary mechanism for dealing with any local amateur-to-amateur interference (primarily on VHF) is the local interference committee. The philosophy of the committee approach to solving this type of problem was provided in 1980 by the ARRL Interference Task Force. Many repeater groups have already successfully established local interference committees, some employing very sophisticated methods. The committee approach to solving this type of problem and Public Law 97-259 have proven most effective.

The Amateur Auxiliary incorporates this program of local interference committees into its comprehensive program of dealing with all types of amateur variations with the regulations. Since the ARRL Field Organization is the focus of Amateur Auxiliary involvement as recognized by agreement with FCC, the local interference committee now comes within the purview of the Section Manager's overall Amateur Auxiliary program. The local interference committee gains official standing through the Section Manager. It is, in effect, a "group appointment" of the Section Manager, for specific authorization to deal with local problems of amateur-to-amateur interference. Thus the local interference committee plays a crucially important role in the make-up of the Amateur Auxiliary.

NOTES AND SPECIAL FEATURES

For more information on local interference committees, Amateur Auxiliary and the ARRL Field Organization, contact your ARRL Section Manager, or the Field and Educational Services Department at ARRL HQ.

What follows is a discussion of some of the specialized features used in repeater listings in the Directory.

LOCATION — The city, town, or site at which a repeater is located.

OUTPUT — The output frequency in megahertz.

INPUT — The frequency offset (difference between input and output frequencies). Either a (+) or (–). A frequency printed in the input field indicates a "non-standard" offset.

Standard offsets by band:

29 MHz	- 100 kHz
52 MHz	- VARIOUS
144 MHz	- 600 kHz
222 MHz	- 1.6 MHz
440 MHz	- 5 MHz
902 MHz	- 12 MHz
1240 MHz	- 12 MHz

CALL — The call sign of the repeater.

NOTES — How the repeater may be accessed and other specialized features are indicated by the following abbreviations:

- # - Uncoordinated System
- o - Open system
- Bi - Bi-lingual system
- c - Closed, limited access system
- LiTZ - (Ltz) Long-Tone Zero. Used to alert users to an emergency in some areas of the country. A more in-depth discussion of LiTZ

systems and their usage follows later in this chapter.

t - Tone-Access (CTCSS tone) required to access the system.

TT - Touch-Tone® access to specialized features

RB - Remote Base

SNP - Shared Non-Protected pair. In some areas there are repeater frequencies listed as SNP. These frequencies are intended to provide spectrum for experimental repeaters, search and rescue operations, portable public service systems and to act as a holding place for repeaters awaiting coordination. Users of SNP frequencies do so under the following guidelines:

1) The frequencies are shared by all users.
2) Operators receive no protection from other co-channel users.
3) All systems use CTCSS or other approved method of limited access.
4) The frequency coordinator shall coordinate the CTCSS tones.

SPECIALIZED FEATURES:

a - autopatch

(CA) - closed autopatch

e - emergency power

E-SUN - solar power

E-WIND - wind power

l		- linked or crossband system
p		- portable system
PKT		- digital/packet capability
r		- RACES affiliated
s	-	ARES affiliated
x	-	wide area coverage system
y	-	RTTY/ASCII system
z	-	direct access to law enforcement
WX	-	weather net/weather usage
EXP	-	experimental system

SPONSOR — The sponsor of the repeater. Plus (+) sign indicates the listed call plus additional calls sponsor the repeater.

NOTE: Listings of two CTCSS tones in the notes field indicates both the input and output are tone encoded.

TRUSTEE to provide the Frequency Coordinator with annual updates for inclusion in the ARRL Repeater Directory. Most coordination organizations have their own criteria for annual updates.

REPEATER-TO-REPEATER INTERFERENCE

In an effort to resolve repeater-to-repeater interference complaints, FCC has adopted the following rules. Where an amateur radio station in repeater or auxiliary operation causes harmful interference to the repeater or auxiliary operation of another amateur radio station, the two are equally and fully responsible for resolving the interference unless one station's operation is coordinated and the other's is not. In that case, the station engaged in the non-coordinated

LiTZ OVERVIEW

Mutual Assistance Procedures for VHF/UHF FM
Brief Overview for ARRL Repeater Directory
By: Paul Newland, AD7I
35 Barrister Lane
Middletown, NJ 07748
ad7i@arrl.net

Introduction

One of the great features of Amateur Radio is it gives hams the ability to provide mutual assistance to one another. There are two common procedures currently in place for mutual assistance on VHF/UHF FM frequencies. The first is "LiTZ," a DTMF (Touch-Tone) based all-call priority alerting system. The second is the "Wilderness Protocol".

LiTZ (i - added to make it easier to pronounce)

LiTZ is a simple method to indicate to others on an amateur VHF/UHF FM radio channel that you have an immediate need to communicate with someone, anyone, regarding a priority situation or condition.

LiTZ stands for LONG TONE ZERO. The LiTZ signal consists of transmitting DTMF (Touch-Tone) Zero for at least 3 seconds. After sending the LiTZ signal the operator announces by voice the kind of assistance that is needed. For example: (5-seconds-DTMF-zero) "This is KA7BCD. I'm on Interstate 5 between mile posts 154 and 155. There's a 3 car auto accident in the southbound lane. Traffic has been completely blocked. It looks

like paramedics will be needed for victims. Please respond if you can contact authorities for help. This is KA7BCD."

If your situation does not involve safety of life or property, try giving a general voice call before using LiTZ. Use LiTZ only when your voice calls go unanswered or the people who respond can't help you.

When you see the notation "LiTZ" for a repeater in this directory that means that it's highly likely that someone will receive and respond to LiTZ signals transmitted on the input frequency of the repeater. Please note, however, that if a CTCSS tone is needed to access that repeater you should transmit that CTCSS tone along with your LiTZ signal.

The type and nature of calls that justify the use of LiTZ may vary from repeater to repeater, just as other uses vary. Here are some general guidelines that may be suitable for most repeaters and simplex calling channels. Items with a star (*) should be acceptable on any frequency at any time.

LiTZ Use Guidelines

Event/Situation	*Waking Hours (0700-2200 LT)*	*Sleeping Hours (2200-0700 LT)*
Calling CQ	no	no
Calling a buddy	no	no
Weekly Test of LiTZ	yes	no
Club Message	yes	no
Need Driving Directions	yes	no
Report Drunk Driver	yes	yes
Car Break Down	yes	yes

Safety of Life or Property	yes	yes

For more information on LiTZ and LiTZ decoders refer to *QST* (Oct 92, page 82; Nov 92, pages 108-110; Dec 95, pages 25-31).

Wilderness Protocol

The Wilderness Protocol is a suggestion that those outside of repeater range should monitor standard simplex channels at specific times in case others have priority calls. The primary frequency is 146.52 MHz, with 52.525, 223.5 446.0 and 1294.5 MHz serving as secondary frequencies. This system was conceived to facilitate communications between hams that were hiking or backpacking in uninhabited areas, outside repeater range. However, the Wilderness Protocol should not be viewed as something just for hikers. It can (and should) be used by everyone anywhere repeater coverage is unavailable. The protocol only becomes effective when many people use it.

The Wilderness Protocol recommends that those stations able to do so should monitor the primary (and secondary, if possible) frequency every three hours starting at 7 AM, local time, for 5 minutes (7:00-7:05 AM, 10:00-10:05 AM, ..., 10:00-10:05 PM). Additionally, those stations that have sufficient power resources should monitor for 5 minutes starting at the top of every hour, or even continuously.

Priority transmissions should begin with the LiTZ signal. CQ-like calls (to see who is out there) should not take place until four minutes after the hour.

For more information on the Wilderness Protocol refer to *QST* (Feb 94, page 100; Apr 94, pages 109; May 94, pages 103-104.).

CTCSS AND DCS INFORMATION

The purpose of CTCSS (PL)™ is to reduce co-channel interference during band openings. CTCSS (PL)™ equipped repeaters respond only to signals having the sub-audible CTCSS tone required for that repeater. These repeaters do not retransmit distant signals without the required tone, and congestion is minimized.

The standard Electronic Industries Association (EIA) tones, in hertz, with their Motorola alphanumeric designators are as follows:

67.0 - XZ	97.4 - ZB	141.3 - 4A	210.7 - M2
69.3 - WZ	100.0 - 1Z	146.2 - 4B	218.1 - M3
71.9 - XA	103.5 - 1A	151.4 - 5Z	225.7 - M4
74.4 - WA	107.2 - 1B	156.7 - 5A	233.6 - M5
77.0 - XB	110.9 - 2Z	162.2 - 5B	241.8 - M6
79.7 - WB	114.8 - 2A	167.9 - 6Z	250.3 - M7
82.5 - YZ	118.8 - 2B	173.8 - 6A	
85.4 - YA	123.0 - 3Z	179.9 - 6B	
88.5 - YB	127.3 - 3A	186.2 - 7Z	
91.5 - ZZ	131.8 - 3B	192.8 - 7A	
94.8 - ZA	136.5 - 4Z	203.5 - M1	

Some systems use tones not listed in the EIA standard. Motorola designators have been assigned to the most commonly used of these tones: 206.5 (8Z), 229.1 (9Z), and 254.1 (0Z). Some newer amateur transceivers support additional tones of 159.8, 165.5, 171.3, 177.3, 183.5, 189.9, 196.6 and 199.5 hertz.

Some newer amateur gear supports Digital Code Squelch (DCS), a similar form of access control less susceptible to false triggering than CTCSS. DCS codes are designated by three digit numbers and are enabled in a manner similar to CTCSS tones.

CHAPTER TWO

BAND PLANS

This chapter will address band plans. These exist only as "traffic control" devices, allowing the most efficient use of limited spectrum space and varied amateur interests. The band plans published herein were developed by ARRL. Also discussed are the Line "A" restrictions, and a map delineating repeater offsets is provided.

Although the FCC rules set aside portions of some bands for specific modes, there's still a need to further organize our space among user groups by "gentlemen's agreements." These agreements, or band plans, usually emerge by consensus of the band occupants, and are sanctioned by a national body like ARRL. For further information on band planning, please contact your ARRL Division Director (page 10 of any *QST*).

VHF-UHF BAND PLANS

When considering frequencies for use in conjunction with a proposed repeater, be certain that both the input and output fall within subbands authorized for repeater use, and do not extend past the subband edges. FCC regulation 97.205(b) defines frequencies which are currently available for repeater use.

For example, a 2-meter repeater on exactly 145.50 MHz would be "out-of-band," as the deviation will put the signal outside of the authorized band segment.

Packet-radio operations under automatic control should be guided by Section 97.109(d) of the FCC Rules.

Regional Frequency Coordination

The ARRL supports regional frequency coordination efforts by amateur groups. Band plans published in the ARRL Repeater Directory are recommendations based on a consensus as to good amateur operating practice on a nationwide basis. In some cases, however, local conditions may dictate a variation from the national band plan. In these cases, the written determination of the regional frequency coordinating body shall prevail and be considered good amateur operating practice in that region.

28.000-29.700 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending upon local and regional coordination differences. Please check with your Frequency Coordinator for information.

28.000 – 28.070	CW
28.070 – 28.150	Data/CW
28.120 – 28.189	Packet/Data/CW
28.190 – 28.225	Foreign CW Beacons
28.200 – 28.300	Domestic CW Beacons (*)
28.300 – 29.300	Phone
28.680	SSTV
29.300 – 29.510	Satellites
29.510 – 29.590	Repeater Inputs
29.600	National FM Simplex Frequency
29.610 – 29.690	Repeater Outputs

*User note: In the United States, automatically controlled beacons may only operate on 28.2-28.3 MHz [97.203(d)].

In 1980, the ARRL Board of Directors adopted the following recommendations for CTCSS tones to be *voluntarily incorporated* by 10 meter repeaters:

Call Area	Tones	Call Area	Tones
W1	131.8/91.5	W7	162.2/110.9
W2	136.5/94.8	W8	167.9/114.8
W3	141.3/97.4	W9	173.8/118.8
W4	146.2/100.0	W0	179.9/123.0
W5	151.4/103.5	VE	127.3/88.5
W6	156.7/107.2		

The following band plan for 6 meters was adopted by the ARRL Board of Directors at its July, 1991 meeting.

50-54 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

50.0-50.1 CW, beacons
  50.060-50.080 beacon subband
50.1-50.3 SSB,CW
  50.10-50.125 DX window
  50.125 SSB calling
50.3-50.6 all modes
50.4 AM calling frequency
50.6-50.8 nonvoice communications
  50.62 digital (packet) calling
50.8-51.0 radio remote control (20-kHz channels)

NOTE: Activities above 51.10 MHz are set on 20-kHz-spaced "even channels"

51.0-51.1 Pacific DX window
51.5-51.6 simplex (6 channels)
51.12-51.48 repeater inputs (19 channels)
  51.12-51.18 digital repeater inputs
51.62-51.98 repeater outputs (19 channels)
  51.62-51.68 digital repeater outputs
52.0-52.48 repeater inputs (except as noted; 23 channels)
  52.02, 52.04 FM simplex

52.2	TEST PAIR (input)
52.5-52.98	repeater output (except as noted; 23 channels)
52.525	primary FM simplex
52.54	secondary FM simplex
52.7	TEST PAIR (output)
53.0-53.48	repeater inputs (except as noted; 19 channels)
53.0	base FM simplex
53.02	simplex
53.1, 53.2, 53.3, 53.4	radio remote control
53.5-53.98	repeater outputs (except as noted; 19 channels)
53.5, 53.6	radio remote control
53.7, 53.8	
53.52-53.9	simplex

Notes: The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in July, 1987.

Duplex pairs to consider for local coordination for uses such as repeaters and meteor scatter:

50.62-51.62	50.68-51.68	50.76-51.76
50.64-51.64	50.72-51.72	50.78-51.78
50.66-51.66	50.74-51.74	

Where duplex packet radio stations are to be co-existed with voice repeaters, use high-in, low-out to provide maximum frequency separation from low-in, high-out voice repeaters.

144-148 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

144.00-144.05	EME (CW)
144.05-144.10	General CW and weak signals
144.10-144.20	EME and weak-signal SSB
144.200	SSB calling frequency
144.20-144.275	General SSB operation
144.275-144.300	Propagation beacons
144.30-144.50	New OSCAR subband
144.50-144.60	Linear translator inputs
144.60-144.90	FM repeater inputs
144.90-145.10	Weak signal and FM simplex (145.01,03,05,07,09 are widely used for packet radio)
145.10-145.20	Linear translator outputs
145.20-145.50	FM repeater outputs
145.50-145.80	Miscellaneous and experimental modes
145.80-146.00	OSCAR subband
146.01-146.37	Repeater inputs
146.40-146.58	Simplex (*)
146.52	National Simplex Calling Frequency
146.61-147.39	Repeater outputs
147.42-147.57	Simplex (*)
147.60-147.99	Repeater inputs

NOTES: (*) Due to differences in regional coordination plans the simplex frequencies listed may be repeater inputs/outputs as well. Please check with

local coordinators for further information.

1) Automatic/unattended operations should be conducted on 145.01, 145.03, 145.05, 145.07 and 145.09 MHz.

a) 145.01 should be reserved for inter-LAN use.

b) Use of the remaining frequencies should be determined by local user groups.

2) Additional frequencies within the 2-meter band may be designated for packet radio use by local coordinators.

Footnotes

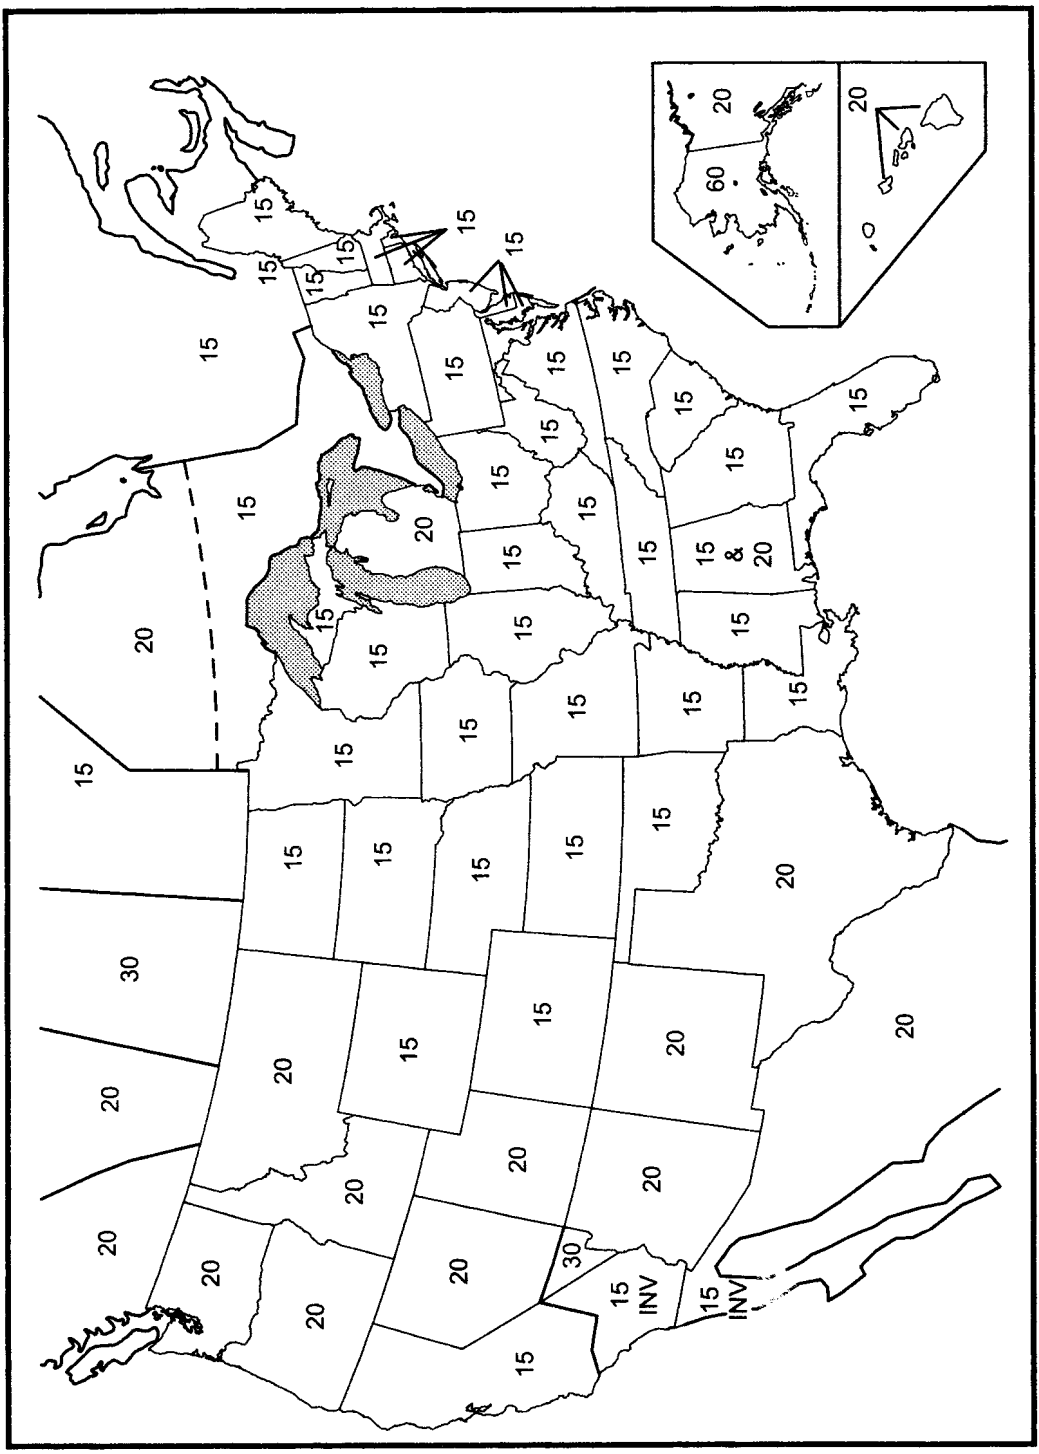

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Some areas use 146.40-146.60 and 147.40-147.60 MHz for either simplex or repeater inputs and outputs.

States use differing channel spacings on the 146-148 MHz band. For further information on which states are currently utilizing which spacing structure see the Offset Map immediately following.

NOTE:
Please contact your local Frequency Coordinator for additional information on regional channel spacing. See Coordinator listing in Chapter 3.

Note: This map shows channel spacing in the US and southern Canada. Spacing is in kHz unless otherwise specified. Please check with your Regional Frequency Coordinator for further information.

The following band plan for 222-225 MHz was adopted by the ARRL Board of Directors in July, 1991.

222-225 MHz

222.00-222.15	Weak signal modes (No repeater operating)
222.00-222.025	EME
222.05-222.060	Propagation beacons
222.1	SSB & CW Calling
222.10-222.150	Weak signal CW & SSB
222.15-222.25	Local coordinator's option: weak signal, ACSB, repeater inputs and control
222.25-223.38	FM repeater inputs only
223.40-223.52	FM simplex
223.50	Simplex calling
223.52-223.64	Digital, packet
223.64-223.70	Links, control
223.71-223.85	Local coordinator's option; FM simplex, packet, repeater outputs
223.85-224.98	Repeater outputs only

Notes: Candidate packet simplex channels shared with FM voice simplex. Check with your local frequency coordinator prior to use. Those channels are:

223.42	223.46
223.44	223.48

Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

420-450 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

420.00-426.00	ATV repeater or simplex with 421.25 MHz video carrier, control links and experimental
426.00-432.00	ATV simplex with 427.25 MHz video carrier frequency
432.00-432.07	EME (Earth-Moon-Earth)
432.07-432.10	Weak signal CW
432.10	Calling frequency
432.10-432.30	Mixed-mode and weak-signal work
432.30-432.40	Propagation beacons
432.40-433.00	Mixed-mode and weak signal work
433.00-435.00	Auxiliary/repeater links
435.00-438.00	Satellite only (internationally)
438.00-444.00	ATV repeater input with 439.250-MHz video carrier frequency and repeater links
442.00-445.00	Repeater inputs and outputs (local option)
445.00-447.00	Shared by auxiliary and control links, repeaters and simplex (local option)
446.00	National simplex frequency
447.00-450.00	Repeater inputs and outputs (local option)

The following packet radio frequency recommenda-

tions were adopted by the ARRL Board of Directors in January, 1988.

1) 100-kHz bandwidth channels

430.05	430.35	430.65
430.15	430.45	430.85
430.25	430.55	430.95

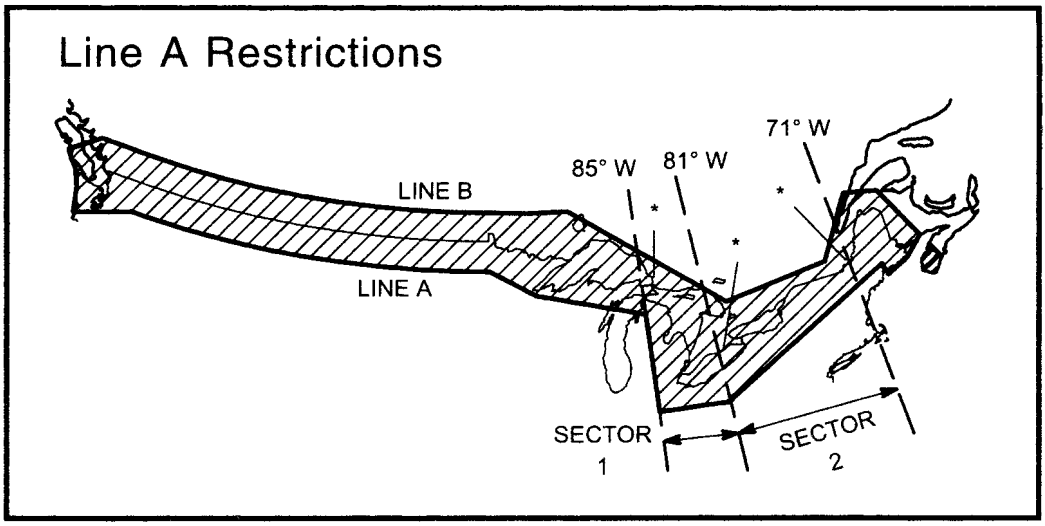

2) 25-kHz bandwidth channels

431.025	441.000	441.050
440.975	441.025	441.075

Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

The band is shared by amateurs with government Radio Location Services (RADAR); amateurs must not interfere with these priority government stations. As part of WARC-79 proceedings, the 420-430 MHz portion of the band was removed from the Amateur Radio Service north of Line "A" (see figure).

In a later action, FCC allocated portions of the band 421-430 MHz to the Land Mobile Service within 50-mile radii centered on Buffalo, Detroit and Cleveland. Amateur stations south of Line "A" in the vicinities of these cities may continue to operate in the 421-430 MHz spectrum as long as they do not cause interference to land mobile or government radio-location users. Additionally, 50-watt PEP output power limitations apply to certain amateurs operating within circles of designated military installations in the US. See 97.313(f).

902-928 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

902.0-903.0	Weak signal
902.1	Calling frequency
903.0-906.0	Digital
903.1	Alternate calling frequency
906.0-909.0	FM repeater inputs
909.0-915.0	Amateur TV
915.0-918.0	Digital
918.0-921.0	FM repeater outputs
921.0-927.0	Amateur TV
927.0-928.0	FM simplex and links

NOTE: A new bandplan is under development that reflects our need to avoid causing interference to AVM systems at 904-912 MHz and 918-926 MHz.

Notes: Adopted by the ARRL Board of Directors in July, 1989. The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in January, 1988 as interim guidance. Two 3-MHz-bandwidth channels are recommended for 1.5 Mbit/s links. They are 903-906 MHz and 914-917 MHz with 10.7 MHz spacing.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF

channel, it is advisable to check with the local frequency coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Canadian amateurs note: *The Amateur Service will continue to have secondary status in the band 902-928 MHz throughout Canada, using any of the following emissions: N0N, A1A, A2A, A3A, A3E, C3F, F1A, F2A, F2B, F1C, F3E.*

Before operating in this band, Canadian amateur licensees are required to consult with their DOC District Office to ensure interference will not be caused to other services operating in the area as per Section 45 of the General Radio Regulations Part II, given in TRC 25.

Government of Canada shipborne radiolocation service is permitted within 150 km of the east and west coasts, Arctic Ocean, Hudson Bay, James Bay and up the St Lawrence River as far as Rimouski on precoordinated channels in the 902-928 MHz band.

Footnotes:

1) Extracts of FCC Rules & Regulations, 97.303(g)(1): No amateur station shall transmit from within the states of Colorado and Wyoming, bounded on the south by latitude 39 degrees North, on the north by latitude 42 degrees North, on the east by longitude 105 degrees West, and on the west by longitude 108 degrees West.(*)

(*) FOOTNOTE: Waived July 2, 1990 to permit amateurs in the restricted areas to transmit in the following segments: 902.0-902.4, 902.6-904.4, 904.7-925.3, 925.7-927.3 and 927.7-928-MHz.

This band is allocated on a secondary basis to

the Amateur Service subject to not causing harmful interference to, and not receiving protection from any interference due to the operation of, industrial, scientific and medical devices, automatic vehicle monitoring systems or government stations authorized in this band.

2) Coordinated frequency assignments are required.

3) ATV assignments should be made according to modulation type, e.g. VSB-ATV, SSB-ATV or combinations. Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross-polarization and directional antennas.

4) Coordinated assignments at 100 kHz until allocations are filled, then assign 50 kHz until allocations are filled, before assigning 25 kHz channels.

5) Simplex services only; permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.

6) Voice and nonvoice operation.

7) Spread-spectrum requires FCC authorization.

8) Consult FCC (97.307) for allowable data rates and bandwidths.

The following band plan was adopted by the ARRL Board of Directors meeting in January, 1985.

1240-1300 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

1240-1246	ATV #1
1246-1248	Narrow-bandwidth FM point-to-point links and digital, duplex with 1258-1260.
1248-1252	Digital Communications
1252-1258	ATV #2
1258-1260	Narrow-bandwidth FM point-to-point links and digital, duplexed with 1246-1252
1260-1270	Satellite uplinks, experimental simplex ATV
1270-1276	Repeater inputs, FM and linear, paired with 1282-1288. (239 pairs, every 25 kHz, e.g. 1270.025, 050, etc.)
1271/1283	Non-coordinated test pair
1276-1282	ATV #3
1282-1288	Repeater outputs paired with 1270-1276
1288-1294	Wide band experimental, simplex ATV
1294-1295	Narrow band FM simplex, 25-kHz channels

1294.50	National FM Simplex calling
1295-1297	Narrow band weak signal (no FM)
1295-1295.80	STV, FAX, ACSSB experimental
1295.8-1296	Reserved for EME, CW expansion
1296-1296.05	EME exclusive
1296.07-1296.08	CW beacons
1296.1	CW/SSB calling frequency
1296.40-1296.60	Crossband linear translator input
1296.60-1296.80	Crossband linear translator output
1296.80-1297.00	Experimental beacons (exclusive)
1297-1300	Digital communication

Notes: The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in January, 1988.

1) 2-MHz-bandwidth channels at:
   1249.00 1251.00 1298.00
2) 100-kHz-bandwidth channels
   1299.05 1299.45 1299.75
   1299.15 1299.55 1299.85
   1299.25 1299.65 1299.95
   1299.35
3) 25-kHz-bandwidth channels
   1294.025 1294.125
   1294.050 1294.150
   1294.075 1294.175
   1294.100 National packet simplex calling

Footnotes

1) Deleted
2) Coordinated assignments required
3) ATV assignments should be made according to modulation type (for example, VSB-ATV, SSB-ATV

or combinations). Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross polarization and directional antennas. DSB ATV may be used, but only when local and regional activity levels permit. The excess bandwidths from such users are secondary to the assigned services.

4) Coordinate assignments with 100-kHz channels, beginning at the lower end of the segment until allocations are filled, then assign 50-kHz channels until allocations are filled before assigning 25-kHz channels.

5) Wide bandwidth experimental users are secondary to the satellite service and may be displaced upon the installation of any new satellites. Users are EIRP-limited to the noise floor of the satellites in service and may suffer interference from satellite uplinks.

6) Simplex services only: permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.

7) Voice and nonvoice operations.

8) Consult 47 CFR 97.307 for allowable data rates and bandwidths.

9) Provide guard bands at the higher frequency end of segments, as required, to avoid interference to ATV.

10) 1274.0-1274.2 and 1286.0-1286.2 MHz are optionally reserved for contiguous Linear Translators supporting multiple narrow bandwidth users. These may also be duplexed with other noncoordinated band segments.

The following band plan was adopted by the ARRL Board of Directors in January, 1991.

2300-2310 and 2390-2450 MHz

Please note that this bandplan is a general recommendation. Spectrum usage can be different depending on location and regional coordination differences. Please check with your Frequency Coordinator for information.

2300-2303	High-rate data
2303-2303.5	Packet radio
2303.5-2303.8	TTY, packet
2303.8-2303.9	Packet, TTY, CW, EME
2303.9-2304.1	CW, EME
2304.1-2304.2	CW, EME, SSB
2304.2-2304.3	SSB, SSTV, FAX, Packet, AM, AMTOR
2304.3-2304.32	Propagation beacon network
2304.32-2304.4	General propagation beacons
2304.4-2304.5	SSB, SSTV, ACSSB, FAX, Packet, AM, AMTOR experimental
2304.4	Calling frequency
2304.5-2304.7	Crossband linear translator input
2304.7-2304.9	Crossband linear translator output
2304.9-2305	*Experimental beacons*
2305-2305.2	FM simplex (25-kHz spacing)
2305.2	FM simplex calling frequency
2305.2-2306	FM simplex (25-kHz spacing)
2306-2309	FM repeaters (25-kHz) input
2309-2310	Control and auxiliary links
2390-2396	Fast-scan TV
2396-2399	High-rate data
2399-2399.5	Packet

2399.5-2400	Control and auxiliary links
2400-2403	Satellite
2403-2408	Satellite high-rate data
2408-2410	Satellite
2410-2413	FM repeaters (25-kHz spacing) output
2413-2418	High-rate data
2418-2430	Fast-scan TV
2430-2433	Satellite
2433-2438	Satellite high-rate data
2438-2450	Wideband FM, FSTV, FMTV, SS experimental

3300-3500 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July, 1988.

3456.3-3456.4 Propagation beacons

5650-5925 MHZ

The following beacon subband was adopted by the ARRL Board of Directors in July, 1988.

5760.3-5760.4 Propagation beacons

10.000-10.500 GHZ

The following subband recommendation was adopted by the ARRL Board of Directors in January, 1987

10.368.1 GHz Narrow-band calling frequency

The following beacon subband was adopted by the ARRL Board of Directors in July, 1988.

10368.3-10368.4 Propagation beacons

CHAPTER THREE

REPEATER LISTINGS-
COMMITTEES & COORDINATORS

Within the confines of this chapter you will find a description of repeater listing procedures, how and why repeaters are registered, and listings of Regional Frequency Coordinators. Also included for your information is a list of the ARRL Officers.

As you can imagine, many changes occur to the Frequency Coordinator's list during the course of the year. For the most current contact information of the Frequency Coordinator in your area, visit the ARRL Web site at: **http://www.arrl.org/nfcc**.

REPEATER LISTINGS

All repeater listings in the *Repeater Directory* are provided by regional frequency coordinators. Except for minor editorial changes and shuffling of field locations, all data appears exactly as it was submitted by the coordinator. If you notice any errors or omissions, please notify your frequency coordinator.

Listings provided by the following coordination entities are copyrighted and are published by permission:

1) Member States of the Mid-America Coordination Council
2) The Southeastern Repeater Association
3) The Alabama Repeater Council
4) The Indiana Repeater Council
5) The Wisconsin Association of Repeaters
6) The Ohio Area Repeater Council

7) The Michigan Area Repeater Council
8) The Western Washington Amateur Relay Association
9) The Upper New York Repeater Council
10) The Iowa Repeater Council
11) The Western Pennsylvania Repeater Council
12) The Area Repeater Coordination Council of Eastern Pennsylvania and Southern New Jersey

Repeater listings are accurate to the best of our ability; however, no guarantee of accuracy is made or implied. The listing of a repeater in the Repeater Directory does not imply that the listed repeater has any greater legal status than any other amateur station.

REPEATER REGISTRATION

Repeater registration and updates are necessary in order to compile a current and accurate *Repeater Directory*. In some cases the changes only involve the addition or deletion of a specialized feature—in other cases it may involve a frequency or location change. Your Frequency Coordinator is in charge of seeing to it that this updated information is provided to the *Repeater Directory* in a timely manner for publication.

Please note that all repeater registration is now carried out through Frequency Coordinators.

FREQUENCY COORDINATORS

The ARRL is not a Frequency Coordinator, nor does the ARRL "certify" coordinators. Frequency Coordinators are volunteers normally appointed by a coordinating body. The ARRL *Repeater Directory* reports only the fact of coordination or non-coordination as instructed by the coordinating body. Publication in the Repeater Directory does not constitute nor imply endorsement or recognition of the authority of such coordinators, as coordinators derive their authority from the voluntary participation of the entire amateur community in the areas they serve.

In some cases the person or group listed only compiles the information for listings in the Repeater Directory. In other cases the listed individual or group offers guidance but not coordination.

Frequency Coordinators keep extensive records of repeater input, output and control frequencies, including those not published in directories (at the owner's request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex operations. Therefore, anyone considering the installation of a repeater should check with the local frequency coordinator prior to such installation.

The following is a listing of groups or individuals for the United States and Canada who are active in Frequency Coordination and are acknowledged, by virtue of the recognition accorded them by the entire amateur community they serve, as the sole Frequency Coordinators in their respective jurisdictions.

CHAPTER FOUR

REPEATER LINGO / HINTS

This chapter covers a basic course in "repeater-speak" and explains many of the terms heard on your local repeater.

REPEATER LINGO:

Definitions of the words and phrases commonly used on repeaters:

Autopatch - A device that interfaces the repeater system with the telephone system to extend ham communications over the telephone communications network.

Breaker - A ham who interjects his call sign during a QSO in an attempt to get a chance to communicate over a repeater.

Channel - The pair of frequencies (input and output) a repeater operates on.

Closed Repeater - A repeater whose use is limited to certain individuals. These are completely legal under FCC rules.

Control Operator - An individual ham designated to "control" the repeater, as required by FCC regulations.

COR - Carrier-Operated-Relay, a device that, upon sensing a received signal, turns on the repeater's transmitter to repeat the received signal.

Courtesy Tone - A short tone sounded after each repeater transmission to permit other stations to gain access to the repeater before the tone sounds.

Coverage - The geographical area in which the repeater may be used for communications.

CTCSS - Continuous Tone Coded Squelch System, a sub-audible tone system which operates the squelch (COR) of a repeater when the corresponding sub-audible tone is present on a transmitted signal. The squelch on a repeater which uses CTCSS will not activate if the improper CTCSS tone, or if no tone, is transmitted.

Crossband - Communications to another frequency band by means of a link interfaced with the repeater.

Desense - Degradation of receiver sensitivity caused by strong unwanted signals reaching the receiver front end.

Duplexer - A device that permits the use of one antenna for both transmitting and receiving with minimal degradation to either the incoming or outgoing signals.

Frequency Synthesis - A scheme of frequency generation in modern transceivers using digital techniques.

Full Quieting - Signal strength in excess of amount required to mask ambient noise.

Hand-Held - A portable FM transceiver that is small enough to use and carry in one hand.

Input - The frequency the repeater receiver is tuned to: The frequency that a repeater user transmits on.

Intermod - Interference caused by spurious signals generated by intermodulation distortion in a receiver front end or transmitter power amplifier stage.

Key-Up - Turning on a repeater by transmitting on its input frequency.

LiTZ - Long Tone Zero (LiTZ) Alerting system. Send DTMF zero (0) for at least three seconds to request emergency/urgent assistance.

Machine - The complete repeater system.

Mag-Mount - A mobile antenna with a magnetic base that permits quick installation and removal from the motor vehicle.

Offset - The spacing between a repeater's input and output.

Omnidirectional - An antenna system that radiates equally in all directions.

Output - The frequency the repeater transmits on; the frequency that a repeater user receives on.

Picket-Fencing - Rapid flutter on a mobile signal as it travels past an obstruction.

Polarization - The plane an antenna system operates in; most repeaters are vertically polarized.

Reverse Autopatch - A device that interfaces the repeater with the telephone system and permits users of the phone system to call the repeater and converse with on-the-air repeater users.

Reverse Split - A split-channel repeater operating in the opposite direction of the standard.

RPT/R - Abbreviation used after repeater call signs to indicate that the call sign is being used for repeater operation.

Simplex - Communication on one frequency, not via a repeater

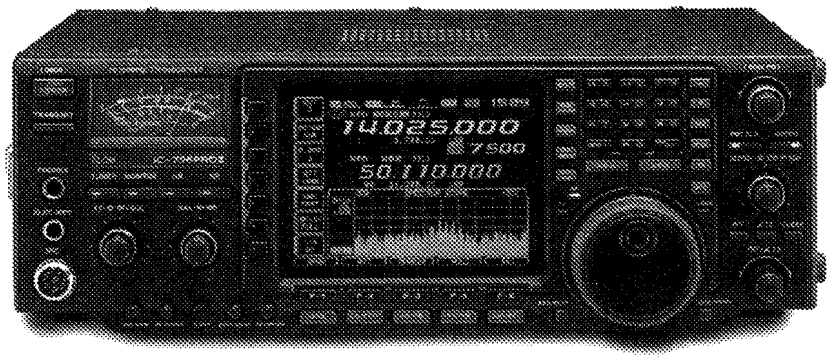

Splinter Frequency - 2-meter repeater channel 15 kHz above or below the formerly standard 30 kHz-spaced channel.

Split Sites - The use of two locations for repeater operation (the receiver is at one site and the transmitter at another), and the two are linked by telephone or radio.

Squelch Tail - The noise burst that follows the short, unmodulated carrier following each repeater transmission.

Time-Out-Timer - A device that limits the length of a single repeater transmission (usually 3 minutes).

Tone Pad - A device that generates the standard telephone system tones used for controlling various repeater functions.

WARNING!

Rig may cause hours of enjoyment on 6M!

IC-756PROII. The best gets better

• HF@100W, AM@40W • AM, FM, SSB, CW, RTTY • 32 Bit IF-DSP + 24 Bit AD/DA Converter • Selectable IF Filter Shapes for SSB & CW • Enhanced RX Performance • SSB/CW Synchronous Tuning • AGC Loop Management • Automatic & Manual Notch Filters • Digital Twin Passband Tuning (PBT) • Built-in RTTY Decoder • 5" Color Display w/Spectrum Scope • Advanced CW Functions • 101 Alphanumeric Memories • Auto Antenna Tuner • VOX • PC Controllable (optional)

PowerPort™

RadioWallet travel case

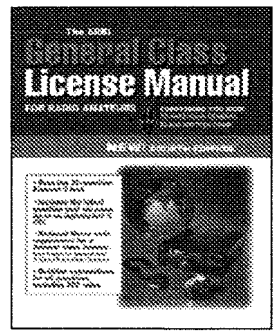

Keep your HT and it's accessories in one place and protected in this tough, padded case. Big enough for your radio, extra antenna, battery and charger along with your repeater book. **Zippered** case comes in two sizes to fit any HT.

800 206-0115 www.powerportstore.

Upgrade to General!

The ARRL General Class License Manual

Your key to worldwide communications!
Earn high-power phone and CW privileges on all HF bands.

Pass the 35-question General class written exam with help from this popular study guide:

- Easy-to-understand theory and rules
- Latest question pool with answer key
- Detailed explanations for all questions including FCC rules
- "Setting Up Your Station" chapter

The ARRL General Class License Manual – 4th edition
ARRL Order No. 8004 – **Only $15***
*shipping: $5 US (UPS)/$7 International

Also available: ARRL's ***Your Introduction to Morse Code***.
Pass the 5-WPM code test!

COLORADO REPEATER ASSOCIATION

SUPPORT AMATEUR RADIO

COLORADO REPEATER ASSOCIATION, Inc.
POST OFFICE BOX 1013
PARKER, COLORADO 80134

http://www.w0cra.org
e-mail: cra@w0cra.org
303-840-4CRA

The Colorado Repeater Association's (CRA) membership welcomes all amateurs to the state of Colorado. The CRA's ragchew repeaters are open to all hams. Please feel free to access and use the CRA frequencies listed above.

Join our information Net every Sunday at 9 a.m. for license exam info, the NewsLine Report, the Swap Net, a swapfest schedule and much more. CRA repeaters host various special interest nets covering AMSAT, ARES, EOSS, QRP, scanning and other topics. There is also IRLP access for members.

Six of the CRA's repeaters have Denver Metro autopatch capabilities. Ask any CRA member to dial a local or emergency number for you.

The CRA repeaters cover 275 miles along Interstate 25 and 100 miles along Interstate 70 providing coverage in Denver, Colorado Springs, Pueblo, Boulder, Longmont, Greeley, Fort Collins and Cheyenne.

73 – THE CRA HOPES YOU SAFELY ENJOY COLORADO

PIKES PEAK FM ASSOCIATION

The PPFMA welcomes you to the Pikes Peak and Colorado Springs area. Our goal is to provide superior communications infrastructure for the amateur community. Our repeaters are open and are supported solely by donations and membership dues. The 146.97 and 448.450 can be used for over 100 miles in many directions. Links to the 448.450 serve much of south central and southeast CO and northern NM. Visit our web site or email for info.

"ABOVE THEM ALL!!!"

KJI Electronics

SERVING AMATEUR RADIO SINCE 1978

Please visit our new store location at

394 Bloomfield Ave, Caldwell, NJ 07006;
973-364-1930; fax 973-239-4389

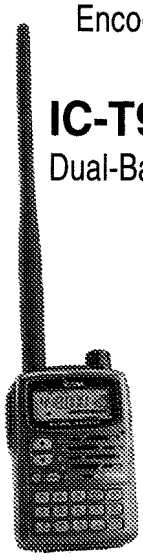

KJI - YOUR ICOM HEADQUARTERS!

IC-272OH

True dual band fun.

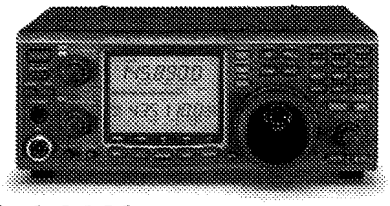

- 50W VHF/35W UHF
- VV/UU/VU
- CTCSS/DTCS Encode/Decode/Tone Scan

IC-T90A

Dual-Band Handheld

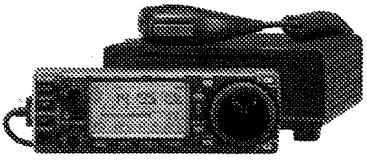

Also available:
IC-207H,
IC-2100H,
IC-V8000,
IC-V8,
IC-T2H,
IC-T7H,
IC-Q7A,
IC-32A

IC-910H

More power. Go anywhere size.

- All Mode
- 100W VHF/75W UHF Variable Output
- Work Two Bands at Once
- 9600 bps High Speed PACKET Port
- 0.11 uV Sensitivity
- CTCSS Encode/Decode/Tone Scan

IC-706MKIIG

The legacy continues.

- HF/6M/2M/440 MHz
- 100W on HF, 100W on 6M, 50W on 2M, 20W on 440 MHz
- AF-DSP
- Plug and Play Filters - No Soldering
- Auto Repeater
- CTCSS Encode/Decode

See your favorite ICOM radio on display connected to a working antenna system!

– Bring your QSL for a FREE Gift! –

73 from Gene, K2KJI, and 88 from Mary Ann, K2RVH

NEW YORK

Information for New York City, Long Island, and Westchester County is provided by MetroCor. MetroCor is currently in the final stages of being recognized by the adjacent coordination councils and certified by the NFCC. Trustees within the MetroCor service territory are strongly urged to provide their operating information to MetroCor so that their operations may be properly coordinated with MetroCor and the adjacent councils.

The **Long Island Mobile Amateur Radio Club** is an ARRL Affiliated Special Service Club, serving the Amateur Radio community for over 35 years and is one of the largest Amateur Radio clubs in the USA. We are a non-profit organization, dedicated to the advancement of amateur radio, public service and assistance to fellow amateurs.

LIMARC operates five repeaters, all using a 136.5 PL.

Repeater	**Frequency**	**Weekly Nets (*all on 146.850)**	
W2VL	146.850 -	Sunday	8:00 PM **Technical Net***
W2VL	1288.00 -	Monday	8:30 PM **Club Info Net***
WB2NHO	449.125 -	Thursday	8:30 PM **Swap & Shop Net***
WB2NHO	147.375 + **New location in Selden, Suffolk County**		
WB2NHO	224.820 - **New machine at new location in Glen Oaks**		

Trustee: W2VL - W2QZ **WB2NHO** - WB2WAK **WV2LI** - N2GA

Some of LIMARC's regular activities are:

General Meetings: 2nd Wednesday (except July and August) at Levittown Hall in Hicksville starting at 8:00 pm

VE Tests: 2nd Saturday in odd numbered months at Levittown Hall

Hamfests: Winter, Spring & Fall

License classes 3 times a year

Field Day 4th weekend in June

LIMARC Officers:

President: Diane Ortiz K2DO **Secretary:** Daniel Reisman NY2L

Vice Pres: Ed Muro K2EPM **Treasurer:** Rick Bressler K2RB

Past President: Ray Skrabut WA2CNJ

Directors: Don Kane WB2BEZ, Lew Reinberg W2BIE, Linda Tessier W2LRN Joe Schierer KC2BZB, Nancy Rosner N2TKA, Rich Rosner N2STU

For more information on current LIMARC events: access LIMARC on the world wide web: **http://www.limarc.org** or e-mail us at: **limarc@limarc.org** Write: **LIMARC, P.O. Box 392, Levittown, NY 11756.**

Icom Dual Band Rigs

IC-2720H. True dual band fun

• 50W VHF/35W UHF • 2M/70CM • VV/UU/VU • CTCSS/DTCS Encode/Decode w/Tone Scan • Wide Band RX† including Weather & Air Bands • 212 Memory Channels • Remote Control Mic • DMS • DTMF Encode • 10dB Attenuator • Cross Band Repeat • Independent Controls

---

Little brother with attitude!

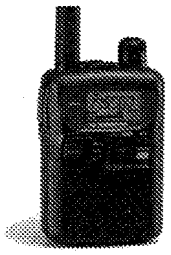

IC-208H*
Coming soon!

• 55W VHF/50W UHF • 2M/70CM • CTCSS/DTCS Encode/Decode w/ Tone Scan • Wide Band RX† including Weather & Air Bands • 500 Memory Channels • Remote Control Mic • DMS • DTMF Encode • 10dB Attenuator

*FCC certification pending. Not for sale or lease unitl FCC approval is granted. Check www.icomamerica.com or your authorized dealer for more details.

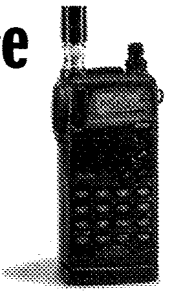

Offer Real Fun 2 Go!

IC-Q7A. Super small size, big sound

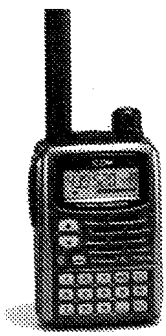

• 2M/70CM • Wide Band Rx† - 30 to 1300MHz • 200 Memories • Auto Repeater • CTCSS Encode/Decode w/Tone Scan • Includes "AA" Ni-Cds & Charger • Air Band RX • Work One Band at a Time

IC-T7H. Powerful performance

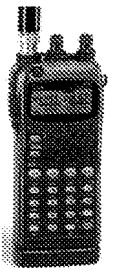

• 2M/70CM • 6W Output • 70 Memory Channels • Auto Repeater • CTCSS Encode/Decode w/Tone Scan • Air Band RX • IRLP Compatable • Work One Band at a Time • Easy to Use

IC-T90A. Mini multiband marvel

6M/2M/70CM • 5W Output • Wide Band Receiver - 495kHz - 999.999MHz† • 500 Alphanumeric Memory Channels • CTCSS/DTCS Encode/Decode w/Tone Scan • Air Band RX • Lithium Ion Power • IRLP Compatable • Dynamic Memory Scan (DMS) • Weather Alert • Backlit Keypad & Display • JIS-4 Weather Resistant Construction • Work one band at a time

IC-W32A. Advanced dual bander

2M/70CM • 5W Output • 200 Alphanumeric Memories • Crossband Repeat • CTCSS Encode/Decode w/Tone Scan • Air Band RX • IRLP Compatible •Guide Function • V/V, U/U, V/U

The final frontier suddenly got a lot closer

IC-910H. A new era in satellite transceivers.

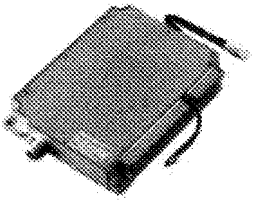

100W Variable Output • All Mode • Simultaneously Works Two Bands at Once • 9600 bps High Speed PACKET Port • .11 uV Sensitivity • Main & Sub Band Functions for IF Shift, Sweep, NB, RF Attenuator • Large LCD Display • Four Versatile Scanning Functions • CTCSS Encode/Decode/Tone Scan • Built-in Keyer • PC Controllable • Memory Pad • Normal/Reverse Satellite Functions

AG-2400

Downlink Receive Converter

Converts a 2400MHz RF signal to 144MHz, allowing US mode operation. When used with optional UX-910, LS mode operation is also available.

UX-910

1200MHz Band Unit

Turns the IC-910H into an all mode, tri-band transceiver for 1.2 GHz operation. Enhance your crossband and full duplex operation.

TC70-20S ATV TRANSCEIVER

Live action full color and sound

All in one box..$549 del. UPS cont. USA

- **TUNES ALL 420-440 MHz ATV REPEATERS**
  Sensitive GaAsfet preamp/mixer downconverts the whole 70cm band to your TV receiver on channel 3 or 4.

- **20 WATTS pep ADJUSTABLE RF OUTPUT**
  Snow free DX is over 100 miles line of sight if 14 dBd beams at both ends. Power can be adjusted down as low as 2 Watts to properly drive linear amplifiers. Plug in your camcorder or video camera, mic, TV set, 70cm antenna and 13.8 Vdc @ 5A power supply. *Thats it!*

- **4 SYNTHESIZED TRANSMIT CHANNELS**
  Front panel select from the popular frequencies: 439.25 (cable ch60), 434.0, 427.25 or 426.25 MHz.

Hams, visit our web site: **www.hamtv.com**
to down load our current ATV catalogue, application notes, or email or call for free printed catalogue and info on other ATVers in your area. We have transmitters, antennas, repeater modules and all your ATV needs.

CALL **(626) 447-4565** m-th, 8am-5:30 pm pst

Information for New York City, Long Island, and Westchester County is provided by MetroCor. MetroCor is currently in the final stages of being recognized by the adjacent coordination councils and certified by the NFCC. Trustees within the MetroCor service territory are strongly urged to provide their operating information to MetroCor so that their operations may be properly coordinated with MetroCor and the adjacent councils.

West Mountain Radio

18 Sheehan Avenue, Norwalk, CT 06854 (203) 853 8080

IRLP Repeaters

The Internet Radio Linking Project (IRLP) is one of several applications of Voice Over Internet Protocol (VoIP) to Amateur Radio. A number of repeaters around the world serve as IRLP nodes, from which a user may access other IRLP nodes around the world. This section contains a number of repeaters in the United States and Canada which serve as IRLP nodes, their four-digit node numbers, and information needed to access each repeater. Care was taken to ensure that this list contains only those repeaters reported to us by frequency coordination bodies. If you know of an IRLP repeater not listed here, please encourage the owner to secure coordination.

IRLP volunteer Paul Cassel, VE3SY, generously provided permission to use this list. A more expansive list, as well as up-to-date information on IRLP, may be found at ***www.irlp.net****. For background on IRLP, other VoIP-assisted Amateur Radio protocols, and information on how to legally operate VoIP-assisted Amateur Radio in the United States, see Steve Ford, WB8IMY, "VoIP and Amateur Radio,"* QST, *Feb 2003, pp 44-47.*
